[Philosophical Thinking about Death and Dying](#) Aug 14 2021 Plainly written, with timely illustrations and references, PHILOSOPHICAL THINKING ABOUT DEATH AND DYING introduces students to all the major metaphysical and ethical issues concerning

death and dying. What exactly is death? What are the implications of knowing that we will die? Is death bad and the fear of it rational? Does life continue after bodily death? Does parapsychological research support life after death? How much control should we have over our own deaths? Can we ever have a duty to die? What's the relation between death and life? Such questions are organized around three themes: the nature of death, life after death, and voluntary death. Braced with a solid introduction and conclusion?the former prompted by Tolstoy's THE DEATH OF IVAN ILYICH, the latter by the modern challenge of nihilism?the text's twelve trim chapters provide students a concise and sturdy guide to the basic problems of both the nature of death and end-of-life decisions.

Death and Dying in New Mexico Jan 27 2020 In this exploration of how people lived and died in eighteenth- and nineteenth- century New Mexico, Martina Will de Chaparro weaves together the stories of individuals and communities in this cultural crossroads of the American Southwest. The wills and burial registers at the heart of this study provide insights into the variety of ways in which death was understood by New Mexicans living in a period of profound social and political transitions. This volume addresses the model of the good death that settlers and friars brought with them to New Mexico, challenges to the model's application, and the eventual erosion of the ideal. The text also considers the effects of public health legislation that sought to protect the public welfare, as well as responses to these controversial and unpopular reforms. Will discusses both cultural continuity and regional adaptation, examining Spanish-American deathways in New Mexico during the colonial (approximately 1700-1821), Mexican (1821-1848), and early Territorial (1848-1880) periods.

Death and Dying Jun 12 2021 The medicalization of death is a challenge for all the world's religious and cultural traditions. Death's meaning has been reduced to a diagnosis, a problem, rather than a mystery for humans to ponder. How have religious traditions responded? What resources do they bring to a discussion of death's contemporary dilemmas? This book offers a range of creative and contextual responses from a variety of religious and cultural traditions. It features 14 essays from scholars of different religious and philosophical traditions, who spoke as part of a recent lecture and dialogue series of Drake University's The Comparison Project. The scholars represent ethnologists, medical ethicists, historians, philosophers, and theologians--all facing up to questions of truth and value in the light of the urgent need to move past a strictly medicalized vision. This volume serves as the second publication of The Comparison Project, an innovative new approach to the philosophy of religion housed at Drake University. The Comparison Project organizes a biennial series of scholar lectures, practitioner dialogues, and comparative panels about core, cross-cultural topics in the philosophy of religion. The Comparison Project stands apart from traditional, theistic approaches to the philosophy of religion in its commitment to religious inclusivity. It is the future of the philosophy of religion in a diverse, global world.

Journey's End Mar 29 2020 In Journey's End, we write about death, dying, and end-of-life issues. We attempt to define and describe these real-life circumstances, and we discuss ways to proactively deal with them. Multiple personal and professional perspectives provide valuable insights. What is dying like for the dying person, for loved ones, and for those who lend support? Each experience will have unique qualities. While we explore the dying process, we make no assumptions about how any particular death will unfold. In Journey's End Part 1: Heartfelt Stories of Death and Dying, our primary focus is the personal accounts of laypeople and of professionals who support dying persons at the end of life. These stories, while unique in detail, hold universal truths for anyone experiencing the end of life. Our intention is to bring the topics of death and dying into the light, to provide a resource that can instruct and inspire compassion and understanding for anyone who is in the midst of their own or another's end-of-life journey.

To Die is Gain: Near-Death Experience and the Art of Dying Before We Die Oct 24 2019 "If dying is not oppression, my knowledge that I am going to die will no longer oppress me. Instead of making me feel melancholy it will expand and deepen me." Simultaneous with Raymond Moody's landmark book Life After Life, Johann Christoph Hampe independently "discovered" near-death experiences in the 1970s. Though both authors explored the phenomenon as possible evidence for life after death, Hampe took a very different approach and produced a profound, thoughtful, meditative exploration of "dying before we die." Hampe wrote To Die is Gain after he himself recovered from temporary clinical death caused by a serious illness and had personally experienced "dying seen from within," as he put it. This lends weight and poignancy to his reflections, particularly concerning the implications of NDEs for our time here on Earth. Hampe shows how we can gain a new vision of life from a deeper knowledge of dying, and coming to terms with our own death. The book created a great stir on its first appearance in Germany, though this translation appeared only after the NDE "boom" in the English-speaking world, when the focus of research had

already been established. To Die is Gain is thus an important though neglected classic on the spiritual and philosophical meanings of NDEs, unique for being wholly uninfluenced by contemporary near-death studies. In other circumstances, for its insight and social significance, the book might have rivalled Elisabeth Kübler-Ross's *On Death and Dying*. To Die is Gain is a remarkable look into the dynamics, emotions, myths, and human concerns with death, dying, and beyond. Many of the NDE case studies Hampe presents will be unfamiliar to readers, and are drawn from a wide range of sources and interviews.

