America's Energy Future Jul 04 2020 For multi-user PDF licensing, please contact customer service. Energy touches our lives in countless ways and its costs are felt when we fill up at the gas pump, pay our home heating bills, and keep businesses both large and small running. There are long-term costs as well: to the environment, as natural resources are depleted and pollution contributes to global climate change, and to national security and independence, as many of the world's current energy sources are increasingly concentrated in geopolitically unstable regions. The country's challenge is to develop an energy portfolio that addresses these concerns while still providing sufficient, affordable energy reserves for the nation. The United States has enormous resources to put behind solutions to this energy challenge; the dilemma is to identify which solutions are the right ones. Before deciding which energy technologies to develop, and on what timeline, we need to understand them better. America's Energy Future analyzes the potential of a wide range of technologies for generation, distribution, and conservation of energy. This book considers technologies to increase energy efficiency, coal-fired power generation, nuclear power, renewable energy, oil and natural gas, and alternative transportation fuels. It offers a detailed assessment of the associated impacts and projected costs of implementing each technology and categorizes them into three time frames for implementation.

IMF Financial Operations 2016 Dec 29 2019 IMF Financial Operations 2016 provides a broad introduction to how the IMF fulfills its mission through its financial activities. It covers the financial structure and operations of the IMF and also provides background detail of the financial statements for the IMF's activities during the most recent financial year. This publication (currently in its third edition) updates a previous report entitled Financial Organization and Operations of the IMF, first published in 1986 and last issued in 2001 (the sixth edition). That 2001 report reflected the seismic shifts in the global economy and in the IMF's structure and operations that occurred after the fall of the Soviet Union and the various currency and financial crises of the 1990s. This revised and updated report covers more recent developments, including reform of the IMF's income model, measures taken in response to the global financial crisis of 2007-09, and the institutional reforms aimed at ensuring that the IMF's governance structure evolves in line with developments in the global economy.

Media and Nation Building in Twentieth-Century India Oct 26 2019 This book profiles twentieth-century India through the life and times of Ramananda Chatterjee – journalist, influencer, nationalist. Through a reconstruction of his history, the book highlights the oft-forgotten role of media in the making of the idea of India. It shows how early twentieth-century colonial India was a curious melee of ideas and people – a time of rising nationalism, as well as an influx of Western ideas; of unprecedented violence and compelling non-violence; of press censorship and defiant journalism. It shows how Ramananda Chatterjee navigated this world and went beyond the traditional definition of the nation as an entity with fixed boundaries to anticipate Benedict Anderson and Ernest

Gellner. The volume also examines the wide reach and scope of his journals in English, Hindi and Bengali, which published the likes of Rabindranath Tagore, Subhash Bose, Abanindranath Tagore, Nandalal Bose, Ananda Coomaraswamy, the scientist J. C. Bose and Zhu Deh, the co-founder of the Chinese Red Army. He also published *India in Bondage* by the American Unitarian minister J. T. Sunderland, which resulted in his arrest. An intriguing behind-the-scenes look of early twentieth-century colonial India, this book will be of great interest to scholars and researchers of history, modern South Asia and media and cultural studies.

*Xi Jinping's 'Chinese Dream'* Jun 22 2019 Singh analyses the influence of Xi's 'Chinese Dream' on China's foreign relations and security postures. Xi Jinping's rise has led to a paradigm shift in many aspects of China's domestic and international politics. A key element of this has been the ideological vision shorthanded as the 'Chinese Dream', combining elements of nationalism, Confucian ideology, and economic expansionism. Singh evaluates the various changes in China's nominally communist ideology in the post-Mao era, with an emphasis on the implications for China's economic and security relations with other countries. He particularly focusses on China's approach to South Asia and the Indian Ocean Region, key elements of China's strategy. An insightful guide to understanding the direction of China's foreign and security policy, and especially its impact on India-China relations.

