EBOOK: Beginning to Play May 15 2021 "I hope this book will inspire early years practitioners, lecturers and trainers to stop and think in the hustle and bustle of daily practice, to take a fresh look at the play of these very young children. This book does not claim to have all the answers but seeks to challenge practitioners to observe closely and respond to babies as they begin to play." Elinor Goldschmied, author of *People under Three: Young Children in Day Care* This book focuses on the need to equip practitioners to meet the play needs of children in today's early years settings. With babies and very young children increasingly being cared for in out-of-home care settings, it is essential for early years practitioners to be responsive and reflective to ensure that these young children's needs are met in an appropriate way. *Beginning to Play* explores the young child's right to a high quality, multi-sensory play environment where play really can begin. It builds on Goldschmied's concept of Treasure Basket play, which involves a wide variety of everyday objects gathered together to stimulate all five senses of babies and young children. The book features detailed observations of babies beginning to play at and beyond the treasure basket. These observations support readers in offering rich play materials and experiences. Providing valuable insights and practical support, this reader-friendly book: Encourages practitioners to reflect on and review their own current practice. Supports readers in recognising and responding to babies' signals and communication Emphasises the need for emotional well-being to enable babies and young children to begin to play and examines the effects of non-responsive care on babies and young children *Beginning to Play* is essential reading for practitioners working with children from birth to three, students on Early Childhood Studies courses, and other readers who are eager to increase their knowledge about children

from birth to three.

Beginning Teaching, Beginning Learning is essential reading for student and newly qualified early years and primary teachers and practitioners, as well as those who educate and train them. "This outstanding book should be a core text for beginning teachers working in the birth to 11 age range. It places Early Years and Primary education in the historical context and encourages new teachers to become reflective practitioners by adopting a questioning approach based on thoughtful comparative experiences. One aspect which makes this stand out from other similar texts is the focus it has on developing a deep understanding of the partnership between children's learning and the beginner teacher. Contributors, many of whom have been teachers themselves, include experts not only in their specific fields of interest but also in teacher education more broadly so understand what is relevant for those on initial teacher education courses and those in the early stages of their teaching career." Jane Warwick, Primary PGCE Course Manager, University of Cambridge, UK

"Beginning Teaching, Beginning Learning should be a core text on all birth to 11 years ITT courses. The book neatly combines grounded cameos of actual teaching experience with real life questions and dovetails these with a thoroughly referenced scholarly critique. Through its engaging style and approach the book speaks clearly and directly to the inquisitive, curious and professional novice teacher who wishes to be both thoroughly reflective and knowledgeable of the latest research. This book is hugely successful as it manages to be both very wide in its content whilst encouraging a questioning and in-depth critical thinking throughout". Easy Money Feb 09 2021 We live in an era when coloured pieces of paper are deemed to be money. But this was not how things always were. In the United States, tobacco was money for longer than gold was. In parts of ancient India, almonds were money. Corn was money in Guatemala. In the rice-producing nations of Philippines, Japan and Burma, standardized portions of rice served as money. Salt was money in the Sahara Desert. How did these commodities disappear as money? What role did the rise of banking play in the rise of paper money? How has paper money at various points of time destroyed financial systems? And, most importantly, how do the same mistakes which were made earlier continue to be made in the modern era? Vivek Kaul answers these and many more questions in the first book in the Easy Money series.
