Handbook of Sustainability Assessment Jun 22 2019 The Handbook of Sustainability Assessment introduces the theory and practice of sustainability assessment and showcases the state-of-the-art research. The aim is to provide inspiration and guidance to students, academics and practitioners alike and to contribute to the enhancement of sustainability assessment practice worldwide. It emphasises how traditional impact assessment practices can be enhanced to contribute to sustainable outcomes. Featuring original contributions from leading sustainability assessment researchers and practitioners, it forms part of the Research Handbooks on Impact Assessment series.

Gibson's Suits in Chancery 8th Edition Sep 17 2021 Gibson's Suits in Chancery, Eighth Edition is the most comprehensive and reliable reference available to Tennessee lawyers who handle matters in equity. Inside you'll find thorough discussion of Tennessee's Chancery Courts and the matters they hear, including the substantive law and jurisprudential principles of equity as they relate to most conceivable types of disputes in equity. Matters of particular importance are discussed at length, including: • The Court's Jurisdiction and Enforcement of Decrees • Actions for Ne Exeat, Attachment of Property, Receivers, and Contempt • Contracts and Partnerships • Disability, Guardianship, and Estate Administration • Creditors, Liens, and property actions • Actions In the Nature and Quo Warranto • Writs of Mandamus • Divorce, Alimony and Workers' Compensation • Interpleader, Declaratory and Summary Judgments, and Injunctive Relief • Depositions, Elections and Class Actions • The Appeals Process You'll also find thorough explanations of start-to-finish procedural issues, from drafting

the complaint to submission of the judgment, and a thorough appendix and comprehensive Index help you find the materials you need quickly when you are analyzing a critical issue.

Gibson's Law Notes Jun 26 2022

Fighting for Life Jul 24 2019 What accounts for the popularity of the macho image, the fanaticism of sports enthusiasts, and the perennial appeal of Don Quixote's ineffectual struggles? In *Fighting for Life*, Walter J. Ong addresses these and related questions, offering insight into the role of competition in human existence. Focusing on the ways in which human life is affected by contest, Ong argues that the male agonistic drive finds an outlet in games as divergent as football and chess. Demonstrating the importance of contest in biological evolution and in the growth of consciousness out of the unconscious, Ong also shows how adversary procedure has affected social, linguistic, and intellectual history. He discusses shifting patterns of contest in such arenas as spectator sports, politics, business, academia, and religion. Human beings' internalization of agonistic drives, he concludes, can foster the deeper discovery of the self and of distinctively human freedom.

International Trials and Reconciliation Feb 08 2021 Transitional justice is a burgeoning field of scholarly inquiry. Yet while the transitional justice literature is replete with claims about the benefits of criminal trials, too often these claims lack an empirical basis and hence remain unproven. While there has been much discussion about whether criminal trials can aid reconciliation, the extent to which they actually do so in practice remains under-explored. This book investigates the relationship between criminal trials and reconciliation, through a particular focus on the International Criminal Tribunal for the former Yugoslavia (ICTY). Using detailed empirical data - in the form of qualitative interviews and observations from five years of fieldwork - to assess and analyze the ICTY's impact on reconciliation in Bosnia-Herzegovina, Croatia and Kosovo, *International Trials and Reconciliation: Assessing the Impact*

of the International Criminal Tribunal for the former Yugoslavia argues that reconciliation is not a realistic aim for a criminal court. They are, Janine Clark argues, only one part of a rich tapestry of justice, which must also include non-retributive transitional justice processes and mechanisms. Challenging many of the common yet untested assumptions about the benefits of criminal trials, this innovative and extremely timely monograph will be invaluable for those with interests in the theory and practice of transitional justice.

Stellar Candles for the Extragalactic Distance

Scale Jul 16 2021 This volume reviews the current status with respect to both theory and observation of the extragalactic distance scale. A sufficient accuracy is required both for a precise determination of the cosmological parameters and also in order to achieve a better understanding of physical processes in extragalactic systems. The "standard candles", used to set up the extragalactic distance scale, reviewed in this book include cepheid variables, RR Lyrae variables, novae, Type Ia and Type II supernovae as well as globular clusters and planetary nebulae.

Visual Perception Dec 29 2019 First Published in 2001. Routledge is an imprint of Taylor & Francis, an informa company.

Gothic Motifs in the Fiction of William

Gibson Aug 17 2021 Gibson's startlingly new form of science fiction opens inner vistas through his sense of how technological development increasingly removes the boundaries between the realms of the imagined and the real. This important new study focuses on the visual elements in Gibson's work, suggesting how his extraordinary mindscapes are locatable in terms of both gothic and the graphic novel traditions in a subtle interweaving of physical and virtual space that creates new forms of spatial being. Gibson describes the space of the Walled City as Doorways flipping past, each one hinting at its own secret world: Tatiani G. Rapatzikou's thoughtful analyses of those secret worlds will fascinate all those who have wondered where these fictions have come from-and where they may be headed.

