**Teaching about Gender Diversity: Teacher-Tested Lesson Plans for K–12 Classrooms** Nov 01 2022 Featuring lesson plans by educators from across North America, Teaching about Gender Diversity provides K–12 teachers with the tools to talk to their students about gender and sex, implement gender diversity–inclusive practices into their curriculum, and foster a classroom that welcomes all possible ways of living gender. The collection is divided into three sections dedicated to the elementary, middle, and secondary grade levels, with each containing teacher-tested lesson plans for a variety of subject areas, including English language arts, the sciences, and health and physical education. The lesson plans range widely in terms of grade and subject, from early literacy read-alouds to secondary mathematics. Written by teachers for teachers, this engaging collection highlights educators' varied perspectives and specialized knowledge of pedagogical practices for the diverse contemporary classroom. Teaching about Gender Diversity is an ideal resource for teacher educators, teachers, and students taking education courses on equity, diversity, and social justice as well as curriculum and teaching methods. Visit the book's companion website at [teachingaboutgenderdiversity.com](http://teachingaboutgenderdiversity.com).

**Intro to Speleology & Paleontology Parent Lesson Plan** Aug 06 2020 Introduction to Speleology and Paleontology Course Description This is the suggested course sequence that allows one core area of science to be studied per semester. You can change the sequence of the semesters per the needs or interests of your student; materials for each semester are independent of one another to allow flexibility. Semester 1: Speleology Explore deep into the hidden wonders beneath the surface as cave expert Dr. Emil Silvestru takes you on an illuminating and educational journey through the mysterious world of caves. Discover the beautiful, thriving ecology, unique animals, and fragile balance of this little-seen ecosystem in caves from around the globe. The Cave Book will teach you about: a creationary model for how caves form, a history of how caves have been used by humans for shelter and worship, how old caves really are, the surprising world of Neanderthals and their connection to modern humans, how to make a stone axe and about early tools, just how long it really takes for cave formations to form, unusual animals that make caves their home, examples of how connected caves are to mythology of many cultures, the climate and geologic processes and features of caves and karst rocks, the process by which ice caves form, exploration, hazards, and record-setting caves, how caves form, and features above and below the surface. Filled with beautiful and fascinating color photos of caves from around the world. The Cave Book is a wonderful guide to this hidden world of wonder. Enjoy learning on your journey of exploration into these exciting and mysterious places underground! Semester 2: Paleontology Fossils have fascinated humans for centuries. From the smallest diatoms to the largest dinosaurs, finding a fossil is an exciting and rewarding experience. But where did they come from, and how long have they been around? These and many other questions are answered in this remarkable book. The Fossil Book will teach you about: the origin of fossils, how to start your own fossil collection, what kinds of fossils can be commonly found, the age of fossils, how scientists find and preserve fossils, how to identify kinds of fossils, how the Flood affected fossil formation, the Geologic Column Diagram, the difference between evolutionists' and creationists' views on fossils, the "four Cs" of biblical creation, the different kinds of rocks fossils are found in, coal and oil formation. Learning about fossils, their origins, and how to collect them can be both fun and educational. The abundance of both marine and land fossils and the locations they are found in is a fascinating subject for students of all ages and has been studied by scientists and layperson alike for many years.

**Cognitive Remediation for Successful Employment and Psychiatric Recovery** May 03 2020 "The TSW program is an evidence-based intervention that enhances people's cognitive functioning in order to help them get and keep competitive jobs. This book explains how to provide the TSW program, and includes materials for implementing it, such as educational handouts and assessment tools. In addition, the book contains a wealth of information about overcoming common cognitive obstacles to steady employment that may be useful to the broad range of professionals helping individuals return to work"--

**WINGS Lesson Plan Guide for Preschoolers** Mar 25 2022 WINGS Lesson Plan Guide for Preschoolers offers inclusive learning experiences developmentally and culturally appropriate for infants and children up to age 5 for early educators to implement while children are learning in or out of brick and mortar classrooms. Written by a highly qualified, diversely experienced veteran early educator, the WINGS Curriculum Lesson Plan Guide for Preschoolers offers 12 months of complete lesson plans for children ages 3-5, each based on a monthly theme. Each monthly lesson plan includes standards-based activities for individualized/developmental play, small-groups, large groups, learning centers, outdoor play, story time, music and movement, computer games, and more. With practical, yet progressive lesson plans for the entire calendar year, this book is ideal for every early educator seeking to nurture the abilities of preschoolers in each developmental domain! Activities are coded with WINGS Curriculum Goals & Skills, which are aligned with Common Core Standards for Kindergarten.

