[Working Without a Net](#) Dec 26 2019 In this book, Richard Foley defends an epistemology that takes seriously the perspectives of individual thinkers. He argues that having rational opinions is a matter of meeting our own internal standards rather than standards that are somehow imposed upon us from the outside. It is a matter of making ourselves invulnerable to intellectual self-criticism. Foley also shows how the theory of rational belief is part of a general theory of rationality. He thus avoids treating the rationality of belief as a fundamentally different kind of phenomenon from the rationality of decision or action. His approach generates promising suggestions about a wide range of issues, e.g., the distinction between epistemic and non-epistemic reasons for belief; the question of what aspects of the Cartesian project are still worth doing; the significance of simplicity and other theoretical virtues; the relevance of skeptical hypotheses; the difference between a theory of rational belief and a theory of knowledge; the difference between a theory of rational belief and a theory of rational degrees of belief; and the limits of idealization in epistemology. The book runs counter to a tendency in contemporary epistemology to discount the perspectives of individual thinkers. Endorsing a radically subjective conception of rational belief, *Working Without A Net* will interest students of philosophy, epistemology, and rationality.

The Development of Russian Evangelical Spirituality Jul 21 2019 Today, many evangelicals in the Russian-speaking world emphasize sanctification as a distinctive mark of their Christian faith. This is a unique characteristic, particularly in the European context. Their historic tapestry has been woven from a number of threads that originated in the second half of the nineteenth century. Missionary efforts of the German Baptists, a revival sparked by a British evangelist, and a pietistic awakening among the Mennonites in the South converged to form a tapestry that displays Protestant, Baptist, and Anabaptist heritage. Ivan Kargel uniquely participated in the formation and ministry of each of these threads. His life spans from Tsarist Russia to the Soviet Union. Kargel refused to adhere to a systematic view of theology. Instead, he urged believers to go to Scripture and draw from the riches of a life united with Christ. Kargel's influence today is keenly felt across the Russian-speaking evangelical world as they seek to identify the roots of their spiritual identity. This book examines the influences on Ivan Kargel and offers insights into how his life and work are expressed in the tapestry of Russian evangelical spirituality.

Speaking of Equality Aug 22 2019 Aristotle noted that "equality" is the plea not of those who are satisfied but of those who seek change, and the word has long been invoked in the name of social reform. It retains its force because arguments for equality put arguments for inequality on the defensive. But why is "equality" laudatory and "inequality" pejorative? In this first book-length analysis of the rhetorical force of equality arguments, Peter Westen argues that they derive their persuasiveness largely from the kind of word that "equality" is, rather than from the values it incorporates. By focusing on ordinary language and using commonplace examples from law and morals, Westen argues that equality is a single concept that lends itself to a multiplicity of conceptions by virtue of its capacity to incorporate diverse standards of comparison by reference. Equality arguments draw rhetorical force in part from their tendency to mask the standards of comparison on which they are based, and in so doing to confound fact with value, premises with conclusions, and uncontested with contested norms. East Goes West Apr 22 2022 "A wonderfully resplendent evocation of a newcomer's America" (Chang-rae Lee, author of Native Speaker) by the father of Korean American literature A Penguin Classic Having fled Japanese-occupied Korea for the gleaming promise of the United States with nothing but four dollars and a suitcase full of Shakespeare to his name, the young, idealistic Chungpa Han arrives in a New York teeming with expatriates, businessmen, students, scholars, and indigents. Struggling to support his studies, he travels throughout the United States and Canada, becoming by turns a traveling salesman, a domestic worker, and a farmer, and observing along the way the idealism, greed, and shifting values of the industrializing twentieth century. Part picaresque adventure, part shrewd social commentary, East Goes West casts a sharply satirical eye on the demands and perils of assimilation. It is a masterpiece not only of Asian American literature but also of American literature.
