Climate Change: An Encyclopedia of Science, Society, and Solutions [3 volumes] Apr 17 2021 This three-volume set presents entries and primary sources that will impress on readers that what we do—or don't do—today regarding climate change will dramatically influence what life on this planet will be like for untold numbers of generations. • Provides readers with a clearly written description of global-warming science and its role in shaping a body of knowledge regarding a worldwide issue that affects everyone • Suggests remedies for this serious problem, most notably a rapid rise in the implementation of wind power generation and a coming revolution in solar energy • Impresses on readers that what Americans and the citizens and governments of other nations around the globe do over the next decades will determine the future of this planet for many tens of thousands of years to come • Includes primary documents sourced from major scientific journals and from the many reports on recent climate change from governmental organizations, including the Intergovernmental Panel on Climate Change (IPCC) and World Meteorological Organization (WMO), both part of the United Nations; and the U.S. government's National Climate Assessment

Science Learning, Science Teaching Oct 31 2019 Now fully updated in its third edition, *Science Learning, Science Teaching* offers an accessible, practical guide to creative classroom teaching and a comprehensive introduction to contemporary issues in science education. Aiming to encourage and assist professionals with the process of reflection in the science classroom, the new edition examines the latest research in the field, changes to curriculum and the latest standards for initial teacher training. Including two brand new chapters, key topics covered include: the science curriculum and science in the curriculum planning and managing learning in science – including consideration of current 'fads' in learning safety in the science laboratory exploring how science works using ICT in the science classroom teaching in an inclusive classroom the role of practical work and investigations in science language and literacy in science citizenship and sustainability in science education. Including useful references, further reading lists and recommended websites, *Science Learning, Science Teaching* is an essential source of support, guidance and inspiration all students, teachers, mentors and those involved in science education wishing to reflect upon, improve and enrich their practice.

Library and Information Studies for Arctic Social Sciences and Humanities Feb 25 2022 Library and Information Studies for Arctic Social Sciences and Humanities serves as a key interdisciplinary title that links the social sciences and humanities with current issues, trends, and projects in library, archival, and information sciences within shared Arctic frameworks and geographies. Including contributions from professionals and academics working across and on the Arctic, the book presents recent research, theoretical inquiry, and applied professional endeavours at academic and public libraries, as well as archives, museums, government institutions, and other organisations. Focusing on efforts that further Arctic knowledge and research, papers present local, regional, and institutional case studies to conceptually and empirically describe real-life research in which the authors are engaged. Topics covered include the complexities of developing and managing multilingual resources; working in geographically isolated areas; curating combinations of local, regional, national, and international content collections; and understanding historical and contemporary colonial-industrial influences in indigenous knowledge. Library and Information Studies for Arctic Social Sciences and Humanities will be essential reading for academics, researchers, and students working the fields of library, archival, and information or data science, as well as those working in the humanities and social sciences more generally. It should also be of great interest to librarians, archivists, curators, and information or data professionals around the globe.

Proceedings of the Rochester Academy of Science Mar 17 2021 List of members in v. 1-2, 4.

Investigation of Governmental Organization for Space Activities Dec 14 2020 Reviews space program administration and coordination by NASA and DOD. Focuses on differing roles of NASA and DOD in the development of a space program. Includes report "Interdepartmental Coordination in the Federal Administration of Scientific and Technological Functions" by the Legislative Reference Service of the Library of Congress, 1959 (p. 661-745).

The Trouble with Science Sep 30 2019 Robin Dunbar asks whether science really is unique to Western culture, even to humankind. He suggests that our "trouble with science" may lie in the fact that evolution has left our minds better able to cope with day-to-day social interaction than with the complexities of the external world.
