Greene's Infectious Diseases of the Dog and Cat - E-Book Jan 11 2021 Greene's Infectious Diseases of the Dog and Cat, 5th Edition provides a comprehensive, clinically useful reference on the management of infectious diseases caused by viruses, bacteria (including rickettsiae, chlamydiae, mycoplasmas, and spirochetes), fungi, algae, protozoa, parasites, and other atypical agents. Each section guides the reader through diagnostic testing for specific infectious diseases, from specimen collection to laboratory submission to interpretation of results to appropriate treatment measures. Full-color illustrations and hundreds of tables provide convenient access to diagnostic and therapeutic recommendations, along with the appropriate drug dosages for effective treatment and prevention. A fully searchable enhanced eBook version is included with print purchase, allowing access to all of the text and figures on a variety of digital devices. More than 150 internationally recognized experts contribute chapters on topics in their field of specialty. Clear and logical organization of chapters provides a solid basis for an approach to diseases caused by specific pathogens, with the first part of the book including sections on diagnostic approaches, treatments (including recommended antimicrobial drug doses), and prevention. Specific pathogens are addressed in the second part of the book, using a structured approach that includes etiology/epidemiology (relevance to wildlife animal hosts, role of the environment),

clinical and laboratory findings, treatment, prevention, and public health implications. Case examples illustrate principles and highlight how the material can be applied. More than 800 clinical images, maps, life cycles, and photomicrographs assist with accurate understanding of epidemiology, pathogenesis, diagnosis of disease, and disease prevention. Visually appealing maps and life-cycle drawings enhance your comprehension and retention of the material. Convenient drug dosage tables in each chapter provide complete prescribing information; chapters on antimicrobial drugs in the first part of the book summarize pharmacokinetics, indications, contraindications, handling and administration guidelines; and dosage recommendations are made for antivirals, antibacterials, antifungals, antiprotozoals, and antiparasitic drugs. The book emphasizes approaches to optimize antimicrobial stewardship. Clinical Problems section helps you understand what infectious diseases should be considered in animals seen with clinical signs relating to different organ systems. Suggested readings and references are listed in each chapter, facilitating further research and study. Fully searchable enhanced eBook version is included with print purchase, allowing access to all of the text and figures on a variety of digital devices.

Adjektivderivation in der Urkundensprache des 13. Jahrhunderts Apr 25 2022 Die Beiträge bieten neue Erkenntnisse über das bisher weitgehend unerforschte Wortbildungssystem des Mittelhochdeutschen. Nach den Methoden der historisch-synchronen Wortbildungsanalyse wird die nominale Derivation (Substantivsuffigierung, Adjektivsuffigierung/-präfigierung) auf der Grundlage des „Corpus der altdeutschen Originalurkunden“ untersucht. Die systematisch erfassten Ableitungen werden morphologisch und semantisch-funktional unter Berücksichtigung ihrer sprachgeographischen Verteilung analysiert. Daraus resultiert die exemplarische Darstellung des Wortbildungssystems der deutschen Urkundensprache des 13. Jahrhunderts. Die Ergebnisse werden in einem morphologisch-semasiologischen und einem onomasiologischen Teil präsentiert. Die synchrone Analyse wird durch eine diachrone Einordnung des Befunds ergänzt, die sich aus dem Vergleich mit den Systemen der späteren Sprachstufen (Frühneuhochdeutsch, geschriebene/gesprochene Gegenwartssprache) ergibt. So wird ein Überblick über Wandel und Konstanz im deutschen Wortbildungssystem erreicht. Die detaillierte Darstellung der Lexeme und die Ergebnisse zu Korrespondenz und Konvergenz wortgebildeter Wörter im Korpus

stellt zudem einen Beitrag zur mhd. Lexikologie dar.

Social Learning and Innovation in Contemporary Hunter-Gatherers Apr 13 2021 This is the first book to examine social learning and innovation in hunter–gatherers from around the world. More is known about social learning in chimpanzees and nonhuman primates than is known about social learning in hunter–gatherers, a way of life that characterized most of human history. The book describes diverse patterns of learning and teaching behaviors in contemporary hunter–gatherers from the perspectives of cultural anthropology, ecological anthropology, biological anthropology, and developmental psychology. The book addresses several theoretical issues including the learning hypothesis which suggests that the fate of *Homo sapiens* and Neanderthals in the last glacial period might have been due to the differences in learning ability. It has been unequivocally claimed that social learning is intrinsically important for human beings; however, the characteristics of human learning remain under a dense fog despite innumerable studies with children from urban–industrial cultures. Controversy continues on problems such as: do hunter–gatherers teach? If so, what types of teaching occur, who does it, how often, under what contexts, and so on. The book explores the most basic and intrinsic aspects of social learning as well as the foundation of innovative activities in everyday activities of contemporary hunter–gatherer people

across the earth. The book examines how hunter-gatherer core values, such as gender and age egalitarianism and extensive sharing of food and childcare are transmitted and acquired by children. Chapters are grouped into five sections: 1) theoretical perspectives of learning in hunter-gatherers, 2) modes and processes of social learning in hunter-gatherers, 3) innovation and cumulative culture, 4) play and other cultural contexts of social learning and innovation, 5) biological contexts of learning and innovation. Ideas and concepts based on the data gathered through an intensive fieldwork by the authors will give much insight into the mechanisms and meanings of learning and education in modern humans.

