**Northeast American Sports Car Races 1950-1959** Aug 22 2021 This book focuses on the different aspects that contributed to the development of Northeast American sports car racing during the 1950s. The evolution from amateur drivers racing on public roads in 1950, to both professional and amateur drivers racing at private, purpose-built tracks in 1959, demanded huge leaps of faith, trust and understanding. The transition was neither easy nor uneventful for drivers, clubs or track owners, and the tragedy, politics and intrigue that came to characterize the period are covered here in fascinating detail.

**Ein Jahrhundert Automobiltechnik** Nov 05 2022 In "Ein Jahrhundert Automobiltechnik - Nutzfahrzeuge" beschreiben die Autoren die Entwicklung der Hauptbauelemente, zum Beispiel der Motoren und Getriebe, Fahrwerke, Aufbauten, Räder und Reifen. Dabei zeigen sie auch Irrwege auf und stellen bemerkenswerte Konstruktionen vor, denen trotz ihrer Vorzüge der Sprung in die Serienreife nicht gelang.

Sonderfahrzeuge werden beschrieben, auch solche, die nur als Einzelstücke oder in sehr geringer Stückzahl gebaut wurden. Die Probleme des Straßentransports und das Nutzfahrzeug der Zukunft sind weitere Themen. Zahlreiche Fotografien aus den "Kindertagen" des Nutzfahrzeugs und Farbbilder aus der jüngeren Zeit illustrieren das Buch; Konstruktionszeichnungen und Grafiken veranschaulichen die technischen Details.

**Human Memory** Sep 10 2020 Provides students with a guide to human memory, its properties, theories about how it works, and how studying it can help us understand who we are and why we do the things that we do. For undergraduate and graduate courses in Human Memory. This book provides a very broad range of topics covering more territory than most books. In addition to some coverage of basic issues of human memory and cognition that are of interest to researchers in the field, the chapters also cover issues that will be relevant to students with a range of interests including those students interested in clinical, social, and developmental psychology, as well as those planning on going on to medical and law schools. The writing is aimed at talking directly to students (as opposed to talking down to them) in a clear and effective manner. Not too dense, but also not too conversational as well. This 2nd edition includes a series of exercises that allow the student to try out the concepts and principles conveyed in the chapters, or to use as the basis for exploring their own ideas.

*Catalysis and Automotive Pollution Control II* Oct 04 2022 This volume constitutes the proceedings of the second symposium on Catalysis and Automotive Pollution Control. CAPoC 2 was a great success from the point of view of its scientific interest, as evidenced by the content of this book, and also from the high participation, some 260 scientists. About two-thirds of the contributors came from the industrial world, mainly the car and oil industries and catalyst manufacturers. This is ample proof that exhaust catalysis remains a major topic of interest. The first part of the book is a general introduction to the problem of automotive pollution. The second, strictly catalytic, part is devoted to fundamental and applied studies on pollution control, with emphasis on exhaust catalytic converters.