How to Do Systems Analysis Oct 31 2022

Presents the foundational systemic thinking needed to conceive systems that address complex socio-technical problems This book emphasizes the underlying systems analysis components and associated thought processes. The authors describe an approach that is appropriate for complex systems in diverse disciplines complemented by a case-based pedagogy for teaching systems analysis that includes numerous cases that can be used to teach both the art and methods of systems analysis. Covers the six major phases of systems analysis, as well as goal development, the index of performance, evaluating candidate solutions, managing systems teams, project management, and more Presents the core concepts of a general systems analysis methodology Introduces, motivates, and illustrates the case pedagogy as a means of teaching and practicing systems analysis concepts Provides numerous cases that challenge readers to practice systems thinking and the systems methodology How to Do Systems Analysis: Primer and Casebook is a reference for professionals in all fields that need systems analysis, such as telecommunications, transportation, business consulting, financial services, and healthcare. This book also serves as a textbook for undergraduate and graduate students in systems analysis courses in business schools, engineering schools, policy programs, and any course that promotes systems thinking. Technologies for Supporting Reasoning Communities and Collaborative Decision Making: Cooperative Approaches Dec 21 2021 The information age has enabled unprecedented levels of data to be collected and stored. At the same time, society and organizations have become increasingly complex. Consequently, decisions in many facets have become increasingly complex but have the potential to be better informed. Technologies for Supporting Reasoning Communities and Collaborative Decision Making: Cooperative Approaches includes chapters from diverse fields of enquiry

including decision science, political science, argumentation, knowledge management, cognitive psychology and business intelligence. Each chapter illustrates a perspective on group reasoning that ultimately aims to lead to a greater understanding of reasoning communities and inform technological developments.

The Psychotheology of Sin and Salvation Jun 02 2020 Through the employment of the work of Slavoj Žižek and his engagement with the Apostle Paul, Axton argues that Paul in Romans 6-8 understands sin as a lie grounding the subject outside of Christ, and salvation is an exposure and displacement of this lie. The theological significance of Žižek (along with Sigmund Freud and Jacques Lacan) is his demonstration of the pervasive and systemic nature of this lie and its description as he finds it in Romans 7. The specific overlap of the two disciplines of psychology and theology is found in the psychoanalytic understanding that the human Subject or the psyche is structured in three registers: the symbolic, the imaginary and the real. These three registers function like a lie analogous to the Pauline categories of law, ego, and the 'body of death' which constitute Paul's dynamic of sin's deception. Axton argues that if sin is understood as a lie grounding the Subject, the exposure of the lie or the dispelling of any notion of mystery connected to sin is integral to salvation and the reconstructing of the Subject in Christ. While the lie of sin is mediated by the law, new life in the Spirit is not through the law but is a principle unto itself, which though it accounts for the law, is beyond the law.

The 30th Golden Age of Science Fiction

MEGAPACK®: Roger Dee Aug 05 2020 Roger Dee was the pseudonym of Roger D. Aycock (6 December 1914 - 5 April 2004), an American author who wrote primarily science fiction. His tales were always well written, clever, and entertaining, and this selection of 13 stories is typical of his work. Included are: WAILING WALL PET FARM CONTROL GROUP ULTIMATUM CLEAN BREAK THE ANGLERS OF ARZ ASSIGNMENT'S END PROBLEM ON BALAK THE WHEEL IS DEATH TODAY IS FOREVER TO REMEMBER CHARLIE BY TRADERS RISK ROUGH BEAST If you enjoy this volume of classic stories, don't forget to search your favorite ebook store for "Wildside Press

Megapack" to see the 270+ other entries in this series, including science fiction, fantasy, mysteries, adventure, horror, westerns -- and much, much more!

Working with Qualitative Data Mar 24 2022

This title provides a practical and accessible introduction to developing and applying strategies for the analysis of qualitative data by exploring the ways in which analysis is related to all aspects of research.

Mel Gibson's Passion and Philosophy Nov 19

2021 Few--including director Mel Gibson--were prepared for the firestorm of controversy that followed the release of the long-awaited "The Passion of the Christ." This timely collection of essays explores the film's questions in-depth and expands on its themes.

