Transformational Human Resources Management in Zimbabwe Jul 16 2021 This book is a stepping stone toward solving public sector human capital challenges in Zimbabwe as it equips human capital managers with solutions to key issues in the public sector. In Zimbabwe, the public sector human capital drives the economy as over half of the population access their services through public enterprises. Government is the major agent in economic and infrastructure development as well as the production of goods and services. However, Zimbabwe's public service is underperforming due to poorly motivated and managed employees who do not respond to the needs of its clients. This is a cause of concern as the public sector human capital is central to the overall performance of the public sector. Often public sector managers and leaders lack advanced, relevant, and dynamic skills and knowledge to deal with human resource challenges within the New Public Management environment. It is critical for the public sector to transform its human resource management to suit twenty-first-century needs. Effective human resource management in the public sector leads to economic growth and therefore the achievement of the Zimbabwe National Vision 2030. Therefore, this book serves as a guide for public sector managers and those directly or indirectly involved in human capital management. It provides in-depth knowledge and guidance in effective human capital management within the context of the public sector in Zimbabwe.

Context-Aware Computing and Self-Managing Systems Jun 14 2021 Bringing together an extensively researched area with an emerging research issue, Context-Aware Computing and Self-Managing Systems presents the core contributions of context-aware computing in the development of self-managing systems, including devices, applications, middleware, and networks. The expert contributors reveal the usefulness of context-aware computing in developing autonomous systems that have practical application in the real world. The first chapter of the book identifies features that are common to both context-aware computing and autonomous computing. It offers a basic definition of context-awareness, covers fundamental aspects of self-managing systems, and provides several examples of context information and self-managing systems. Subsequent chapters on context-awareness demonstrate how a context can be employed to make systems smart, how a context can be captured and represented, and how dynamic binding of context sources can be possible. The chapters on self-management illustrate the need for "implicit knowledge" to develop fault-tolerant and self-protective systems. They also present a higher-level vision of future large-scale networks. Through various examples, this book shows how context-aware computing can be used in many self-managing systems. It enables researchers of context-aware computing to identify potential applications in the area of autonomous computing. The text also supports researchers of autonomous computing in defining, modeling, and capturing dynamic aspects of self-managing systems.

Ecosystem-Based Management for the Oceans Sep 17 2021 Conventional management approaches cannot meet the challenges faced by ocean and coastal ecosystems today. Consequently, national and international bodies have called for a shift toward more comprehensive ecosystem-based marine management. Synthesizing a vast amount of current knowledge, *Ecosystem-Based Management for the Oceans* is a comprehensive guide to utilizing this promising new approach. At its core, ecosystem-based management (EBM) is about acknowledging connections. Instead of focusing on the impacts of single activities on the delivery of individual ecosystem services, EBM focuses on the array of services that we receive from marine systems, the interactive and cumulative effects of multiple human activities on these coupled ecological and social systems, and the importance of working towards common goals across sectors. *Ecosystem-Based Management for the Oceans* provides a conceptual framework for students and professionals who want to understand and utilize this powerful approach. And it employs case studies that draw on the experiences of EBM practitioners to demonstrate how EBM principles can be applied to real-world problems. The book emphasizes the importance of understanding the factors that contribute to social and ecological resilience – the extent to which a system can maintain its structure, function, and identity in the face of disturbance. Utilizing the resilience framework, professionals can better predict how systems will respond to a variety of disturbances, as well as to a range of management alternatives. *Ecosystem-Based Management for the Oceans* presents the latest science of resilience, while it provides tools for the design and implementation of responsive EBM solutions.

Ecosystem-Based Management, Ecosystem Services and Aquatic Biodiversity Aug 29 2022 Aquatic ecosystems are rich in biodiversity and home to a diverse array of species and habitats, providing a wide variety of benefits to human beings. Many of these valuable ecosystems are at risk of being irreversibly damaged by human activities and pressures, including pollution, contamination, invasive species, overfishing and climate change. Such pressures threaten the sustainability of these ecosystems, their provision of ecosystem services and ultimately human well-being. Ecosystem-based management (EBM) is now widely considered the most promising paradigm for balancing sustainable development and biodiversity protection, and various international strategies and conventions have championed the EBM cause and the inclusion of ecosystem services in decision-making. This open access book introduces the essential concepts and principles required to implement ecosystem-based management, detailing tools and techniques, and describing the application of these concepts and tools to a broad range of aquatic ecosystems, from the shores of Lough Erne in Northern Ireland to the estuaries of the US Pacific Northwest and the tropical Mekong Delta.

