Contemporary Consumer Health

Informatics Mar 12 2021 This innovative reference examines how consumer health informatics (CHI) can transform healthcare systems stressed by staffing shortages and budget constraints and challenged by patients taking a more active role in their care. It situates CHI as vital to upgrading healthcare service delivery, detailing the relationship between health information technologies and quality healthcare, and outlining what stakeholders need to learn for health IT systems to function effectively. Wide-ranging content identifies critical issues and answers key questions at the consumer, practitioner, administration, and staff

levels, using examples from diverse conditions, countries, technologies, and specialties. In this framework, the benefits of CHI are seen across service domains, from individual patients and consumers to healthcare systems and global health entities. Included in the coverage: Use of video technology in an aged care environment A context-aware remote health monitoring service for improved patient care Accessibility issues in interoperable sharing of electronic health records: physician's perspective Managing gestational diabetes with mobile web-based reporting of glucose readings An organizing vision perspective for developing and adopting e-health solutions An ontology of consumer health informatics Contemporary Consumer

Health Informatics combines blueprint and idea book for public health and health informatics students, healthcare professionals, physicians, medical administrators, managers, and IT practitioners.

Advancing a Jobs-Driven Economy Aug 05 2020 Aligning corporate, education, and community partners requires that we rethink and redesign the system that supports Science, Technology, Engineering and Mathematics (STEM) education and workforce preparedness. What's at stake? Nothing less than the sustainability of our schools, the innovative engines of our businesses, the prosperity of communities, and the global competitiveness of our economies. *Advancing A Jobs Driven Economy* is a call to action and provides the framework for how business, education, and communities can cultivate a sustainable pipeline of STEM talent. *Destined Statecraft* Sep 25 2019 'Destined Statecraft enriches our understanding of global affairs by presenting a perspective where small

powers are no longer in the periphery, but take up the main narrative. This standpoint is all the more valuable in an age where the proactive decision-making of small powers often goes unobserved. Professor Wong's *Destined Statecraft* offers a fresh lens for discerning world issues, helping to extend the reader's vision beyond the exterior towards a greater perception of the world we live in.' —Mr Sungnam Lim, Vice-Minister of Ministry of Foreign Affairs, Republic of Korea This book considers the post-2010 strategic shifts in the Anglo-American geopolitical approach to Asia as a pivotal new strategy in the U.S. geo-strategic containment plan, which has been reformed to rebalance the rise of China and the Eurasian heartland in the course of the two decades since the disintegration of the Soviet Union in the early 1990s. At this critical global-historical juncture, the People's Republic of China has also devised a new counter-containment endeavor – the 'One Belt One Road' initiative, which aims to

re-connect it with all the countries on the Eurasian landmass, forming a single community. Against this backdrop of the intensifying geopolitical and geo-economic competition between the U.S. and China, this book calls for the revival and reinvigoration of selected Eurasian small powers' embedded geopolitical, political-economic and strategic-cultural structures. Drawing on Pierre Bourdieu's notion of habitus, the book argues that these self-changing and unceasingly structuring structures do not only constrain and limit, but also enable and galvanize small powers' strategists and policy-makers to proactively generate creative means-and-ends calculations, conduct prudent security assessments, and devise measured and responsive strategic deployments. In this context, the book proposes that the small powers return to their own religious, cultural and intellectual roots. It also argues for the need to rediscover their own strategic cultures as an essential means of re-inventing and

implementing their own unique models of national development. As a substantial contribution to the subfields of small power politics and strategic cultures in international relations, the book marks a paradigm shift in both theory and practice. Exploring historical case studies from such diverse African, Asian and European powers as the Philippines, Liberia, Myanmar, India, Nepal, Sri Lanka, Bangladesh, Pakistan, Thailand, Germany, Japan, Indonesia, Russia, the European Union, Ukraine, Poland and the United Kingdom as well as China, the book presents engaging dialogues with a wealth of classical and contemporary Western and non-Western strategic thinkers, including: Thucydides, Sun Tzu, Halford Mackinder, Kautilya, King Solomon, Li Zongwu, King Bhumibol Adulyadej, Karl Haushofer, Carl Schmitt and the Malayo-Polynesian datu, as well as John Mearsheimer. In light of the post- 2017 U.S. 'America First' foreign policy agenda, this book represents an essential guide for small

powers' strategists, foreign policy-makers, security practitioners and national development planners - introducing them to a broader spectrum of strategic options that will help them not just survive, but thrive in the constantly shifting geopolitical currents of our time.