**Leadership Education and Training (LET) 2** Oct 08 2020

**The Empower Program, K–2** Mar 01 2020 Let's face it—teaching can be stressful. In this generation of Common Core Standards and high-stakes testing, educators are often left without the time to plan positive behavioral supports or the sanity to cultivate compassionate relationships with their students. Even though they understand the critical relationship between behavior and instruction, they're often left with the same hair-pulling question: How can I empower—rather than overpower—my students, while still keeping a controlled classroom so that I can teach and students can learn? The "Empower Program" delivers user-friendly strategies that are realistic for educators to implement and practical for their students to use. Included are: Classroom Scenarios "When this happens..." Research and Relevancy "Why did that happen..." Concrete Strategies "What can I do?" Ready-to-go Resources "How can I do this tomorrow?" This book is not going to antagonize teachers with theoretical concepts in ideal contexts; it is instead going to respect teachers and their classroom frustrations and provide them with practical steps that make buzzwords like "behavior management"...well...manageable.

**The Substitute Teaching Survival Guide, Grades 6-12** Nov 08 2020 Presents suggestions and advice for substitute teachers along with emergency lesson plans for language arts, mathematics, science, and social studies.

**Teaching in K-12 Schools** Sep 06 2020 Well known for its emphasis on reflection, this extremely accessible K-12 general methods text has updated its model for reflective planning in teaching to better illustrate the connection between planning and professional standards. In addition to reflective teaching, this edition explores classroom management, diversity, standards, curriculum and lesson planning, active and authentic learning, technology in education, assessment, and working in the school community. Because this edition also pays specific attention to INTASC, NBPTS, curriculum standards, and Praxis II, readers will gain confidence as they prepare for a career in teaching.

**Life Orientation Gr12 T/g** Jul 29 2022

**Skills for Life** Oct 27 2019 Offers school libraries new ways to teach traditional skills and master new information technology such as CD-ROM, online databases, multimedia, video, and interactive laser disks.

**Lesson Planning For Effective Learning** Mar 13 2021 This book is about lesson planning which is an essential component of every teacher's practice.

**Succeeding in the Inclusive Classroom** Apr 25 2022 Ideal for Introduction to Special Education/Introduction to Exceptionalities courses, this supplementary text provides strategies pre-service and in-service teachers can use to apply the principles of Universal Design for Learning (UDL) to their lesson planning. UDL lesson planning considers "up front" potential barriers that could limit access to instruction for some learners and helps teachers brainstorm possible solutions before lessons begin. The lessons included in this text are meant as a starting point for general education teachers who have students with special needs in their classrooms and can be adapted for K-12 learners with a wide range of challenges. Metcalf provides one lesson plan at the elementary school level and one at the secondary level for each area of exceptionality.

**Lesson Planning for Skills-Based Health Education** Jul 25 2019 Lesson Planning for Skills-Based Health Education offers 64 field-tested lesson plans, learning activities, and assessments for implementing a skills-based approach in your class. The curriculum is flexible and adaptable, and it addresses all the skills in the National Health Education Standards.

**Advanced Pre-Med Studies Parent Lesson Plan** Dec 10 2020 Advanced Pre-Med Studies Course Description Semester 1: From surgery to vaccines, man has made great strides in the field of medicine. Quality of life has improved dramatically in the last few decades alone, and the future is bright. But students must not forget that God provided humans with minds and resources to bring about these advances. A biblical perspective of healing and the use of medicine provides the best foundation for treating diseases and injury. In Exploring the History of Medicine, author John Hudson Tiner reveals the spectacular discoveries that started with men and women who used their abilities to better mankind and give glory to God. The fascinating history of medicine comes alive in this book, providing students with a healthy dose of facts, mini-biographies, and vintage illustrations. It seems that a new and more terrible disease is touted on the news almost daily. The spread of these scary diseases from bird flu to SARS to AIDS is a cause for concern and leads to questions such as: Where did all these germs come from, and how do they fit into a biblical world view? What kind of function did these microbes have before the Fall? Does antibiotic resistance in bacteria prove evolution? How can something so small have such a huge, deadly impact on the world around us? Professor Alan Gillen sheds light on these and many other questions in The Genesis of Germs. He shows how these constantly mutating diseases are proof for devolution rather than evolution and how all of these germs fit into a biblical world view. Dr. Gillen

