Cognitive Exploration of Language and Linguistics Mar 29 2022 Further-reading for each chapter; exercises for each chapter (solutions to exercises are available on www.benjamins.com). This Second Revised Edition has been updated, corrected, and further improved after 5 years of successful classroom use.

Integrative Learning of Theory and Practice Nov 24 2021 This book addresses the questions of what constitutes the integrative learning of theory and practice (ILTP), and how this learning progresses over time - these are important questions that have been overlooked to date. It introduces a new way of looking at the theory-practice integration and presents the conceptual and empirical research that has led to such a view. The conceptualisation of the ILTP and the description of the phenomenon of integration draw on psychological aspects of epistemological beliefs in TVET, and on philosophical aspects of social reasoning. In this inferentialist, non-dualistic epistemological perspective, theory and practice are distinguished in terms of their use in reasoning, rather than as intrinsically different forms of knowledge. In particular, the integrative learning is presented in terms of qualitative changes in chains of reasoning that connect theoretical and practical considerations. This work represents a contribution to further educational research, as it advances a novel operationalisation of the inferentialist framework. Finally, this work contributes to educational practice, as it offers evidence-based guidelines for practitioners concerned with instructional design in T-VET. The reported empirical investigations involved in-depth qualitative research methods and were conducted at a micro-level of instruction in alternating school-based and work-based

programmes, in the field of Chemicals Processing Technology (CPT).

Critical issues in the history of spaceflight Dec 02 2019

The Sacraments Jan 27 2022

The Oxford Handbook of Music Performance, Volume 1 Feb 13 2021 The two-volume 'Oxford Handbook of Music Performance' provides the most comprehensive and authoritative resource for musicians, educators and scholars currently available. It is aimed primarily for practicing musicians, particularly those who are preparing for a professional career as performers and are interested in practical implications of psychological and scientific research for their own music performance development; educators with a specific interest or expertise in music psychology, who will wish to apply the concepts and techniques surveyed in their own teaching; undergraduate and postgraduate students who understand the potential of music psychology for informing music education; and researchers in the area of music performance who consider it important for the results of their research to be practically useful for musicians and music educators.

Exploration and Meaning Making in the Learning of Science Feb 25 2022 Mountaineers, Rock Climbers, and Science Educators Around the 1920s, rock climbing separated from mountaineering to become a separate sport. At that time European climbers developed new equipment and techniques, enabling them to ascend mountain faces and to climb rocks, which were considered unassailable up to that time. American climbers went further by expanding and improving on the equipment. They even developed a system of quantification where points were given for the degree of difficulty of an ascent. This system focused primarily on the pitch of the mountain, and it even calculated up to de- mals to give a high degree of quantification. Rock climbing became a technical system. Csikszentmihaly (1976) observed that the sole interest of rock climbers at that time was to

climb the rock. Rock climbers were known to reach the top and not even glance around at the scenery. The focus was on reaching the top of the rock. In contrast, mountaineers saw the whole mountain as a single "unit of perception." "The ascent (to them) is a gestalt including the aesthetic, historical, personal and physical sensations" (Csikszentmihaly, 1976, p. 486). This is an example of two contrasting approaches to the same kind of landscape and of two different groups of people. Interestingly, in the US, Europe, and Japan a large segment of the early rock climbers were young mathematicians and theoretical physicists, while the mountaineers were a more varied lot.

[Mentoring-coaching](#) May 07 2020 No further information has been provided for this title.

