5 Answers for Christians Today Oct 12 2020 CHRISTIANS HAVE QUESTIONS about so many issues today that pastors and Bible teachers can't sufficiently address them all at precisely the time an answer is needed. 5 Answers will give Christians a basic biblical perspective on some of these common issues, and it will provide any serious Bible student with ample resources for further research. Nathan is a faithful pastor and an excellent teacher. As a man who is truly interested in following God, he recognizes the importance of knowing and understanding what God has said. In this book he tackles five difficult questions, and skillfully guides us to biblically based answers. John Turpin, Author of the book Victorious Faith 5 Answers would be a useful tool for a pastor to give someone who has questions and wants to find answers through personal Bible study or in a small group setting. When I was younger in the faith I sought resources like this to help me nail down precisely what I believed. It is an easy, yet informative read. Jimmy Hazlett, Worship Pastor at New Hope Baptist Church in Moreland, KY Many Christians struggle and are in search of answers to tough questions in the Holy Scriptures. Nathan Garnett has made your research easier by dealing with the most problematic areas of biblical truth. Darrell H. Hahn, Hospice Chaplain Pastors and seminary students want our work, even our academic writing, to be beneficial to our own souls and also to our churches and families. Unfortunately, much of our academic work usually provides little direct benefit to those whom we care about the most. To resolve this deficiency, Nathan has re-cast the produce of some of his best research into a more user-friendly format. He has done this mainly with his family and church in his mind and on his heart. I think he's done us all a great service in the process. Chris Wilson, Pastor of Payneville Baptist Church in Payneville, KY

100 Days of Money, Fractions, & Telling the Time Oct 31 2019 100 days of practice counting money, learning fractions, and telling the time. Three core areas of math that students often need additional help to master. Start by counting groups of coins that have a value of a pound or less. Slowly learn to count greater amounts of money that include small and large notes too. Add and subtract values, and even learn to make change. Learn fractions one step at a time. Start with simple fractions and eventually learn to add and subtract mixed numbers. Telling the time is one of the more difficult concepts for children to learn. Gradually progress from learning to tell hours, to quarter hours. Eventually tell time in five minute and minute increments. This is a great workbook to start out with. Most students will grasp the concepts within each of the three sections. If a student still needs more practice, Humble Math has workbooks that provide additional practice for these concepts too.
