This book is suitable for advanced students in Linguistics and Law, and for academics and researchers working in the field of Language and Law and jurilinguists.

The Wealth of Religions Feb 29 2020 How religious beliefs and practices can influence the wealth of nations Which countries grow faster economically—those with strong beliefs in heaven and hell or those with weak beliefs in them? Does religious participation matter? Why do some countries experience secularization while others are religiously vibrant? In *The Wealth of Religions*, Rachel McCleary and Robert Barro draw on their long record of pioneering research to examine these and many other aspects of the economics of religion. Places with

firm beliefs in heaven and hell measured relative to the time spent in religious activities tend to be more productive and experience faster growth. Going further, there are two directions of causation: religiosity influences economic performance and economic development affects religiosity. Dimensions of economic development—such as urbanization, education, health, and fertility—matter too, interacting differently with religiosity. State regulation and subsidization of religion also play a role. *The Wealth of Religions* addresses the effects of religious beliefs on character traits such as work ethic, thrift, and honesty; the Protestant Reformation and its long-term effects on education and religious competition; Communism's suppression of and competition with religion; the effects of Islamic laws and regulations on the functioning of markets and, hence, on the long-term development of Muslim countries; why some countries have state religions; analogies between religious groups and terrorist organizations; the violent origins of the Dalai Lama's brand of Tibetan Buddhism; and the use by the Catholic Church of saint-making as a way to compete against the rise of Protestant Evangelicals. Timely and incisive, *The Wealth of Religions* provides fresh insights into the vital interplay between religion, markets, and economic development.

Harboring Data Apr 24 2022 As identity theft and corporate data vulnerability continue to escalate, corporations must protect both the valuable consumer data they collect and their own intangible assets. Both Congress and the states have passed laws to improve practices, but the rate of data loss persists unabated and companies remain slow to invest in information security. Engaged in a bottom-up investigation, *Harboring Data* reveals the emergent nature of data leakage and vulnerability, as well as some of the areas where our current regulatory frameworks fall short. With insights from leading academics, information security professionals, and other area experts, this original work explores the business, legal, and social dynamics behind corporate information leakage and data breaches. The authors reveal common mistakes companies make, which breaches go unreported despite notification statutes, and surprising weaknesses in the federal laws that regulate financial data privacy, children's data collection, and health data privacy. This forward-looking book will be vital to meeting the increasing information security concerns that new data-intensive business models will have.

Lovable Crooks and Loathsome Jews Jul 16 2021 In the years leading up to the World Wars, Germany and Austria saw an unprecedented increase in the study and depiction of the criminal. Science, journalism and crime fiction were obsessed with delinquents while ignoring the social causes of crime. As criminologists measured criminals' heads and debated biological predestination, court reporters and crime writers wrote side-splitting or heart-rending stories featuring one of the most popular characters ever created—the hilarious or piteous crook. The author examines the figure of the crook and notions of

“Jewish” criminality in a range of antisemitic writing, from Nazi propaganda to court reporting to forgotten classics of crime fiction.

The Transparency Fix Aug 29 2022 Is the government too secret or not secret enough? Why is there simultaneously too much government secrecy and a seemingly endless procession of government leaks? The Transparency Fix asserts that we incorrectly assume that government information can be controlled. The same impulse that drives transparency movements also drives secrecy advocates. They all hold the mistaken belief that government information can either be released or kept secure on command. The Transparency Fix argues for a reformation in our assumptions about secrecy and transparency. The world did not end because Julian Assange, WikiLeaks, and Edward Snowden released classified information. But nor was there a significant political change. "Transparency" has become a buzzword, while secrecy is anathema. Using a variety of real-life examples to examine how government information actually flows, Mark Fenster describes how the legal regime's tenuous control over state information belies both the promise and peril of transparency. He challenges us to confront the implausibility of controlling government information and shows us how the contemporary obsession

surrounding transparency and secrecy cannot radically change a state that is defined by so much more than information.

Decolonizing Mission Partnerships Oct 26 2019 We all know that healthy partnerships are essential to fruitful boundary-crossing ministries, but how exactly do we create them? What barriers must be overcome, and what self-examination must we do? How do the legacies of colonialism, racism, and unhealed trauma impact missional collaborations today? In this doctoral thesis, Denyer reflects on these questions as she examines the history of relational dynamics between American and Congolese United Methodists in the North Katanga Conference (DR Congo). By surveying memoirs, magazines, and journals, and conducting in-depth interviews, Denyer presents a complex and multifaceted example of a partnership that is in the process of decolonizing. More than just a history lesson, *Decolonizing Mission Partnerships* presents the questions, hard truths, pitfalls,

and toxic assumptions we must face when attempting to be in mission together.