shows how germs are symptomatic of the literal Fall and Curse of creation as a result of man's sin and the hope we have in the coming of Jesus Christ. Semester 2: *Body by Design* defines the basic anatomy and physiology in each of 11 body systems from a creationist viewpoint. Every chapter explores the wonder, beauty, and creation of the human body, giving evidence for creation, while exposing faulty evolutionist reasoning. Special explorations into each body system look closely at disease aspects, current events, and discoveries, while profiling the classic and contemporary scientists and physicians who have made remarkable breakthroughs in studies of the different areas of the human body. Within *Building Blocks in Life Science* you will discover exceptional insights and clarity to patterns of order in living things, including the promise of healing and new birth in Christ. Study numerous ways to refute the evolutionary worldview that life simply evolved by chance over millions of years. The evolutionary worldview can be found filtered through every topic at every age-level in our society. It has become the overwhelmingly accepted paradigm for the origins of life as taught in all secular institutions. This dynamic education resource helps young people not only learn science from a biblical perspective, but also helps them know how to defend their faith in the process.

**Powerful Lesson Planning** Jan 23 2022 Guide to teaching and creating lesson plans Covers four types of instructional design Useful for teachers with all levels of experience Have you ever wondered how to maximize your lesson plans? Do you want to get the most out of every minute that you teach? *Powerful Lesson Planning: Every Teacher's Guide to Effective Instruction* will help you accomplish those goals. This book includes summaries of basic instructional design, integrated instructional design, differentiated instructional design, and problem-based learning instructional design. It shares different teaching strategies and is especially helpful for beginner teachers. This guide emphasizes the decisions that teachers make as they plan lessons and classes. It includes descriptive information, tools, and several examples to help every teacher make their lesson plans well.

**Becoming an Outstanding English Teacher** Jun 03 2020 *Becoming an Outstanding English Teacher* supports all English teachers in offering a wide range of approaches to teaching and learning that will stimulate and engage students in studying English. It offers practical strategies that can be used instantly in English lessons. The topics offer examples for questioning, differentiation and assessing progress. Some of the ideas have also been incorporated into lesson plans using texts from the revised English National Curriculum. With a strong focus on creativity and engagement, this book covers: promoting thinking and independent learning skills in students methods to check learning rather than doing in the classroom techniques for personalising learning for students creating an environment for behaviour for learning. Fully up to date with the National Curriculum guidelines and packed with practical strategies and activities that are easily accessible, this book will be an essential resource for all English teachers who are aiming to deliver outstanding teaching and learning continuously in their classrooms.

**Concepts of Mathematics & Physics Parent Lesson Plan** Oct 20 2021 *Concepts of Mathematics and Physics Course Description* This is the suggested course sequence that allows one core area of science to be studied per semester. You can change the sequence of the semesters per the needs or interests of your student; materials for each semester are independent of one another to allow flexibility. Semester 1: *Mathematics Numbers surround us. Just try to make it through a day without using any. It's impossible: telephone numbers, calendars, volume settings, shoe sizes, speed limits, weights, street numbers, microwave timers, TV channels, and the list goes on and on. The many advancements and branches of mathematics were developed through the centuries as people encountered problems and relied upon math to solve them. It's amazing how ten simple digits can be used in an endless number of ways to benefit man. The development of these ten digits and their many uses is the fascinating story in Exploring the World of Mathematics.* Semester 2: *Physics Physics is a branch of science that many people consider to be too complicated to understand. John Hudson Tiner puts this myth to rest as he explains the fascinating world of physics in a way that students can comprehend. Did you know that a feather and a lump of lead will fall at the same rate in a vacuum? Learn about the history of physics from Aristotle to Galileo to Isaac Newton to the latest advances. Discover how the laws of motion and gravity affect everything from the normal activities of everyday life to launching rockets into space. Learn about the effects of inertia firsthand during fun and informative experiments. Exploring the World of Physics is a great tool for students who want to have a deeper understanding of the important and interesting ways that physics affects our lives.*