Empowerment Through Agency Enhancement Dec 14 2020 This book focuses on the understanding of factors and mechanisms involved in the development of agency mainly in three related contexts --- participatory development, extension work, and service transactions. The research has its starting point in the recognition of the critical role played by "agency" (commonly understood as want/will for and practice of self-determination and self-management) on the part of intended beneficiaries of services and projects for effective implementation and sustainability. It is designed to address this subject matter with its principal focus on inner capacities and orientations of human beings, posing questions as to how such capacities and orientations could be enhanced and activated in practice by external actors in the field of public policies for socioeconomic and international development. The project is organized transcending traditional disciplinary boundaries --- combining anthropological, psychological, and economic approaches and perspectives. Mine Sato is Associate Professor specializing in International Development Studies and Applied Anthropology, currently working at Institute of Urban Innovation, Yokohama National University. She has various work experiences with international cooperation agencies such as UNICEF, JBIC and JICA as a social

development specialist. Her main fields are Central America as well as Japan. Nobuo Sayanagi is Professor of developmental and social psychology at Yamanashi Eiwa College. He is one of the few psychological researchers in the world working in the field of development aid and has been working as an advisor to Japan International Cooperation Agency's Smallholder Horticulture Empowerment and Promotion (SHEP) approach as well as a collaborator in a number of other projects. Toru Yanagihara is Professor Emeritus of international development studies at Takushoku University and Honorary Research Fellow at the Institute of Developing Economies. He has served as advisor and consultant for Japanese government and international organizations, including United Nations University, World Bank, and Asian Development Bank Institute. He has been on the editorial board of a number of academic journals, including World Development and Journal of International Development Studies. .

Rhetorical Criticism Nov 05 2022 "Sonja Foss, who has an enviable talent for synthesizing complex rhetorical concepts and processes into clear explanations, presents nine methods of rhetorical criticism. She carefully explains and illustrates the theory behind each method with abundant examples of applications. Interesting and lively essays, some written by students, encourage readers to develop their critical skills. Useful bibliographies list additional samples for each type of criticism." "Rhetorical criticism is not a process confined to a few assignments in a rhetorical or media criticism course. It is an everyday activity we can use to understand our responses to symbols of all kinds and to create our own symbols to generate the responses we desire." --Book Jacket.

Clinical Lectures on the Principles and Practice of Medicine Sep 10 2020

Breaking Tradition Dec 26 2021 Breaking Tradition is a fascinating supplement to any language methods course as it analyzes the hotly contested debate between grammar-based approaches to

language teaching and more communicative schools of thought. The author's historical framework provides new perspectives on the current debate about approaches to language teaching. The writing style is engaging.

The Routledge Companion to Knowledge Management Jan 15 2021 Knowledge when properly leveraged and harnessed contributes to effective organizational performance. How much an organization benefits from knowledge would depend on how well knowledge has been managed. There have been challenges to implementing knowledge management in today's dramatically different world from before. This comprehensive reference work is a timely guide to understanding knowledge management. The book covers key themes of knowledge management which includes the basic framework of knowledge management and helps readers to understand the state of art of knowledge management both from the aspects of theory and practice, from the perspectives of strategy, organization, resources, as well as institution and organizational culture. This reference work reflects the increasingly important role of both philosophy and digital technologies in knowledge management research and practice. This handbook will be an essential resource for knowledge management scholars, researchers and graduate students.

Complex Artificial Environments Jun 27 2019 Juval Portugali The notion of complex artificial environments (CAE) refers to theories of complexity and self-organization, as well as to artifacts in general, and to artificial environments, such as cities, in particular. The link between the two, however, is not trivial. For one thing, the theories of complexity and self-organization originated in the "hard" science and by reference to natural phenomena in physics and biology. The study of artifacts, per contra, has traditionally been the business of the "soft" disciplines in the humanities and social sciences. The notion of "complex artificial environments" thus implies the supposition that

the theories of complexity and self-organization, together with the mathematical formalisms and methodologies developed for their study, apply beyond the domain of nature. Such a position raises a whole set of questions relating to the nature of 21 century cities and urbanism, to philosophical issues regarding the natural versus the artificial, to the methodological legitimacy of interdisciplinary transfer of theories and methodologies and to the implications that entail the use of sophisticated, state-of-the-art artifacts such as virtual reality (VR) cities and environments. The three-day workshop on the study of complex artificial environments that took place on the island of San Servolo, Venice, during April 1-3, 2004, was a gathering of scholars engaged in the study of the various aspects of CAE.