Iraq in the Twenty-First Century Mar 24 2022

Much has been written about the events surrounding the 2003 Anglo-American invasion of Iraq and its aftermath, especially about the intentions, principles, plans and course of action of US policy, but much less attention has been given to the consequences of US policy on Iraqi political and social development. This book provides an in-depth analysis of the impact of US policy on the social and political development of Iraq in the twenty-first century. It shows how not just the institutions of the state were destroyed in 2003, leaving the way open for sectarianism, but also the country's cultural integrity, political coherence, and national-oriented economy. It outlines how Iraq has been economically

impoverished, assessing the appalling situation which ordinary people, including women and children, have endured, not just as a result of the 2003 war, but also as a consequence of the 1991 war and the sanctions imposed in the following years. The book argues that the social, political, and cultural ruin that accompanied the Iraq war was an absolute catastrophe; that the policies which had such adverse effects were the foreseeable consequences of deliberate policy choices; and that those responsible continue to evade being made accountable.

Terrorist Use of Cryptocurrencies Oct 07 2020

The success of counterterrorism finance strategies in reducing terrorist access to official currencies has raised concerns that terrorist organizations might increase their use of such digital cryptocurrencies as Bitcoin to support their activities. RAND researchers thus consider the needs of terrorist groups and the advantages and disadvantages of the cryptocurrency technologies available to them.

Regional Economic Outlook, April 2015: Western Hemisphere Department Dec 09 2020 The

**Read Online Life Science Paper 2014

economic outlook for Latin America and the Caribbean remains very challenging. Regional growth is projected to decline for a fifth consecutive year in 2015, dipping below 1 percent. Weakness is concentrated among South America's commodity exporters, where falling global commodity prices have compounded country-specific challenges. Meanwhile, growth is projected to be steady or stronger for most of the Caribbean, Central America, and Mexico, supported by lower oil bills for importers and robust economic recovery in the United States. The analysis in this report examines core challenges facing the region: the impact of lower commodity prices on fiscal and external positions, the drivers of the slowdown in investment, and the role of economic diversification for longer-term growth prospects.

Organic Coatings Feb 20 2022 The definitive guide to organic coatings, thoroughly revised and updated—now with coverage of a range of topics not covered in previous editions Organic

Coatings: Science and Technology, Fourth Edition offers unparalleled coverage of organic coatings technology and its many applications. Written by three leading industry experts (including a new, internationally-recognized coatings scientist) it presents a systematic survey of the field, revises and updates the material from the previous edition, and features new or additional treatment of such topics as superhydrophobic, ice-phobic, antimicrobial, and self-healing coatings; sustainability, artist paints, and exterior architectural primers. making it even more relevant and useful for scientists and engineers in the field, as well as for students in coatings courses. The book incorporates up-to-date coverage of recent developments in the field with detailed discussions of the principles underlying the technology and their applications in the development, production, and uses of organic coatings. All chapters in this new edition have been updated to assure consistency and to enable extensive cross-referencing. The material

presented is also applicable to the related areas of printing inks and adhesives, as well as areas within the plastics industry. This new edition Completely revises outdated chapters to ensure consistency and to enable extensive cross-referencing Correlates the empirical technology of coatings with the underlying science throughout Provides expert troubleshooting guidance for coatings scientists and technologists Features hundreds of illustrative figures and extensive references to the literature A new, internationally-recognized coatings scientist brings fresh perspective to the content. Providing a broad overview for beginners in the field of organic coatings and a handy reference for seasoned professionals, Organic Coatings: Science and Technology, Fourth Edition, gives you the information and answers you need, when you need them.

Global Africans Nov 19 2021 "Black," "African," "African descendant" and "of African heritage," are just some of the ways Africans and Africans

in the diaspora (both old and new) describe themselves. This volume examines concepts of race, ethnicity, and identity as they are ascribed to people of colour around the world, examining different case studies of how the process of identity formation occurred and is changing. Contributors to this volume, selected from a wide range of academic and cultural backgrounds, explore issues that encourage a deeper understanding of race, ethnicity and identity. As our notions about what it means to be black or of African heritage change as a result of globalization, it is important to reassess how these issues are currently developing, and the origins from which these issues developed. *Global Africans* is an important and insightful book, useful to a wide range of students and scholars, particularly of African studies, sociology, diaspora studies, and race and ethnic studies.

[School Memories](#) Nov 07 2020 This book reveals how school memories offer not only a tool for

accessing the school of the past, but also a key to understanding what people today know (or think they know) about the school of the past. It describes, in fact, how historians' work does not purely and simply consist in exploring school as it really was, but also in the complex process of defining the memory of school as one developed and revisited over time at both the individual and collective level. Further, it investigates the extent to which what people "know" reflects the reality or is in fact a product of stereotypes that are deeply rooted in common perceptions and thus exceedingly difficult to do away with. The book includes fifteen peer-reviewed contributions that were presented and discussed during the International Symposium "School Memories. New Trends in Historical Research into Education: Heuristic Perspectives and Methodological Issues" (Seville, 22-23 September, 2015).

unconscious biases and misconceptions about people from ethnic and racial minority groups. *Managing Microaggressions* is intended for mental health clinicians who want to be more effective in their use of evidence-based practices with people of color. Many well-intentioned clinicians lack the necessary skills and knowledge to effectively engage those who are ethnoracially different. This book discusses the theoretical basis of the problem (microaggressions), the cognitive-behavioral mechanisms by which the problem is maintained, and how to remedy the problem using CBT principles, with a focus on the role of the therapist. Not only will readers learn how to avoid offending or harming their clients, they will also be better equipped to help clients navigate microaggressions they encounter in their daily lives. *Managing Microaggressions* will endow clinicians with a clear understanding of these behaviors and the errors that underpin them, leading to more successful therapy.