New Schools for a New Century Oct 26 2019 As we cross the threshold of a new century, which approaches are likely to improve public education? In this book, distinguished scholars discuss recent innovations--charter schools, contracting arrangements, and choice--designed to liberate educators from burdensome bureaucratic controls and improve the level of opportunity for all children. Focusing on the problems in cities, where far too many children have been denied access to quality institutions, the authors examine the lessons to be learned from Catholic schools, site-based management, private entrepreneurs, and specific developments in three cities--New York, Milwaukee, and

Chicago. The authors, though realistic about the political and institutional obstacles that stand in the way of meaningful change, foresee the demise of the "one size fits all" approach to schooling. They envision a system of schools that is dynamic, diverse, performance based, and accountable; one that is supportive of professionals, responsive to creativity, intolerant of failure, and committed to high educational standards for all children. Wertorientierte Managementvergütung Feb 29 2020 Inhaltsangabe: Einleitung: Problemstellung und Zielsetzung der Arbeit: 'Rund um den Globus sind gewaltige Geldmengen im Umlauf, ständig auf der Suche nach besonders rentablen Anlagen'. Es kommt zu Spekulationsblasen und sogenannten Hypes, da die aufgrund höherer Nachfrage steigenden Preise über ihren Multiplikatoreffekt zu erneut höherer Nachfrage führen. Wie die Börsianer zu sagen pflegen: 'Die Hausse nährt die Hausse'. Blasen können bereits dann zum Platzen kommen, wenn aufgrund kleinster Gerüchte die Euphorie der Allgemeinheit umschlägt und ein gegenläufiger Trend einsetzt. Überträgt man dieses volkswirtschaftliche Phänomen auf einzelne Unternehmen, wird die Notwendigkeit der langfristigen Wertorientierung deutlich. Aufgrund des globalen Wettbewerbs um Kunden, Mitarbeiter und Kapital wird die Aufgabe der Unternehmen, ihren Marktwert zu maximieren, immer entscheidender für den Erfolg. Dieser soll langfristig steigen und somit anstatt feindlicher Übernahmen und Konkursen, Erträge für den flexiblen Anleger wahrscheinlich machen. Bereits über 90% der DAX 30-Unternehmen haben das Prinzip des VBM über wertorientierte Steuerungsgrößen im Unternehmen integriert. Schnelle Gewinne, Paniken und Aktiencrashes sind wirtschaftlich nicht erstrebenswert; sie bewirken auf volkswirtschaftlicher Ebene Wirtschaftskrisen und auf Unternehmensebene Konkurse. Fraglich ist nun, auf welche Art und Weise Managern finanzielle Anreize gesetzt werden können, damit sich die Denkhaltung der Wertorientierung tatsächlich im Unternehmen manifestiert und mehr Vertrauen zwischen Aktionären und Managern entsteht. 'Exorbitante Gehälter und ständig neue Prämien: Damit ist jetzt Schluss. Künftig bemisst sich die Entlohnung am langfristigen

Erfolg!' Solche Forderungen sind keine Seltenheit. Aber was muss an dem Istzustand der Managervergütung geändert werden, um in Zukunft riskante Investitionen, die zu Wirtschaftskrisen wie der Aktuellen führen, entgegenzusteuern? Die wertorientierte Managementvergütung liefert den Schlüssel zur Lösung des Problems und berücksichtigt dabei vor allem zwei Perspektiven: Auf der einen Seite müssen die Manager im Sinne der Eigenkapitalgeber gesteuert werden, damit der Engpassfaktor Kapital von diesen bereitgestellt wird. Dies ist in Zeiten der Globalisierung nicht selbstverständlich: Der permanente Wandel wird zur Konstante, und bei fehlender Wertsteigerung wird in ein anderes Unternehmen irgendwo auf der Welt investiert. Unternehmen müssen dadurch nicht [...]

Four key routes to creating a strategy are discussed. These routes, when taken together, provide a powerful means for agreeing a negotiated strategy, and comprise: strategic issue management, agreeing organizational purpose, competitiveness from the exploitation and protection of distinctiveness, and the strategic management of stakeholders. The designs have been used extensively, in a wide range of countries, by management teams in all types of organisations.