Organometallic Chemistry Jun 03 2020 Organometallic chemistry is an interdisciplinary science which continues to grow at a rapid pace. Although there is continued interest in synthetic and structural studies the last decade has seen a growing interest in the potential of organometallic chemistry to provide answers to problems in catalysis synthetic organic chemistry and also in the development of new materials. This Specialist Periodical Report aims to reflect these current interests reviewing progress in theoretical organometallic chemistry, main group chemistry, the lanthanides and all aspects of transition metal chemistry. Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research. Written by experts in their specialist fields the series creates a unique service for the active research chemist, supplying regular critical in-depth accounts of progress in particular areas of chemistry. For over 80 years the Royal Society of Chemistry and its predecessor, the Chemical Society, have been publishing reports charting developments in chemistry, which originally took the form of Annual Reports. However, by 1967 the whole spectrum of chemistry could no longer be contained

within one volume and the series Specialist Periodical Reports was born. The Annual Reports themselves still existed but were divided into two, and subsequently three, volumes covering Inorganic, Organic and Physical Chemistry. For more general coverage of the highlights in chemistry they remain a 'must'. Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry. Some titles have remained unchanged, while others have altered their emphasis along with their titles; some have been combined under a new name whereas others have had to be discontinued. The current list of Specialist Periodical Reports can be seen on the inside flap of this volume.

Heimkehren Sep 30 2022 Obwohl Effia und Esi Schwestern sind, lernen sie sich nie kennen, denn ihre Lebenswege verlaufen von Anfang an getrennt. Im Ghana des 18. Jahrhunderts heiratet Effia einen Engländer, der im Sklavenhandel zu Reichtum und Macht gelangt. Esi dagegen wird als Sklavin nach Amerika verkauft. Während Effias Nachkommen über Jahrhunderte Opfer oder Profiteure des Sklavenhandels werden, kämpfen Esis Kinder und Kindeskinde ums Überleben: auf den Plantagen der Südstaaten, während des Amerikanischen Bürgerkrieges, der Großen Migration, in den Kohleminen Alabamas und dann, im 20. Jahrhundert, in den Jazzclubs und Drogenhäusern Harlems. Hat die vorerst letzte Generation schließlich die Chance, einen Platz in der Gesellschaft zu finden, den sie Heimat nennen kann und wo man

nicht als Menschen zweiter Klasse angesehen wird? Mit einer enormen erzählerischen Kraft zeichnet Yaa Gyasi die Wege der Frauen und ihrer Nachkommen über Generationen bis in die Gegenwart hinein. ›Heimkehren‹ ist ein bewegendes Stück Literatur von beeindruckender politischer Aktualität. New-York-Times-Bestseller **Die Erben des Malcolm X** Jun 15 2021 Seit dem 19. Jahrhundert finden Afroamerikaner im Islam eine attraktive Alternative zum Christentum. Prominente Konvertiten wie Malcolm X und Muhammad Ali sind Ikonen eines Islam, der auf Selbstdisziplinierung und Aufstiegswillen setzt. Anhand ethnographischer Quellen und deren Einordnung in sozialwissenschaftliche Diskurse zu US-Geschichte und Gesellschaft zeigt Katrin Simon auf eindrückliche Weise, dass der »Black Islam« ein eigenständiges Phänomen ist, der sich vom Islam der Einwanderer unterscheidet. So entsteht ein einmaliger Blick in ein Amerika, in dem Ghetto-Imame und verschleierte Feministinnen gegen Rassismus auch in den eigenen Reihen kämpfen.

Invasive Species May 15 2021 With climate change and increasing globalisation of trade and travel, the risks presented by invasive pests and pathogens to natural environments, agriculture and economies have never been greater, and are only increasing with time. Governments world-wide are responding to these increased threats by strengthening quarantine and biosecurity. This book presents a comprehensive review of risk-based techniques that help policy makers and regulators protect national interests from invasive pests and pathogens before, at, and inside national borders. Selected from the research corpus of the Centre of Excellence for Biosecurity Risk Analysis at the University of Melbourne, this book provides solutions that reflect scientific rigour coupled with practical, hands-on applications. Focusing on

surveillance, stochastic modelling, intelligence gathering, decision making and risk communication, the contents combine the strengths of risk analysts, mathematicians, economists, biologists and statisticians. The book presents tested scientific solutions to the greatest challenges faced by quarantine and biosecurity policy makers and regulators today.