*2011 Review of the Standards and Codes Initiative* Oct 31 2022 The Standards and Codes Initiative ("Initiative") has been identified as one of several building blocks for the overhaul of the global financial architecture after the Asian crisis in the late 1990s. Twelve policy areas were selected as key for sound financial systems and a framework for Reports on the Observance of Standard and Codes (ROSCs) was established and has been implemented by the Bank and the Fund for about a decade. Since the Initiative's inception, a majority of member countries have had one or more ROSCs, although—in part due to the voluntary nature of ROSCs—the coverage is not fully complete. After peaking in 2003, the annual number of ROSCs completed has declined considerably. In particular, the number of fiscal transparency and data ROSCs has dropped, reflecting the downsizing of the Fund, and changes in departmental priorities. The reduction in financial sector ROSCs—generally done as a part of the Financial Sector Assessment Program (FSAP)—has been less, although fewer ROSCs have been done per FSAP. Revisions to the standards to incorporate the lessons from the crisis, the initiatives of the Financial Stability Board (FSB), and changes to financial surveillance are likely to have important implications for the future of the Initiative. In particular, the commitment by FSB members to undergo FSAPs every 5 years and the FSB's framework to enhance adherence to international financial standards are likely to boost demand for financial sector ROSCs. These resource pressures impose a greater burden on the prioritization process, and strategic decisions will have to be made to augment resources for the Initiative or on where the resource cuts could come from in order to maintain adequate coverage of non-G20 countries.

*Access Contested* Feb 20 2022 Experts examine censorship, surveillance, and resistance across Asia, from China and India to Malaysia and the Philippines. A daily battle for rights and freedoms in cyberspace is being waged in Asia. At the epicenter of this contest is China—home to the world's largest Internet population and what is perhaps the world's most advanced Internet censorship and surveillance regime in cyberspace. Resistance to China's Internet controls comes from both grassroots activists and corporate giants such as Google. Meanwhile, similar struggles play out across the rest of the region, from India and Singapore to Thailand and Burma, although each national dynamic is unique. *Access Contested*, the third volume from the OpenNet Initiative (a collaborative partnership of the Citizen Lab at the University of Toronto's Munk School of Global Affairs, the Berkman Center for Internet and Society at Harvard University, and the SecDev Group in Ottawa), examines the interplay of national security, social and ethnic identity, and resistance in Asian cyberspace, offering in-depth accounts of national struggles against Internet controls as well as updated country reports by ONI researchers. The contributors examine such topics as Internet censorship in Thailand, the Malaysian blogosphere, surveillance and censorship around gender and sexuality in Malaysia, Internet governance in China, corporate social responsibility and freedom of expression in South Korea and India, cyber attacks on independent Burmese media, and distributed-denial-of-service attacks and other digital control measures across Asia.

*The Material Basis of Energy Transitions* Sep 25 2019 *The Material Basis of Energy Transitions* explores the intersection between critical raw material provision and the energy system. Chapters draw on examples and case studies involving energy technologies (e.g., electric power, transport) and raw material provision (e.g., mining, recycling), and consider these in their regional and global contexts. The book critically discusses issues such as the notion of criticality in the context of a circular economy, approaches for estimating the need for raw materials, certification schemes for raw materials, the role of consumers, and the impact of renewable energy development on resource conflicts. Each chapter deals with a specific issue that characterizes the interdependency between critical raw materials and renewable energies by examining case studies from a particular conceptual perspective. The book is a resource for students and researchers from the social sciences, natural sciences, and engineering, as well as interdisciplinary scholars interested in the field of renewable energies, the circular economy, recycling, transport, and mining. The book is also of interest to policymakers in the fields of renewable energy, recycling, and mining, professionals from the energy and resource industries, as well as energy experts and consultants looking for an interdisciplinary assessment of critical materials. Provides a comprehensive overview of key issues related to the nexus between renewable energy and critical raw materials Explores interdisciplinary perspectives from the natural sciences, engineering, and social sciences Discusses critical strategies to address the nexus from a practitioner's perspective