In the Mind's Eye Mar 12 2021 How can we best describe the processes by which we visually perceive our environment? Contemporary perceptual theory still lacks a coherent theoretical position that encompasses both the limitations on the information that can be retained from a single eye fixation and the abundant phenomenal and behavioral evidence for the perception of an extended and coherent world. As a result, many leading theorists and researchers in visual perception are turning with new or renewed interest to the work of Julian Hochberg. For over 50 years, in his own experimental research, in his detailed consideration of examples drawn from a wide range of visual experiences and activities, and most of all in his brilliant and sophisticated theoretical analyses, Hochberg has persistently engaged with the myriad problems inherent in working out the kind of coherent theoretical position the field currently lacks. The complexity of his thought and the wide range of areas into which Hochberg has pursued the solution to this central problem have, however, limited both the accessibility of his work and the appreciation of his accomplishment. In this volume we seek to bring the full range of Hochberg's work to the attention of a wider audience by offering a selection of his key works, many taken from out-of-print or relatively inaccessible sources. To facilitate the understanding of his accomplishment, and of what his work has to offer to contemporary researchers and theorists in visual perception, we include commentaries

on salient aspects of his work by 20 noted researchers. In the Mind's Eye will be of interest to researchers working on topics such as perceptual organization, visual attention, space perception, motion perception, visual cognition, the relationship between perception and action, picture perception, and film, who are striving to obtain a deeper understanding of their own fields, and who want to integrate this understanding into a broader, unified view of visual perceptual processing.

How to Do Systems Analysis Sep 29 2022 This book focuses on systems analysis, broadly defined to also include problem formulation and interpretation of proposed alternatives in terms of the value systems of stakeholders. Therefore, the book is a complement, not a substitute to other books when teaching systems engineering and systems analysis. The nature of problem solving discussed in this book is appropriate to a wide range of systems analyses. Thus the book can be used as a stand-alone book for teaching the analysis of systems. Also unique is the inclusion of broad case studies to stress problem solving issues, making How to Do Systems Analysis a complement to the many fine works in systems engineering available today.

Focus Groups for the Social Science Researcher Mar 31 2020 In highlighting the unique features of focus groups, Cyr explains how they can help social science researchers effectively answer certain research questions.

Principles of Cognition, Language and Action May 14 2021 This book addresses a growing concern as to why Psychology, now more than a hundred years after becoming an independent research area, does not yet meet the basic requirements of a scientific discipline on a par with other sciences such as physics and biology. These requirements include: agreement on definition and delimitation of the range of

features and properties of the phenomena or subject matter to be investigated; secondly, the development of concepts and methods which unambiguously specify the phenomena and systematic investigation of their features and properties. A third equally important requirement, implicit in the first two, is exclusion from enquiry of all other matters with which the discipline is not concerned. To these requirements must then be added the development of basic assumptions about the nature of what is under investigation, and of principles to account for its properties and to serve as a guide as to what are relevant questions to ask and theories to develop about them.

Local Applications of the Ecological Approach To Human-Machine Systems Feb 20 2022

There is a growing consensus in the human factors/ergonomics community that human factors research has had little impact on significant applied problems. Some have suggested that the problem lies in the fact that much HF/E research has been based on the wrong type of psychology, an information processing view of psychology that is reductionistic and context-free. Ecological psychology offers a viable alternative, presenting a richer view of human behavior that is holistic and contextualized. The papers presented in these two volumes show the conceptual impact that ecological psychology can have on HF/E, as well as presenting a number of specific examples illustrating the ecological approach to human-machine systems. It is the first collection of papers that explicitly draws a connection between these two fields. While work in this area is only just beginning, the evidence available suggests that taking an ecological approach to human factors/ergonomics helps bridge the existing gap between basic research and applied problems.

Narrativity, Coherence and Literariness Jan 28

2020 The search for the defining qualities of narrative has produced an expansive range of definitions which, largely unconnected with each other, obscure the notion of "narrativity" rather than clarifying it. The first part of this study remedies this shortcoming by developing a graded macro model of narrativity which serves three aims. Firstly, it provides a structured overview of the field of narrative elements and processes. Secondly, it facilitates the classification of narratological approaches by locating them on different stages of narrativity. Finally, it focuses attention on narrative dynamics as interpretative processes by which readers seek to produce narrative coherence. The second part of this study identifies three different narrative dynamics which characterise Laclos's "Dangerous Connections," Kafka's "Castle" and Toussaint's novels. Wagner bases her analyses of these dynamics not only on the texts themselves but also on the ways in which literary scholars imbue the texts with narrative coherence. This book provides a long overdue systematisation of the jumbled field of theories of narrativity and opens new perspectives on the difficult relationship between narrative theory and interpretation.

Bilingual Sentence Processing Sep 25 2019 This title looks at the representation of semitic words in the mental lexicon of semitic language speakers. It asks: should we see semitic words' morphology as root-based or word-based?.