Die Kraft gelebter Gegenwart Nov 12 2020 Angst, Wut, Trauer - negative Gefühle wie diese, zurückgehend bis in die Kindheit und längst vergessen geglaubt, beeinflussen täglich unser Erleben und hindern uns daran, absolut im Jetzt zu sein. Jeder Versuch, zu innerem Frieden und Gelassenheit zu gelangen, ist zum Scheitern verurteilt, solange diese Gefühle unterdrückt und ausgeblendet werden. Mit Hilfe Michael Browns 10-wöchiger Reise lernt der Leser, diese Hindernisse zu erkennen und anzunehmen, um schließlich im intensiven Erleben der Gegenwart anzukommen.

The Practice of Philosophy in Plato and Plotinus May 19 2021 Plato said over 2,500 years ago that “an unexamined life for a man is not worth living.” To examine one’s life, on a regular basis, cannot but lead to a consideration of virtue, which in turn leads to a search for the Good, which both Plato and Plotinus say all men naturally seek. What we call a good informs the value system we live by, but a good can only reflect the Good, if it is good for our soul and the soul of our neighbor, any more than we can claim virtue with a mote in our eye. Are the wrongs perceived in society also in

ourselves, for where else could they have come from? So we need a different kind of inquiry and a different order of reflection; an inquiry that reveals errors in how we see things and a reflection that seeks a spiritual dimension to how we see things. It does not matter if it is called contemplation or meditation, for the principle of prayer has been with us ever since man first intimated the presence of the Divine.

Transitions to School - International Research, Policy and Practice Jul 21 2021 This book provides an important compilation and synthesis of current work in transition to school research. The book focuses strongly on the theoretical underpinnings of research in transition to school. It outlines key theoretical positions and connects those to the implications for policy and practice, thereby challenging readers to re-conceptualize their understandings, expectations and perceptions of transition to school. The exploration of this range of theoretical perspectives and the application of these to a wide range of research and research contexts makes this book an important and innovative contribution to the scholarship of transition to school research. A substantial part of the book is devoted to detailed examples of transition to school practice. These chapters provide innovative examples of evidence-based practice and contribute in turn, to practice-based evidence. The book is also devoted to considering policy issues and implications related to the transition to school. It records a genuine, collaborative effort to bring together a range of perspectives into a Transition to School Position Statement that will inform ongoing research, practice and policy. The collaborative, research, policy and practice based development of this position statement represents a world-first.

Doing Practitioner Research Differently Jun 07 2020 This book encourages those embarking on practitioner research to consider the validity of innovative methods and styles of reporting. It

explores issues at a theoretical as well as a practical level.

Critical Thinking Sep 03 2022 In this book, Jennifer Moon explores and clarifies critical thinking and provides practical guidance for improving student learning and supporting the teaching process. Key themes covered include: different views of and approaches to critical thinking with an emphasis on a practical basis that can be translated into use in the classroom. links between learning, thinking and writing the place of critical thinking alongside other academic activities such as reflective learning and argument critical thinking and assessment, class environments, staff knowledge and development, writing tasks and oral tasks. Teachers in all disciplines in post-compulsory education will find this approach to defining and improving students' critical thinking skills invaluable.

An Exploration of Place-Based TESOL Aug 10 2020 This study interrogates the assumption that the classroom is the best place for teaching English to speakers of other languages (TESOL). It explores postmodern pedagogies that dissolve the boundaries between classroom and community and shows how these might transform TESOL practice. Based on the extensive reflections of 15 participants, it analyses the range and properties of the places of their English acquisition and finds the classroom to be an insufficient place because its social relations limit learner agency. To overcome this it recommends that English classrooms be transformed into laboratories for critical reflection on students' social concerns, leading to participative language learning as they actively seek solutions within local English speaking communities of practice. This explorative study is situated within the critical paradigm of language education research