**From Lesson Plans to Power Struggles, Grades 6–12** Sep 30 2022 Straight talk about classroom management from new teachers who have developed solutions! Offering authentic stories from novice secondary school teachers in urban, suburban, and rural districts with diverse students, this practical guide illustrates how new teachers can benefit from the experiences of their peers to resolve common classroom challenges. The author provides instructional and disciplinary cases, plus an expert analysis of each teacher's successful strategies. The book includes: A table of contents with specific instructional/discipline topics for easy reference Ways to identify when problems are related to lesson delivery or discipline A glossary of terms and a resource list for detailed information

**Common Core Literacy Lesson Plans** Jul 17 2021 Schools nationwide are transitioning to the Common Core--our advice to you: Don't go it alone! Our new book, *Common Core Literacy Lesson Plans: Ready-to-Use Resources, K-5*, shows you that teaching the Common Core State Standards in the elementary grades doesn't have to be intimidating! This easy-to-use guide provides model lesson plans for teaching the standards in reading, writing, speaking/listening, and language. Get engaging lesson plans that are grade-appropriate, easy to implement and include ready-to-use reproducible handouts, assessments, resources, and ideas to help you modify the lesson for both struggling and advanced learners. Our Common Core Literacy Lesson Plans are designed to fit seamlessly into your K-5 curriculum. You get practical tips for revamping your existing lessons to meet the standards. Students learn how to read informational texts, write opinion-based essays, and improve their speaking and listening skills. Grammar mini-lessons and foundational skills mini-lessons will help you teach language conventions, phonics, fluency, and more! We take the guesswork out of Common Core lesson plans with this practical, easy-to-use guide. All lesson plans are grade-appropriate, and every lesson plan includes... Common Core State Standards covered in the lesson Overview of objectives and focus of the lesson Background knowledge required and time required A detailed, step-by-step agenda for the lesson, plus a materials list Differentiation ideas to adapt the lesson for different kinds of learners Assessment ideas, including rubrics and scoring guides A place for your notes: what worked; what can improve Bonus! We show you how to extend the lessons into longer units to suit your particular grade's curriculum, and even help you create more of your own lessons!

**85 ESL Grammar Lesson Plans** Dec 22 2021 This book contains 85 complete lesson plans that cover all the essential English grammar. Are you a new teacher, perhaps going abroad? Are you a substitute teacher who is given a class at short notice? Are you a non-native speaker who needs help to explain grammar? Are you a more experienced teacher who doesn't want to prepare lessons anymore? If the answer to any of these questions is yes, then this is the book you're looking for. The methodology is simple and effective. 1 Written lesson plan (for blackboard) 2 How to teach each lesson 3 Oral practice drills for each lesson 4 Homework suggestions 5 Daily review In addition, there are Oral Verb Drills and Written Verb Review exercises. This book, for teachers, can be used to teach beginner, intermediate and advanced students.

**Complete Physical Education Plans for Grades 5 to 12** Jun 27 2022 "This popular book provides loads of teacher-tested lesson plans and assessment tools that will decrease your preparation time and increase your students' competency. After listening to requests of the first edition's users, the author has packed two more popular field sports and a unique chapter on educational gymnastics into this new edition of *Complete Physical Education Plans for Grades 5 to 12*. Lessons can cover beginner, intermediate, and advanced levels and break down each skill as it is introduced. The chapters also integrate the applicable rules and strategies during the learning process and use methods that will keep students active, learning, successful, and completely motivated. In addition to the clear instruction for teaching skills, rules, and strategies, each lesson generates opportunities for students to develop physical, cognitive, and social skills. Each unit is designed to help students gain competency appropriate for their experience level. Formerly published as *Complete Physical Education Plans for Grades 7 to 12*, the book features exciting new material: Detailed introductions of skills and how to practice the mechanics of each skill or dance; Three new chapters (field hockey, lacrosse, and educational gymnastics, the latter of which includes three units that can be used in teaching both gymnastics and creative dance). *Complete Physical Education Plans for Grades 5 to 12* provides field-tested lesson plans for 484 classes covering 18 areas of fitness, creative movement and dance, and sports. These professionally prepared plans will not only cut your own prep time but also help you focus on the essentials in each step of your students' learning process. It is a great resource when you need material for a substitute teacher or when you are asked to submit plans to your school administrator. In addition to the lesson plans, the book and CD-ROM package contains a wealth of teaching and assessment tools, including skills rubrics, portfolio checklists, unit fact sheets, and quizzes. The accompanying CD-ROM enables you to print study sheets, student extension projects, portfolio checklists, unit quizzes, and answer keys. You can also print out any page of the text from the CD-ROM (e.g., lessons, full units, tests)."--Publisher's website.

