practice, and initiatives, this handbook is designed to be quickly accessible to nurses in a busy clinical setting. Designed primarily for staff nurses and students this book will assist anyone working with people living with mental health problems, and their families and carers, including junior doctors, medical students, occupational therapists and social workers. It is envisaged that the more experienced clinician will be able to use sections for reference and as a resource for key facts. The handbook enables readers to find relevant information quickly as the contents are arranged for quick and easy access so as to provide up-to-date information about the essentials of mental health nursing practice in a user-friendly manner. The revised mental health act is summarised in detail, as well as the mental capacity act, mental health legislation in Scotland and other UK countries. New material for the second edition includes expanded and revised

Psychiatric-mental health nursing promotes mental health through the assessment, diagnosis, and treatment of human responses to mental health problems and psychiatric disorders. A core mental health profession, it is a specialty that employs a purposeful use of self as its art along with a wide range of nursing, psychosocial, and neurobiological theories and research evidence as its science. Its areas of focus emerge based on current and anticipated societal needs,

Essential Mental Health Nursing Skills E-Book Mar 05 2020

This title is directed primarily towards health care professionals outside of the United States. This book will help to identify the skills and resources that students already have and show how these can be developed into the essential skills needed for nursing in the mental health practice environment. Essential Mental Health Nursing Skills draws on the policy and theory underpinning mental health nursing but focusses on the practical aspects, providing an easily understandable guide to what to do and how to do it. It also provides a practical framework that can be applied in any setting. Examples are given to show how skills can be applied across the diversity of modern mental health nursing. Essential Mental Health Nursing Skills is also designed to be taken into the practice environment so that it can easily be referred to it when learning a skill.

registration nursing students. Getting assessment right is essential for the nursing student in order for them to become an effective practitioner. Many books on assessment are very theoretical. This is a practical, hands-on guide to the assessment process, underpinned by the latest evidence. The book explains the core principles through running case studies, so that readers can see how each decision they make impacts on the person in their care. Key features: Assessment principles are applied across a variety of modern nursing settings that you may find yourself working in as a registered nurse Each chapter is linked to the relevant NMC standards and Essential Skills Clusters so you know you are meeting the professional requirements Activities throughout help you to think critically and develop essential graduate skills.

*Nursing: Applying Theory to Practice* is a new Australian text combining a theoretical approach to mental health nursing with clinical reasoning and a practical framework for real-life nursing situations. Ideal for both clinical and theory mental health course units, the text was developed with input from consumers and clinicians, and includes the clinical manifestations, impacts, treatment and management of persons suffering from mental illness. Chapters on suicide and self-harm, and Mental Health First Aid provide detailed coverage of these contemporary mental health issues, while a chapter on mental state examination (MSE) comprehensively explores MSE in a style similar to a traditional psychiatry text and in the context of many different mental health conditions, giving students multiple perspectives of presentations. Critical thinking and review questions challenge students to apply theory to practice, and pharmacology is discussed in each disorder-

science, encouraging nurses to take a holistic approach to the practice of psychiatric and mental health nursing.

Reflecting current developments in nursing practice and the understanding of mental health disorders, this edition includes twelve additional chapters, placing more emphasis on specific groups such as children and young people, women, older people, asylum seekers, and refugees. Case studies include patients with anxiety, schizophrenia, and bipolar disorder as well as victims of sexual abuse, those with an eating disorder, homeless patients, and those with dementia and autism. The book also examines specialist services such as psychiatric liaison and spiritual care and includes discussion on psychiatric diagnosis and mental health legislation in relation to human rights. This is an essential text for all psychiatric and mental health nurses at the diploma and degree level, as well as qualified mental health nurses

interpersonal, humanistic and ecological views and approaches to P/MH nursing. Secondly, it highlights patient/client-centered approaches and mental-health-service user involvement. Lastly, it is a genuinely European P/MH nursing textbook - the first of its kind - largely written by mental health scholars from Europe, although it also includes contributions from North America and Australia/New Zealand. Focusing on clinical/practical issues, theory and empirical findings, it adopts an evidence-based or evidence-informed approach. Each contribution presents the state-of-the-art of P/MH nursing in Europe so that it can be transferred to and implemented by P/MH nurses and the broader mental health care community around the globe. As such, it will be the first genuinely 21st century European Psychiatric Mental Health Nursing book.