Mentalization-Based Group Therapy (MBT-G) Feb 02 2020 Mentalization-based treatment (MBT) has gained international acclaim as an efficient treatment for patients with borderline personality disorder. The approach is also helpful for other personality disorders and conditions that are difficult

to treat, e.g. addiction and eating disorders. MBT consists of a psychoeducational, an individual, and a group therapy component. This is the first comprehensive manual for mentalization-based group therapy. The author has developed the manual in close cooperation with Anthony Bateman and a team of group analysts. It covers all the aspects of MBT which are necessary to produce an informed and qualified group therapist. The book covers the theory behind mentalization and borderline personality disorder (especially its evolutionary roots), the structure of MBT and a discussion of previous experiences with group psychotherapy for borderline patients. The core of the book explains the main principles of MBT-G and provides a powerful means for ensuring that therapists adhere to these principles in a qualified way. The last part contains a full transcript from a real MBT group composed of borderline patients. As the first book dedicated to Group MBT, this book is a valuable and unique addition to the Mentalization literature.

Coalbed Methane in China Aug 29 2019 The coalbed methane (CBM) reserve in China ranks third in the world with a total resource of 36.8×10^{12} m³. Exploitation of CBM has an important practical significance to ensure the long-term rapid development of China natural gas industry. Therefore, in 2002, the Ministry of Science and Technology of China set up a national 973 program to study CBM system and resolve problems of CBM exploration and exploitation in China. All the main research results and new insights from the program are presented in this book. The book is divided into 11 chapters. The first chapter mainly introduces the present situation of CBM exploration and development in China and abroad. Chapters 2 through 9 illustrate the geological theory and prospect evaluation methods. Then chapters 10 and 11 discuss CBM recovery mechanisms and technology. The book systematically describes the origin, storage, accumulation and emission of CBM in China, and also proposes new methods and technologies on resource evaluation, prospect

prediction, seismic interpretation and enhanced recovery. The book will appeal to geologists, lecturers and students who are involved in the CBM industry and connected with coal and conventional hydrocarbon resources research.

Autonomous Vehicle Technology Oct 24 2021 The subject of this book is artificial intelligence (AI), introducing the fast road sensing algorithm and system based on image pattern recognition for unmanned vehicle, especially for traffic sign recognition and complex road recognition. With rich figures and credible data, this book systematically and comprehensively describes the core technology and industrialization focus of today's unmanned vehicle system, which can be used as a reference for R & D Engineers and industrialization practitioners of unmanned vehicle, and it can also be used as a teaching material for higher grades and postgraduates in colleges and universities.

Unconventional Petroleum Geology Jan 03 2020 Unconventional Petroleum Geology, Second Edition presents the latest research results of global conventional and unconventional petroleum exploration and production. The first part covers the basics of unconventional petroleum geology, its introduction, concept of unconventional petroleum geology, unconventional oil and gas reservoirs, and the origin and distribution of unconventional oil and gas. The second part is focused on unconventional petroleum development technologies, including a series of technologies on resource assessment, lab analysis, geophysical interpretation, and drilling and completion. The third and final section features case studies of unconventional hydrocarbon resources, including tight oil and gas, shale oil and gas, coal bed methane, heavy oil, gas hydrates, and oil and gas in volcanic and metamorphic rocks. Provides an up-to-date, systematic, and comprehensive overview of all unconventional hydrocarbons Reorganizes and updates more than half of the first edition content, including four new chapters Includes a glossary on unconventional petroleum types, including tight-

sandstone oil and gas, coal-bed gas, shale gas, oil and gas in fissure-cave-type carbonate rocks, in volcanic reservoirs, and in metamorphic rocks, heavy crude oil and natural bitumen, and gas hydrates Presents new theories, new methods, new technologies, and new management methods, helping to meet the demands of technology development and production requirements in unconventional plays

Reclaiming Your Body Jul 29 2019 A guided tour through the body's innate healing powers Many of us have learned to ignore, deny, or even mistrust the wise messages our bodies give us. The result is that when trauma strikes, a time when we need every aspect of our beings to master the challenge, we may find ourselves disconnected from our greatest strengths. Suzanne Scurlock-Durana, who has spent thirty years studying the gifts of the body and teaching thousands how to reclaim them, began to recognize this strength, which she likens to a GPS, when she herself experienced a life-threatening trauma. Here she walks readers through different areas of the body, revealing the wisdom they hold and how to reconnect with that wisdom. As she shows in this warm, compassionate book, the body's abilities are always available; we must simply reconnect with them.