**WINGS Lesson Plan Guide for Infants** Aug 30 2022 *WINGS Lesson Plan Guides* offer inclusive learning experiences developmentally and culturally appropriate for infants and children up to age 5 for early educators to implement while children are learning in or out of brick and mortar classrooms. Written by a highly qualified, diversely experienced veteran early educator, the *WINGS Curriculum Lesson Plan Guide for Infants* offers 12 months of complete lesson plans for babies up to age 1, each based on a monthly theme. Each monthly lesson plan includes standards-based activities for individualized/developmental play, small-groups, large groups, learning centers, outdoor play, story time, music and movement, computer games, and more. With practical, yet progressive lesson plans for the entire calendar year, this book is ideal for every early educator seeking to nurture the abilities of infants in each developmental domain! Activities are coded with *WINGS Curriculum Goals & Skills*, which are aligned with Common Core Standards for Kindergarten.

**Math Phonics - Addition & Subtraction (eBook)** Jul 05 2020 A specially designed program using rules, patterns and memory techniques similar to those found in language arts to teach difficult math concepts to children. This book contains 10 all new lesson plans, including worksheets, take-home pages, assessment pages and a variety of support materials to teach addition and subtraction.

**Studies in World History Volume 1 (Teacher Guide)** Sep 26 2019 Teacher guides include insights, helps, and weekly exams, as well as answer keys to easily grade course materials! Help make your educational program better - use a convenient teacher guide to have tests, answer keys, and concepts! An essential addition for your coursework - team your student book with his convenient teacher guide filled with testing materials, chapter helps, and essential ways to extend the learning program.

**Ready-To-Use Social Skills Lessons and Activities for Grades 7 - 12** Jan 11 2021 This unique Library gives teachers and specialists a stimulating, systematic way to develop positive social behaviors in students of all abilities, grades 4-12. Included are over 125 tested lessons and reproducible worksheets in two separately printed, self-contained volumes, each tailored to the developmental needs of students at a particular grade level, 4-6 or 7-12. For easy use, the lessons in each volume follow a uniform format, including titles, behavioral objective, and simple 8-step lesson plan. The lesson activities and worksheets are based on real-life situations and help build students' self-esteem, self-control, and respect for the rights of others.

**Early Learning Thematic Lesson Plans, Grades PK - 1** May 15 2021 Encourage a love of learning in students in grades PK-1 with *Early Learning Thematic Lesson Plans*! This 160-page resource engages young learners with 32 weekly themes and more than 600 developmentally appropriate activities. All of the research, planning, and scheduling has already been

done. Just open the book, choose a theme, and start teaching! The book includes morning circle activities, a guide to children's literature, and integrated activities. This book supports NCTE, NCTM, NCSS, and NAEYC standards.

**Lesson Planning** Aug 18 2021 Are you looking to construct a lesson plan that will help K-12 students master new content, concepts, and skills? *Lesson Planning: A Research-based Model for K-12 Classrooms* can help by guiding you in the selection of research-based instructional strategies and types of materials designed to consider all learners' needs. Part I establishes the theoretical foundations of the ideas used in the lesson planning process. Part II is a step-by-step guide to developing direct and inquiry-based lesson plans. Meeting the Needs of all learners - woven throughout each chapter, the authors address the diverse needs of students. INTASC Standards Correlation Guide appears on the inside front cover to help readers quickly identify the lessons that meet each standard. Connections to the INTASC Standards are woven throughout each chapter's content and activities. Unit Connections explain how the chapter's content is used in the development of a unit Technology in Education (TiE) - a feature throughout the book provide practical help in the lesson planning process including rubric generating sites, lesson plan templates, ideas for lesson activities, and links to useful classroom materials. Reality Check, a feature in each chapter, provides advice from practicing classroom teachers who represent a range of subjects and grade levels. Your Turn feature at the end of each chapter helps you create your own standards-based lesson plan in both direct and indirect instruction formats.