The Routledge Companion to Death and Dying

May 23 2022 Few issues apply universally to people as poignantly as death and dying. All religions address concerns with death from the handling of human remains, to defining death, to suggesting what happens after life. The Routledge Companion to Death and Dying provides readers with an overview of the study of death and dying. Questions of death, mortality, and more recently of end-of-life care, have long been important ones and scholars from a range of fields have approached the topic in a number of ways. Comprising over fifty-two chapters from a team of international contributors, the companion covers: funerary and mourning practices; concepts of the afterlife; psychical issues associated with death and dying; clinical and ethical issues; philosophical issues; death and dying as represented in popular culture. This comprehensive collection of essays will bring together perspectives from fields as diverse as history, philosophy, literature, psychology, archaeology and religious studies, while including various religious traditions, including established religions like Christianity, Judaism, Islam, Hinduism, and Buddhism as well as new or less widely known traditions such as the Spiritualist Movement, the Church of Latter Day Saints, and Raëlianism. Digital Death Sep 22 2019 With DeadSocial one can create messages to be published to social networks after death. Facebook's "If I Die" enables users to create a video or text message for posthumous publication. Twitter_LIVESON accounts will keep tweeting even after the user is gone. There is no doubt that the digital age has radically changed options related to death, dying, grieving, and remembering, allowing people to say goodbye in their own time and their own unique way. Drawing from a range of academic perspectives, this book is the only serious study to focus on the ways in which death, dying, and memorialization appear in and are influenced by digital technology. The work investigates phenomena, devices, and audiences as they affect mortality, remembrances, grieving, posthumous existence, and afterlife experience. It examines the markets to which the providers of such services are responding, and it analyzes the degree to which digital media is changing views and expectations related to death. Ultimately, the contributors seek to answer an even more important question: how digital existences affect both real-world perceptions of life's end and the way in which lives are actually lived."

2020 "Yasu was simply crazy. But no crazier than the rest of the war." Rui Umezawa's first novel weaves in and out of the lives of three generations of the Hayakawa family, starting during World War II in Japan and ending in present-day Toronto. The story is tragic, hilarious, lyrical and universal, tracing the legacy of war and the past on one family's fortunes and memories. Film director Atom Egoyan says: "This ambitious debut creates a dense world of overlapping events -- from the smallest details of domestic life to the grandest scale of atrocity and horror. Rui Umezawa presents this unique world of cause and effect with a carefully harnessed sense of despair, yearning and beauty." Maimed physically and emotionally, Shoji Hayakawa leaves the devastation of post-war Japan and moves to the University of Milwaukee to teach physics. His father, Yasujiro, was the doctor in the village of Kitagawa, and an outspoken pacifist in dangerous times. Shoji and his wife Mitsuyo still recall their wartime childhood: bartering for food, evacuation to the countryside, returning to the burnt remains of the cities. Transplanted into suburban America, Mitsuyo's mother will watch life through the windows, marvelling at how absurdly people act even when they have everything they need: food, water, clothes, and no bombs. Shoji has two sons, Toshi and Kei. Toshi is a gentle boy but sees the world with an abnormal intensity. Objects seem to speak to him. He has to lock himself in a closet to concentrate on his homework, and lies face down in the school corridor with his forehead pressed against the cool linoleum to calm himself. Exuberant but noisy, he is stopped from taking piano lessons. He is an embarrassment to his mother and to his angry brother Kei, who leaves for Canada to build a career as a rock musician. Mitsuyo, so demanding of Kei, considers Toshi insane and never expects anything of him. Yet Toshi, full of imagination, finds humour and wonder in the world. Quill and Quire called *The Truth About Death and Dying* an extraordinary first novel that "falls somewhere between Thomas Wolfe and Monty Python." The absurd sense of humour, the unforgettably comic scenes -- such as Yasu emerging naked from the bathroom clutching mushrooms, or dancing in the bomb shelter -- are inextricably entwined with tragic memories. With the dark shadows of Hiroshima and Nagasaki as well as Pearl Harbor always present, this novel examines how our sense of what is normal and what is crazy can be skewed, especially in times of war. Of the passages that take place in wartime Japan, the author says they "owe most of their details to what was told to me by my parents, and to Japanese movies and comic books set during World War II. I grew up with stories of the war and pacifism, both at home and in the Japanese media. My father was never conscripted to fight, because he excelled so much at science and the government felt he would be more useful in a lab than on a battlefield.... My father would often recount, however, having to run and take shelter from bombs while going to university in Nagoya. For the rest of his life, he refused to watch war movies, because the whistling sound of bombs falling frightened him terribly." "When I think about Japan in relation to the Second World War, more often than not, I'm remembering people who were treated like

animals in Japanese POW camps. Or the Chinese who suffered tremendously at the hands of the Japanese military in places like Nanjing or Manchuria.... However, one of the things I think the book illustrates is this: Japanese wartime atrocities were unforgivable, but at the same time, Japanese civilians like my father were suffering too."