Designing and Implementing the Curriculum Apr 17 2021 This book presents the most important topics relevant to designing the school curriculum. These topics include learning theory, assessment and evaluation of learning, unit planning and lesson planning. A review of the most important information regarding each topic and an update on the research are presented. Best Practices Observation Instruments, BPOIs, identify the criteria for teaching each topic effectively along with a method for teachers to become proficient at implementing each topic.

Act and Think -- My Educational Exploration and Practice Oct 04 2022

Comprehensive Practice of Exploration and Evaluation Techniques in Complex Reservoirs

Aug 02 2022 This book covers exploration and evaluation practices for various types of complex reservoirs, and summarizes a series of practical and effective techniques and methods. For example, it shows how, by integrating multiple types of new logging technology, complex reservoir petrophysics evaluation can be performed using high-precision core experiment data and quantitative logging interpretation; and demonstrates how the technology of sporopollen assemblage and palynofacies analysis can improve the time precision of sequence stratigraphy and the quantitative study level of sedimentary facies, respectively. It discusses how reservoir lateral prediction and vertical resolution can be substantially improved by integrating fracture prediction and geostatistical inversion; and presents innovative log interpretation charts for the lithological identification of metamorphic rocks, e.g. GR-DEN crossplot and Impedance-Resistivity crossplot. To support the main content, the book features a wealth of high-resolution, thin-section images, quantitative illustrations of palynofacies composition, multi-property overlapping map set and quantitative tables. It offers an essential reference guide for researchers in geological exploration and evaluation, and will also appeal to a broad readership, from engineering technicians to advanced graduate students in related areas.

Geological Methods in Mineral Exploration and Mining Mar 17 2021 This book is written as a practical field manual to effective. Each geologist has to develop his/her be used by geologists engaged in mineral exploration own techniques and will ultimately be judged on results. It is also hoped that it will serve as a text results, not the process by which these results and reference for students in Applied Geology were reached. In mineral exploration, the only courses of universities and colleges. The book 'right' way of doing anything is the way that aims to outline some of the practical skills that locates ore in the quickest and most cost-effective turn the graduate geologist into an

explo manner. It is preferable, however, for an individual to develop his/her own method of operation book, rather than as a text on geological or ore after having tried, and become aware of, those deposit theory. procedures which experience has shown to work An explorationist is a professional who search well and which are generally accepted in industry as good exploration practice. es for ore bodies in a scientific and structured way. Although an awkward and artificial term, The chapters of the book approximately fol this is the only available word to describe the low the steps which a typical exploration pro totality of the skills which are needed to locate gramme would go through. In Chapter 1, the and define economic mineralization.

Children's Exploration and Cultural Formation Sep 22 2021 This open access book examines the educational conditions that support cultures of exploration in kindergartens. It conceptualises cultures of exploration, whether those cultures are created through children's own engagement or are demanded of them through undertaking specific tasks within different institutional settings. It shows how the conditions for children's exploration form a web of activities in different settings with social relationships, local landscapes and artefacts. The book builds on the understanding of cultural traditions as deeply implicated in the developmental processes, meaning that local considerations must be reflected in education for sustainable futures. Therefore the book examines and conceptualises exploration and cultural formation through locally situated cases and navigates toward global educational concepts. The book provides different windows into how children may explore in everyday practice settings in kindergarten, and contributes to a loci-based, ecological, integral knowledge relevant for early childhood education.

Critical Thinking Apr 29 2022 In this book, Jennifer Moon explores and clarifies critical thinking and provides practical guidance for improving student learning and supporting the teaching process. Key

themes covered include: different views of and approaches to critical thinking with an emphasis on a practical basis that can be translated into use in the classroom. links between learning, thinking and writing the place of critical thinking alongside other academic activities such as reflective learning and argument critical thinking and assessment, class environments, staff knowledge and development, writing tasks and oral tasks. Teachers in all disciplines in post-compulsory education will find this approach to defining and improving students' critical thinking skills invaluable.