***Glass Half-Broken Jan 10 2021 Why the gender gap persists and how we can close it. For years women have made up the majority of college-educated workers in the United States. In 2019, the gap between the percentage of women and the percentage of men in the workforce was the smallest on record. But despite these statistics, women remain underrepresented in positions of power and status, with the highest-paying jobs the most gender-imbalanced. Even in fields where the numbers of men and women are roughly equal, or where women actually make up the majority, leadership ranks remain male-dominated. The persistence of these inequalities begs the question: Why haven't we made more progress? In Glass Half-Broken, Colleen Ammerman and Boris Groysberg reveal the pervasive organizational obstacles and managerial actions—limited opportunities for development, lack of role models and sponsors, and bias in hiring, compensation, and promotion—that create gender imbalances. Bringing to light the key findings from the latest research in psychology, sociology, organizational behavior, and economics, Ammerman and Groysberg show that throughout their careers—from entry-level to mid-level to senior-level positions—women get pushed out of the leadership pipeline, each time for different reasons. Presenting organizational and managerial strategies designed to weaken and ultimately break down these barriers, Glass Half-Broken is the authoritative resource that managers and leaders at all levels can use to finally shatter the glass ceiling.***

***British Rail 1974-1997 Jul 28 2022 Britain's privatised railways continue to provoke debate about the organisation, financing, and development of the railway system. This important book, written by Britain's leading railway historian, provides an authoritative account of the progress made by British Rail prior to privatisation, and a unique insight into its difficult role in the government's privatisation planning from 1989. Based on free access to the British Railway Board's rich archives, the book provides a comprehensive analysis of the main themes: a process of continuous organisational change; the existence of a persistent government audit; perennial investment restraints; the directive to reduce operating costs and improve productivity; a concern with financial performance, technological change, service quality, and the management of industrial relations; and the Board's ambiguous position as the Conservative government pressed home its privatisation programme. The introduction of sector management from 1982 and the 'Organising for Quality' initiative of the early 1990s, the Serpell Report on railway finances of 1983, the sale of the subsidiary businesses, the large-scale investment in the Channel Tunnel, and the obsession with safety which followed the Clapham accident of 1988, are all examined in depth. In the conclusion, the author reviews the successes and failures of the public sector, rehearses the arguments for and against integration in the railway industry, and contrasts what many have termed 'the golden age' of the mid-late 1980s, when the British Rail-government relationship was arguably at its most effective, with what has happened since 1994.***

**Triennial Review of the National Nanotechnology Initiative Mar 24 2022** Nanoscale science, engineering, and technology, often referred to simply as "nanotechnology," is the understanding, characterization, and control of matter at the scale of nanometers, the dimension of atoms and molecules. Advances in nanotechnology promise new materials and structures that are the basis of solutions, for example, for improving human health, optimizing available energy and water resources, supporting a vibrant economy, raising the standard of living, and increasing national security. Established in 2001, the National Nanotechnology Initiative (NNI) is a coordinated, multiagency effort with the mission to expedite the discovery, development, and deployment of nanoscale science and technology to serve the public good. This report is the latest triennial review of the NNI called for by the 21st Century Nanotechnology Research and Development Act of 2003. It examines and comments on the mechanisms in use by the NNI to advance focused areas of nanotechnology towards advanced development and commercialization and on the physical and human infrastructure needs for successful realization in the United States of the benefits of nanotechnology development.

**Enterprise Content Management, Records Management and Information Culture Amidst E-Government Development Jan 28 2020** This book identifies key factors necessary for a well-functioning information infrastructure and explores how information culture impacts the management of public information, stressing the need for a proactive and holistic information management approach amidst e-Government development. In an effort to deal with an organization's scattered information resources, Enterprise Content Management, Records Management and Information Culture Amidst E-Government Development investigates the key differences between Enterprise Content Management (ECM) and Records Management (RM), the impact of e-Government development on information management and the role of information in enhancing accountability and transparency of government institutions. The book hence identifies factors that contribute to a well-functioning information infrastructure and further explores how information culture impacts the management of public information. It highlights the Records Continuum Model (RCM) thinking as a more progressive way of managing digital information in an era of pluralization of government information. It also emphasizes the need for information/records management skills amidst e-Government development. Ideas about records, information, and content management have fundamentally changed and developed because of increasing digitalization. Though not fully harmonized, these new ideas commonly stress and underpin the need for a proactive and holistic information management approach. The proactive approach entails planning for the management of the entire information continuum before the information is created. For private enterprises and government institutions endeavoring to meet new information demands from customers, citizens and the society at large, such an approach is a prerequisite for accomplishing their missions. It could be argued that information is and has always been essential to all human activities and we are witnessing a transformation of the information landscape. Presents research with broad application based on archives and information science, but relevant for information systems, records management, information culture, and e-government Examines the differences between Enterprise Content Management and Records Management Bridges a gap between the proponents of Enterprise Content Management and information professionals, such as records managers and archivists