human life, which is grasped through an acceptance of its transience. As both the teachings of the ten Gurus and the events of history following the death of Guru Nanak have been important in shaping Sikhism, this book also deals with the influence on Sikhism of various streams, within Hinduism and Islam. A comparison with the views of these two faiths, and a positive look at death in martyrdom, are other contributions made by this book for the benefit of all.

Death in the Modern World Jul 21 2019 Death comes to all humans, but how death is managed, symbolised and experienced varies widely, not only between individuals but also between groups. What then shapes how a society manages death, dying and bereavement today? Are all modern countries similar? How important are culture, the physical environment, national histories, national laws and institutions, and globalization? This is the first book to look at how all these different factors shape death and dying in the modern world. Written by an internationally renowned scholar in death studies, and drawing on examples from around the world, including the UK, USA, China and Japan, The Netherlands, Scandinavia and Eastern Europe. Death, Dying, and Social Differences Mar 21 2022 Society has become increasingly diverse; multi-cultural, multi-faith and wide ranging in family structures. The wealthier are healthier and social inequalities are more pronounced. Respecting and working with the range of 'differences' among service users, families and communities in health and social care with ill, dying and bereaved people is a neglected area in the literature. As the principles of palliative and end of life care increasingly permeate the mainstream of health and social care services, it is important that professionals are sensitive and respond to the differing needs of individuals from diverse socio-economic backgrounds, ethnicities, beliefs, abilities and sexual orientations, as well as to the different contexts and social environments in which people live and die. This book explores what underpins inequality,

disadvantage and injustice in access to good end of life care. Increasingly clinicians, policy planners, and academics are concerned about inequity in service provision. Internationally, there is an increasing focus and sense of urgency both on delivering good care in all settings regardless of diagnosis, and on better meeting the needs of vulnerable and disadvantaged groups. National initiatives emphasise the importance of resolving disparities in care and harnessing empowered user voices to drive change. This newly expanded, fully revised second edition, with 11 new chapters, provides a comprehensive analysis of discrimination, difference and disadvantage in end of life care, and offers practical guidance for all who seek to support the equitable provision of good end of life care.

Death's Summer Coat Nov 17 2021 Though death is the one subject that touches every life, we've grown used to denying its existence, and treating it as an enemy to be beaten back wherever possible--but what drove us to that point? Consideration of death and dying is back in the public forum. People are sipping tea at Death Cafés, attending Death Salons and visiting exhibitions such as Death: A Self-Portrait at the Wellcome Collection. Death's Summer Coat addresses this surge of interest by providing a compelling crossover narrative: of interest to a general audience, but also to those who are grieving. How can we approach death in a culture dead-set against talking about mortality? Written with humor and humanity, this is an informed and up-to-date work that uses personal narrative and photography, science, history, and literature to explore the incredibly diverse--and sometimes just incredible--ways in which humans have dealt with mortality in different times and places. Topics include: how we conceive of death; death and the departed across the globe; the language of death and why it matters; the Victorians; medical science and preservation; death and medical care; and modern-day rituals. Some of the stories are strikingly unfamiliar; others are far more familiar than you might suppose. But all reveal a lot about the present--and about ourselves.

Caring for the Dying Feb 20 2022 Caring for the Dying describes a whole new way to approach death and dying. It explores how the dying and their families can bring deep meaning and great comfort to the care given at the end of a life. Created by Henry Fersko-Weiss, the end-of-life doula model is adapted from the work of birth doulas and helps the dying to find meaning in their life, express that meaning in powerful and beautiful legacies, and plan for the final days. The approach calls for around-the-clock vigil care, so the dying person and their family have the emotional and spiritual support they need along with guidance on signs and symptoms of dying. It also covers the work of reprocessing a death with the family afterward and the early work of grieving. Emphasis is placed on the space around the dying person and encourages the use of touch, guided imagery, and ritual during the dying process. Throughout the book Fersko-Weiss tells amazing and encouraging stories of the people he has cared for, as well as stories that come from doulas he has trained and worked with over the years. What is unique about this book is the well-conceived and thorough approach it describes to working skillfully with the dying. The guidance provided can help a dying person, their family, and caregivers to transform the dying experience from one of fear and despair into one that is uplifting and even life affirming. You will see death in a new light and gain a different perspective on how to help the dying. It may even change the way you live your life right now.
