[Sustainability in Coffee Production](#) \_\_\_\_\_ Apr 01 2020 Coffee, as a commodity and through its global value chains, is the focus of much interest to achieve fair trade and equitable outcomes for producers, processors and consumers. It has iconic cultural and economic significance for Colombia, which is one of the world's major coffee producers for the global market. This book examines sustainable coffee production in Colombia, specifically the initiatives of Nestlé to create shared value. It describes the transformation of the coffee landscape by the development of economically, socially and environmentally viable and dedicated supply chains. Suppliers have been encouraged to shift production and quality paradigms, in order to develop long-term and sustainable strategies for higher value and premium quality products. This has been partially achieved by establishing a robust partnership with the Coffee Growers Federation and other public, private and social actors, thereby taking control of the institutional architecture and knowledge base that exists in the country. The book provides an important lesson of corporate social responsibility and the creation of shared value for the benefit of farmers, corporations and consumers.

Special features include: • new research on the construction of future cities and smart cities • discussions of sustainability and new technologies designed to advance ideas to future city developments Graduate students and researchers in architecture, engineering, mathematical modeling, and building physics will be engaged by the contributions written by eminent international experts from a variety of disciplines including architecture, engineering, modeling, optimization, and related fields.

[Human Security and Japan's Triple Disaster](#) \_\_\_\_\_ Jun 23 2019 Japan has been one of the most important international sponsors of human security, yet the concept has hitherto not been considered relevant to the Japanese domestic context. This book applies the human security approach to the specific case of the earthquake, tsunami and nuclear accident that struck Japan on 11 March 2011, which has come to be known as Japan's 'triple disaster'. This left more than 15,000 people dead and was the most expensive natural disaster in recorded history. The book identifies the many different forms of human security that were produced or exacerbated within Japan by the triple disaster. Each chapter adds to the contemporary literature by identifying the vulnerability of Japanese social groups and communities, and examining how they collectively seek to prevent, respond to and recover from disaster. Emphasis is given to analysis of the more encouraging signs of human empowerment that have occurred. Contributors draw on a wide range of perspectives, from disciplines such as: disaster studies, environmental studies, gender studies, international relations, Japanese studies, philosophy and sociology. In considering this Japanese case study in detail, the book demonstrates to researchers, postgraduate students, policy makers and practitioners how the concept of human security can be practically applied at a policy level to the domestic affairs of developed countries, countering the tendency to regard human security as exclusively for developing states.

[The Social Sciences in the Asian Century](#) \_\_\_\_\_ Jan 11 2021 In this collection of essays, we reflect on what it means to practise the social sciences in the twenty-first century. The book brings together leading social scientists from the Asia-Pacific region. We argue for the benefit of dialogue between the diverse theories and methods of social sciences in the region, the role of the social sciences in addressing real-world problems, the need to transcend national boundaries in addressing regional problems, and the challenges for an increasingly globalised higher education sector in the twenty-first century. The chapters are a combination of theoretical reflections and locally focused case studies of processes that are embedded in global dynamics and the changing geopolitics of knowledge. In an increasingly connected world, these reflections will be of global relevance

[Challenging Entrepreneurship Research](#) \_\_\_\_\_ Jun 15 2021 The growth of entrepreneurship research has been accompanied by an increased convergence and institutionalization of the field. In many ways this is of course positive, but it also represents how the field has become "mainstream" with the concomitant risk that individual scholars become embedded in a culture and incentive system that emphasizes and rewards incremental research questions, while reducing the incentives for scholars to conduct challenging research. This book challenges this status quo from accepted theories, methodologies and paradigmatic assumptions, to the relevance (or lack of) for contemporary practice and the impact of key journals on scholars' directions in entrepreneurship research. An invited selection of the younger generation of scholars within the field of entrepreneurship research adopt a critical and constructive posture on what has been achieved in entrepreneurship research, the main assumptions which underly it, but also open-up new paths for creative entrepreneurship research in the future. This is a must-read for all scholars, educators and advanced students in entrepreneurship research.

[Private Equity](#) \_\_\_\_\_ Mar 01 2020 During the past few decades, private equity (PE) has attracted considerable attention from investors, practitioners, and academicians. In fact, a substantial literature on PE has emerged. PE offers benefits for institutional and private wealth management clients including diversification and enhancement of risk-adjusted returns. However, the lack of transparency, regulatory restrictions, and liquidity concerns that exist for some PE options limit their attractiveness for some investors. Private Equity: Opportunities and Risks offers a synthesis of the theoretical and empirical literature on PE in both emerging and developed markets.
