**Mixed Metaphors** Jul 24 2019 "Writing guides teach us to avoid mixed metaphors like 'that wet blanket is a loose cannon', and suggest that we should limit ourselves to one metaphor per paragraph. But clearly this is terrible advice. The 'Tomorrow, tomorrow, and tomorrow' speech in Macbeth packs six metaphors into a few lines, and is considered a literary masterpiece. Scientific descriptions of light and matter necessarily include conflicting metaphors because we don't have a perfect metaphor for these concepts. Whilst it's true that mixed metaphors can sound ignorant or confusing, what we really need is a more nuanced definition of mixed metaphors, and a better system for identifying their benefits and drawbacks in different contexts. In *Mixed Metaphors: Their Use and Abuse*, Karen Sullivan employs findings from linguistics and cognitive science to explore why some mixed metaphors are criticised but similar metaphors are praised. By using Conceptual Metaphor Theory, she demonstrates how, once we understand how metaphoric ideas are put together, we can better appreciate the different ways that metaphors can be mixed, and how audiences are likely to respond to these differences. By analysing over 100 metaphors from politicians, sportspeople, writers, and other public figures, *Mixed Metaphors: Their Use and Abuse* delineates how mixing occurs and identifies the characteristics that make mixed metaphors annoying, amusing or astounding" --

**Metaphor and Metonymy revisited beyond the Contemporary Theory of Metaphor** Sep 25 2019 The contributions in this volume go beyond the Contemporary Theory of Metaphor complementing it in a number of relevant ways. Some of the papers argue for a more dynamic, interdisciplinary approach to metaphor looking into it from semiotic, psychological and socio-cultural perspectives. Other contributions focus on the crucial role played by metaphor and metonymy in meaning construction at a discourse/textual level. Finally, the volume also includes proposals which revolve around the alleged universal nature of metaphorical mappings and their suitability to account for grammatical phenomena. The contributions in this volume display an ample gamut of theoretical approaches pointing to the viability of taking a functional-cognitive stance on the analysis of metaphor and metonymy in contrast to a purely cognitive one. This book is structured into three major sections: i) the Contemporary Theory of Metaphor: revisions and recent developments; ii) metaphor and/or metonymy across different discourse/genre types; and iii) the Contemporary Theory of Metaphor: current applications. [The Concise Thesaurus of Traditional English Metaphors](#) Aug 05 2020 This absorbing collection of metaphors includes a variety of expressions with figurative meanings, like similes, proverbs, slang and catchphrases. It is the result of a lifetime of work on dialect and metaphor and gives an overview of the folk wisdom expressed in figurative expressions. The author draws on his extensive contact with the rural cultures of Dorset, Cornwall, Yorkshire and Lancashire, but has also included a range of sayings from North America, Australia, Scotland and other English speaking countries. With revised contents and an improved index to make individual entries easier to find, the Concise can be used to check the meaning and the origin of an expression or to avoid mixed metaphors, anachronisms and incongruities. It is a joy to browse long after your original query has been answered.

**Verbs, Clauses and Constructions** Oct 26 2019 This volume brings together a collection of twenty contributions which offer a diversity of methodological tools and analytical issues concerning the study of different aspects of the role of verbs, clauses and constructions in a rich variety of languages such as Present-Day English, Old English, Old Saxon, French, Spanish, Arabic, German, Upper Sorbian, Latvian, Sino-Tibetan, and the Australian dialects Pitjantjatjara, Yankunytjatjara and Ngaanyatjarra. The use of empirical data and the wide range of languages are the two main challenges addressed here. The book will serve to contribute to current literature on functional-oriented linguistics, incorporating linguistic typology, and corpus-based and contrastive perspectives. The volume is divided into three main parts. The first brings together eight contributions centrally related to the category of the verb both from a synchronic and diachronic perspective. The second part consists of five chapters which revolve around the syntax and semantics of clauses. Finally, the seven essays in the third section explore different formal and functional aspects of the study of constructions in an assortment of languages.

**Confronting Metaphor in Use** Mar 31 2020 It is timely for researchers to approach metaphor as social and situated, as a matter of language and discourse, and not just as a matter of thought. Over the last twenty five years, scholars have come to appreciate in depth the cognitive, motivated and embodied nature of metaphor, but have tended to background the linguistic form of metaphor and have largely ignored how this connects to its role in the discourses in which our lives are constructed and lived. This book brings language and social dimensions into the picture, offering snapshots of metaphor use in real language and in real lives across the very different cultures of Europe and Brazil and contributing to the theorizing of metaphor in discourse.