**Selected Decisions and Selected Documents of the International Monetary Fund, Fortieth Issue Nov 07 2020** This volume is the Fortieth Issue of Selected Decisions and Selected Documents of the IMF. It includes decisions, interpretations, and resolutions of the Executive Board and the Board of Governors of the IMF, as well as selected documents, to which frequent reference is made in the current activities of the IMF. In addition, it includes certain documents relating to the IMF, the United Nations, and other international organizations. As with other recent issues, the number of decisions in force continues to increase, with the decision format tending to be longer given the use of summings up in lieu of formal decisions. Accordingly, it has become necessary to delete certain decisions that were included in earlier issues, that is, those that only completed or called for reviews of decisions,

those that lapsed, and those that were superseded by more recent decisions. Wherever reference is made in these decisions and documents to a provision of the IMF's Articles of Agreement or Rules and Regulations that has subsequently been renumbered by, or because of, the Second Amendment of the Fund's Articles of Agreement (effective April 1, 1978), the corresponding provision currently in effect is cited in a footnote.

**Political Handbook of the World 2016-2017** Oct 19 2021 Published since 1928, the *Political Handbook of the World* provides timely, thorough, and accurate political information with more in-depth coverage of current political controversies and political parties than any other reference guide. The updated 2016–2017 Edition continues this legacy as the most authoritative source for finding complete facts and analysis on each country's governmental and political makeup. Political science and international relations scholars have revised this edition, and made understanding complex foreign affairs and political situations easy and accessible. With more than 200 entries on countries and territories throughout the world, housed in one place, these volumes are renowned for their extensive coverage of all major and minor political parties and groups in each political system. They also provide names of key ambassadors and international memberships of each country, plus detailed profiles of more than 30 intergovernmental organizations and United Nations agencies. This comprehensive update will include coverage of current events, issues, crises, and controversies from the course of the last two years, including: The closely-watched U.S. presidential election The effect of the Brexit referendum and installment of a new British prime minister The extensive investigation and subsequent impeachment of Brazil's president The far-reaching impact of the "Panama Papers" scandal Changes in U.S.–Cuba diplomatic relations and the reopening of their embassies The unconstitutional declaration of Gambia as an Islamic State Sentiments about the migrant and refugee crisis across Europe and the influence on policy Also, the new "For Further Reference" feature included for every country entry directs readers to additional resources to continue their research.

**European Yearbook / Annuaire Europeen 1973** Dec 09 2020 The "European Yearbook" promotes the scientific study of nineteen European supranational organisations and the OECD. The series offers a detailed survey of the history, structure and yearly activities of each organisation and an up-to-date overview of the member states of each organisation. This special anniversary volume celebrates 60 years of publication of the Yearbook, and its contents differs from that of the regular volumes therefore. It offers a selection of the most important articles, dealing with European cooperation and integration, to appear in the Yearbook during its 60 years of publication. These are of particular interest not only because they provide a unique historical snapshot of the many successes (and occasional failures) in the field of European integration but also because they discuss the ideals and aims that lay behind these efforts, many of which still resonate today as Europe confronts questions about its political destiny and ideal shape. This volume contains articles in English and French."

**Management** Mar 12 2021 **MANAGEMENT, 12E**, takes a functional, skills-based approach to the process of management with a focus on active planning, leading, organizing and controlling. **Security and Safety in the Era of Global Risks** Mar 31 2020 The concept of risk in global life has not been fully understood and explored and this book attempts to examine what it entails in the fast changing, interconnected and complex world. As a foundational component of safety systems, risk has been considered relatively simple, predictable, and therefore, assessable and manageable phenomenon. Social and political sciences prefer the terminology of security to capture the dimension of risk which is more complex and more consequential to survival. Risk has become more human-made and intentional today, and this book explores innovative approaches and engages in theoretical and policy debates to capture its political and security dimensions.