First Steps Sep 30 2019 Starting off on the path of self-discovery and spiritual exploration is not always easy. This book identifies a few, but essential threads. These include the contemplation of our attitudes and actions, the exploration of the inner and sacred dimensions of self and life, and service.

Information Circular Apr 05 2020

Mastering Executive Function Jul 09 2020 This workbook is designed by educators who use the latest brain research and interactive learning strategies to build executive function skills in adolescents. Students will learn how to organize, prioritize, plan, and get things done. Mastering Executive Function is designed to cultivate skills in all students so they can find purpose and achieve their goals. Watch as students go from potential to possible and develop agency, confidence, and self-awareness on their journey through school and life.

Reading as Democracy in Crisis Oct 12 2020 Reading as Democracy in Crisis: Interpretation, Theory, History explores the dialectic between historical conditions and the reading strategies that arise from them. It explores the relationship between democracies that are perpetually in crisis and the seemingly unlimited freedom of our reading practices.

Language Exploration and Awareness May 31 2022 Shows English teachers how they can expand their curriculum beyond the traditional emphases on grammar and syntax, to help their students

learn about many aspects of the English language, including general semantics, regional and social dialects, syntax, spelling, lexicography, and word origins. This book is suitable for classroom teachers.

The Practitioner Viewpoint Jun 19 2021

The Promise of Social Enterprise Oct 31 2019 Is social enterprise yet another example of the expansion of the market into all areas of life and society, in this case the marketization of poverty? Or does it offer genuine hope as part of a solution to some of the challenges facing contemporary society, and as an example of an economy of mutuality? Framing this question theologically, does it offer the potential of "faithful economic practice"? The Promise of Social Enterprise makes the case that how we answer this depends on the language we use to describe--and perform--social enterprise. Arguing for the need to move beyond the narrow and reductionistic logic of mainstream economics, the economic nature of the language of gift and mutuality is explored. Drawing on the theological framework of Pope Benedict XVI and the work of John Barclay on Paul's understanding of the social implications of the Christ-gift, this book considers the contribution that a theology of gift, with its incongruity and mutuality, makes to the theory and practice of social enterprise.

International Commerce Mar 05 2020

Career Exploration and Development in Childhood Jul 01 2022 Career Exploration and Development in Childhood presents chapters from leading figures in the field of childhood career exploration and development. The first substantive edited collection of its kind, this book makes an important contribution to our understanding of children's career development. It provides cutting-edge theory, research and practice for understanding and fostering career exploration and development during childhood, across a wide spectrum of international settings. Divided into five

sections that reflect the authors' perspectives on critical aspects of children's career development, chapters include relevant research, as well as the practical application of concepts, issues and strategies for career interventions with children. The book includes sequential sections on theory, research, contextual influences, assessment, and the facilitation of career exploration and development. Perspectives from both developed and developing world contexts consider traditional approaches to career education, as well as career development learning in childhood. The collaborations evident in the chapter authorship reflect the significant internationalisation of the field of child career development. The book synthesises key issues and presents innovative recommendations that will not only enhance our understanding of children's career development, but will set the agenda for the future of the field. It will be of key interest to researchers, academics and postgraduate students in the fields of career development, career guidance, education, childhood, child development and counselling.

Stealing Time Aug 22 2021 An authoritative guide that explores in depth the cultural, technological and methodological concerns to practice three-timezone (3TZ) e-learning in educational contexts. It is important from a pedagogical and practical perspective to impart educational methods and tools that will enable students to be ready for the interconnected, cross-collaborative work environment advocated by modern business practice. The 'local is global' paradigm provides the platform on which students are able to effectively build their knowledge repertoire through the interaction and exchange of project tasks amongst local/global teams, where the traditional barriers of time and location are no longer applicable. The situational and social learning dimensions gained from the explored issues covered in the book will provide a greater awareness to the reader for the need for teaching practice for the '3TZ' enabled workforce.