**Aspects of Figurative Language** Sep 29 2022 Bachelor Thesis from the year 2010 in the subject English Language and Literature Studies - Linguistics, grade: 1,7, University of Hannover (Englisches Seminar), language: English, abstract: The paper deals with different types of figurative language and the question of why and how these should be taught in second language teaching. In order to prove that figurative language is essential in communication and therefore needs to receive more attention in schools, I start by analysing and comparing the concepts of metaphors, idioms and proverbs. Many scholars have discussed metaphors and so as to outline the most important aspects, I refer to Lakoff, Johnson, Ortony and Langlotz amongst others. Those aspects will include the differences between novel and conventional metaphors, the different functions that metaphors fulfil and the phenomenon of mixed metaphors. When discussing idioms I focus on their relationship to metaphorical language, the aspect of frozenness and their functions as well as other topics. Here, scholars like Swinney, Skandara and Götz are quoted and their propositions towards idiomatic language are analysed. To end the first part of the paper I discuss the relationship of proverbs to metaphors and idioms and base this part on Norrick in order to focus on didactic content and the issue of distinguishing between a proverb's literal and figurative meaning. After having given the survey of those concepts, I turn to the part of explaining why it is so important to teach figurative language and I do that by drawing on Ortony's theses of compactness, inexpressibility and vividness. Furthermore, Katz's theory of metaphor as politeness is examined and also Liu's view on idioms as containing cultural references. To end this theoretical paper with an idea of how to use the information practically, the last section deals with the question of how figurative language is best taught. The methods presented are based on a preceding part of background information on how the comprehension process of figurative language works and what the prerequisites are for being able to learn that part of a foreign language. This last part of the paper is mainly based on Ortony, Gentner, Liu and Ur. Eventually, I conclude the paper by summing up the findings and evaluating their relevance for teaching figurative language in second language learning in schools.

**Idioms of Fear: An Onomasiological Approach** Oct 07 2020 Seminar paper from the year 2010 in the subject English Language and Literature Studies - Linguistics, grade: 2,0, University of Erfurt, language: English, abstract: By definition, "idioms are not expected to behave linguistically as phrases but as long words" (Moreno 2007:177) and are not awaited to allow internal transformation. Idioms appear as isolated lexical units. They are linguistic expressions and involve metaphors, metonymies, pairs of words, idioms with it, similes, sayings, phrasal verbs, grammatical idioms and they "are assumed to be a matter of language alone" (Kövecses 2002:199). According to the Oxford Dictionary of Idioms (ODI), the English word idiom derives from the Greek word *idios* meaning "private, peculiar to oneself". An idiom "is a form of expression or a phrase peculiar to a language and approved by the usage of that language, and it often has a signification other than its grammatical or logical one" (ODI 1999). These expressions have become rigid within the language. They are used in a fixed way without reference to the literal meaning of their component words. The common phenomenon that the meaning of an expression is difficult or even impossible to deduce from the meaning of the components it is composed of is called Idiomaticity (Fiedler 2007:22). The meaning of the components is difficult to derive because of the arbitrariness in form and meaning. However, if idioms were arbitrary, they would not be motivated. The aim of this term paper is to observe the motivation of idioms and thereby determine that idioms are not arbitrary. Therefore, chapter 2.1 presents an overview of idioms and motivation, especially metaphorically motivated expressions (chapter 2.1.2). Prediction and motivation will be distinguished in chapter 2.1.1. The emotion and the difference between this term and the related word will be described in chapter 2.1.3 to simplify the importance of distinguishing the different meanings of terms

**Death Idioms in the English and German language** Jun 02 2020 Seminar paper from the year 2014 in the subject German Studies - Comparative Literature, grade: 2,3, University of Erfurt, course: Contrastive Linguistics, language: English, abstract: This paper consists of two major parts, a theoretical framework and a contrastive analysis of idioms of death in the English and German language. The first part deals with the linguistic definition of the term "idiom", including possibilities for their classification. The second section of the first part is going to present the concept of euphemism followed by a brief explanation and categorization of metaphors and the attempt of giving possible reasons for the maintaining taboo of death in western culture. The purpose of the second part of this paper is to analyze and compare a number of English and German idioms of death contrastively, in order to identify lexical and semantic similarities, including the investigation of the origin of certain expressions. Subsequently, a short closing reflection will end up this paper. As death plays a significant role not only in western society but in communities all around the globe, idioms related to death became an important tool in human communication. But what is the actual purpose of using paraphrases in order to relate to death in an utterance? Why do idioms of death have a cultural importance and how is an idiom actually defined? Do certain idioms of death have the same semantic meaning in other languages? Human communication has created a great number of idioms and figures of speech which range

throughout every section of the daily life and appear in every situation possible. As this phenomenon indeed shows its importance, linguists have created the field of phraseology to investigate such expressions. Based on language contact and historical events, many idioms have synonyms and equivalent counterparts in several languages. Learning the specific idioms related to a certain culture helps to get to know more about the history, ethics and social values of a certain community.

**Metaphors in Idioms** Mar 24 2022 This study discusses Chinese idioms which are related to emotions through the looking glass of metaphor and culture. Idiom has a long history. It is the wisdom of the Chinese. It has been developed and accumulated since ancient civilizations. Idioms related to emotions are very important for us to know how the Chinese constructed emotions in their language. The importance and significance of emotions in Chinese idioms set the foundation of this study. One of the objectives of this study is to examine the source and target domains of the metaphors in Chinese idioms. Besides, this study also aims to investigate the relationship between Chinese idiom, religion and Chinese philosophy.