**Teacher Lesson Planner, Undated 12 Months 52 Weeks for Lesson Planning, Time Management & Classroom Organization** Jan 29 2020 The Perfect Undated Teacher Lesson Planner Our beautifully designed, simple but super functional teacher planners are thoughtfully designed UNDATED so you can start with any month or week you'd like, skip months if needed, and never waste a single page! Featuring 12 undated two-page monthly calendar spreads for the perfect overview at the beginning of each month, and 52 two-page weekly spreads with each day laid out in 7 vertical time blocks. **Concepts of Medicine & Biology Parent Lesson Plan** Sep 18 2021 **Concepts of Medicine and Biology Course Description** This is the suggested course sequence that allows one core area of science to be studied per semester. You can change the sequence of the semesters per the needs or interests of your student; materials for each semester are independent of one another to allow flexibility. Semester 1: **Medicine** From surgery to vaccines, man has made great strides in the field of medicine. Quality of life has improved dramatically in the last few decades alone, and the future is bright. But students must not forget that God provided humans with minds and resources to bring about these advances. A biblical perspective of healing and the use of medicine provides the best foundation for treating diseases and injury. In *Exploring the History of Medicine*, author John Hudson Tiner reveals the spectacular discoveries that started with men and women who used their abilities to better mankind and give glory to God. The fascinating history of medicine comes alive in this book, providing students with a healthy dose of facts, mini-biographies, and vintage illustrations. Semester 2: **Biology** The field of biology focuses on living things, from the smallest microscopic protozoa to the largest mammal. In this book you will read and explore the life of plants, insects, spiders and other arachnids, life in water, reptiles, birds, and mammals, highlighting God's amazing creation. You will learn about biological classification, how seeds spread around the world, long-term storage of energy, how biologists learned how the stomach digested food, the plant that gave George de Mestral the idea of Velcro, and so much more. For most of history, biologists used the visible appearance of plants or animals to classify them. They grouped plants or animals with similar-looking features into families. Starting in the 1990's, biologists have extracted DNA and RNA from cells as a guide to how plants or animals should be grouped. Like visual structures, these reveal the underlying design of creation. *Exploring the World of Biology* is a fascinating look at life-from the smallest proteins and spores, to the complex life systems of humans and animals.

**Teaching Drama to Little Ones** Apr 13 2021 Do you find it difficult to find drama activities for preschool age children? Teaching theatre to very young children is a completely different experience than working with older kids. Their attention spans are shorter and they require games that are simple, short and active...but also provide them with the skills necessary to grow as an actor. *Teaching Drama to Little Ones* is packed with activities that do just that. It includes 12 lesson plans specifically designed for kids age 3-7 that you can implement today. It also includes guides on how to adapt a script and rehearse a show with this age group. Inside this book you'll find: 12 lessons plans packed with over 70 activities ideal for kids age 3-7 Each lesson contains a Warm-Up, Focus, Voice, Movement and Imagination activity Simple reflection questions after every lesson A guide to creating a script for little ones A guide to auditioning, rehearsing and performance tips for little ones An appendix with lyrics of simple songs for classroom use Below are just a few of the topics covered in the lessons: **Getting to Know You.** Students will feel comfortable in a new environment, realizing that theatre class is a place where they can make new friends while learning how to sing, dance, and act. **Make Believe.** Students will use their imaginations to be different characters and go on make believe adventures. **Working with a Partner.** Students will build trust and gain confidence by learning to work with a partner. **Working as a Team.** Students will realize that theater involves teamwork and everyone has a role with something important to contribute. **Rhythm.** Students will understand rhythm, be able to clap and follow a steady beat, and practice speeding up and slowing down their voices and movements. **Energy.** Students will explore how energy is necessary when performing and learn how to control and focus using that energy. **Emotions.** Students will explore how we use emotions to show the audience what we are feeling. **Actions.** Students will use movement to learn the basic concepts of blocking, choreography, and stage directions. **Becoming a Character.** Students will become familiar with the practice of pretending to be different characters. **Using Your Voice.** Students will understand why projection and diction are necessary while singing and acting. **Acting Is Reacting.** Students will understand that listening and reacting are just as important as speaking. **Putting it Together.** Students will learn how their newly developed acting skills fit together as they prepare for a final presentation or show.

**School Days Lesson Plan Book** Dec 30 2019 Featuring the artwork of Debbie Mumm, this lesson plan book covers a 40-week school year. Each weekly schedule is shown on a two-page, Monday through Friday calendar. Extras include substitute teacher information, student roster, seating chart, and information on standards. 8-1/2" x 11". Spiral-bound.