**Metaphor Wars** Nov 07 2020 The study of metaphor is now firmly established as a central topic within cognitive science and the humanities. We marvel at the creative dexterity of gifted speakers and writers for their special talents in both thinking about certain ideas in new ways, and communicating these thoughts in vivid, poetic forms. Yet metaphors may not only be special communicative devices, but a fundamental part of everyday cognition in the form of 'conceptual metaphors'. An enormous body of empirical evidence from cognitive linguistics and related disciplines has emerged detailing how conceptual metaphors underlie significant aspects of language, thought, cultural and expressive action. Despite its influence and popularity, there have been major criticisms of conceptual metaphor. This book offers an evaluation of the arguments and empirical evidence for and against conceptual metaphors, much of which scholars on both sides of the wars fail to properly acknowledge.

**Analysis of Idiomatic Expressions Used in the Novel "The Monogram Murders" by Agatha Christie** Jan 28 2020 Diploma Thesis from the year 2016 in the subject English Language and Literature Studies - Literature, grade: 5.00, New Bulgarian University, language: English, abstract: The question posed in this thesis concerns the usage of idioms in the everyday language, as well as in the book "The Monogram Murders". This paper, therefore, argues that in the non-literal language, some differences are obvious, and thus we can recognize an idiom quite easily. However, there are differences and divisibilities in the idioms themselves - some of them bear the meaning of their compounds while others are simply composed of words that cannot be used with their literal meaning, especially in the context of the idiom itself. The language as a system of communication has both literal and often figurative meanings. However, in the historical grammaticism such a meaning was often used in order to give notions like metaphors, similes, proverbs and idioms. Most of them often carry a metaphorical sense that makes their comprehension difficult, as in fact their meaning cannot be inferred/guessed from the meaning of their constituent parts. Taking all of the abovementioned into account, in the present thesis I will present the results of the research I have made based on the idiomatic usage in the novel of Agatha Christie "The Monogram Murders". Due to the extensive length of my research, I will focus on the idioms that have made their impression on me and on their translation into Bulgarian. The aim of this graduate thesis is to evaluate and describe the idiomatic expressions used in the novel "The Monogram Murders" by Agatha Christie. That kind of analysis is particularly interesting as it concerns the work of art of a famous writer that from a semantic point of view describes the ideas composing the whole book.

**The Field Guide to Sports Metaphors** Sep 17 2021 A gift-worthy playbook of common and unexpected words and idioms that have their roots in sports and games. There are many metaphors we can quickly identify from the realm of sports: covering all the bases (baseball), game plan (football), and par for the course (golf). But the English language is also peppered with the not-so-obvious influence of sports and games, such as go-to guy (basketball) and dead ringer (horse racing). Filled with pithy entries on each idiom, plus quotes showing how big talkers from President Obama to rapper Ice-T use them, this quirky little handbook from former minor league ballplayer and award-winning journalist Josh Chetwynd is sure to be a conversation starter at tailgates, cocktail parties, and in the boardroom.

**Food and Drink Idioms in English** Feb 29 2020 Idioms carry an aura of mystery for all speakers, owing to the discrepancy between their literal and non-literal meanings. This book clears up some of these ambiguities, by examining a series of expressions that have derived from the most instinctive and essential of all human behaviour: eating and drinking. The quantity and quality of 276 food and drink idioms are explored,

investigating two hundred and fifty years of English monolingual lexicography and forty years of usage as attested by contemporary linguistic corpora. The examination of these idioms' syntactic, semantic, pragmatic, historical, social and cultural characteristics will foster in speakers a whole new approach to idiom comprehension and usage, and will constitute thought-provoking ground for further research in other idiom domains.

**Creativity in English as a Lingua Franca** Feb 20 2022 This book investigates formal characteristics and discourse functions of linguistic creativity at the level of idioms in spoken ELF as represented in the Vienna-Oxford International Corpus of English (VOICE). Building on the findings of previous ELF research, the book proposes that creativity might serve as a fundamental concept in accounting for the variation that seems to be central to describing and understanding English as a lingua franca.

**Metaphor and Intercultural Communication** Sep 05 2020 Metaphor and Intercultural Communication examines in detail the dynamics of metaphor in interlingual contact, translation and globalization processes. Its case-studies, which combine methods of cognitive metaphor theory with those of corpus-based and discourse-oriented research, cover contact linguistic and cultural contacts between Chinese, English including Translational English and Aboriginal English, Greek, Kabyle, Romanian, Russian, Serbian, and Spanish. Part I introduces readers to practical and methodological problems of the intercultural transfer of metaphor through empirical (corpus-based and experimental) studies of translators' experiences and strategies in dealing with figurative language in a variety of contexts. Part II explores the universality-relativity dimension of cross- and intercultural metaphor on the basis of empirical data from various European and non-European cultures. Part III investigates the socio-economic and political consequences of figurative language use through case studies of communication between aboriginal and mainstream cultures, in the media, in political discourse and gender-related discourses. Special attention is paid to cases of miscommunication and of deliberate re- and counter-conceptualisation of clichés from one culture into another. The results open new perspectives on some of the basic assumptions of the 'classic' cognitive paradigm, e.g. regarding metaphor understanding, linguistic relativity and concept-construction.