Monetary Policy, Financial Crises, and the Macroeconomy May 14 2021 This volume investigates different aspects of monetary policy and prevention of financial crises. It discusses some recently suggested measures for central banks' responses to liquidity shortages and to the liquidity trap, methods for assessing the potential of crisis contagion via the interbank network, and the interaction between micro- and macro-prudential regulation. It compares different approaches for solving the Eurozone sovereign-debt problem and provides a new and intriguing explanation for rising income inequality. The authors are experts on monetary policy, financial crises, and contract theory from different European universities and central banks.

Transboundary Water Cooperation Mar 31 2020 China and its neighbours face a series of water security issues, in which international law plays a vital role. Paramount to both policymakers and researchers in the field of

water law, the current status of transboundary water cooperation schemes and how these operate in China is of global significance. Grounded in international experience, this comprehensive volume provides readers with an up-to-date overview of current international transboundary water resource sharing policies and practices, including detailed case studies at both domestic and international levels. The authors discuss existing international laws, treaties, and principles that may stimulate transboundary water cooperation and dialogue, and then analyse a number of international experiences with treaties in North America, Eastern Europe, and Central Asia. They take stock of China's water resource issues, legal practices and options, examine case studies of China's southern shared rivers, and explore some innovative approaches to cooperative management of shared waters within China. The articles in this book were originally published in the journal *Water International*.

Pensions and Legal Policy Jun 26 2022 This monograph explores the historical position of pensions law in the UK and the recent influences which have led to the introduction of Auto-Enrolment and subsequent reforms. Alternative models, such as the US and Australia, are also considered as well as the function of law in bringing about political changes. The question of saving for retirement is of national and international importance and many governments are wrestling with the issue of how to deal with the pension funding crisis. Consequently political policy has, in many cases, combined with behavioural science to inform new laws which have acted to shift the burden from the state into the private sector. Around the world responsibility is being moved onto individuals and employers as the state retreats from provision of state support in retirement; this book offers a sophisticated analysis of the role of legal intervention to facilitate this shift. The book explores the work of behavioural

economics, its global influence on understanding financial decision-making and its application to legislation which seeks to influence consumer outcomes. Drawing on qualitative empirical research to explore the experience of implementation of Auto-Enrolment, this timely work considers the interaction with the work of behavioural science to highlight the social costs of the new regulatory regime.

Understanding Israel/Palestine Feb 29 2020 The Israeli-Palestinian conflict is the longest, ongoing hot-and-cold war of the 20th and 21st centuries. It has produced more refugees than any current conflict, generating fully one quarter of all refugees worldwide. Everyone knows that the Palestinian-Israeli conflict is important itself, and is also fueling tensions throughout the Middle East. Yet most people shy away from this conflict, claiming it is “just too complicated” to understand. This book is written for people who want a point of entry into the conversation. It offers both a historic and analytic framework.

Readers, whether acting as students, parishioners, neighbors, voters, or dinner guests will find in these pages an analysis of the most commonly heard Israeli positions, and a succinct account of the Palestinian voices we seldom hear. I argue that human rights standards have never been used as the basis on which the Israeli-Palestinian conflict should be resolved and that only these standards can produce a just and sustainable resolution. This book will be useful for classes in Middle East studies, peace and conflict studies, Middle East history, sociology of race, and political science. It can be helpful for church groups, labor groups, or other grass roots organizations committed to social justice, and for all readers who wish to be informed about this important topic. "Professor Spangler's ... quest for historical and political understanding takes us on a brave and intimate journey into the consequences of Jewish privilege and Jewish victimhood, the agendas of imperial superpowers, and the Palestinian

of Philosophy, Quinnipiac University; Chairperson of B'Tselem, 2001–2006 Eve Spangler is a sociologist and a human and civil rights activist. For the last decade, her work has focused on the Israel/Palestine conflict; she argues that human rights are the neglected standards that could lead to a just and sustainable solution.

The Crisis and Renewal of U.S. Capitalism

Jan 28 2020 Despite the reversal of America's fortune from the triumphalism of the Roaring Nineties to the gloom of the lost decade and the Great Depression, theoretical conceptions of US capitalism have remained surprisingly unchanged. In fact, if the crisis questioned the sustainability of the US capitalist paradigm, it did not fundamentally challenge academic theorization of American political economy. This book departs from the American political economy literature to identify three common myths that have shaped our conceptualization of US capitalism: its reduction to a state-market

*Read Online Life Science Paper 2014

dyad dis-embedded from societal factors; the illusion of a weak state and the synchronic conception of the US variety of capitalism. To remedy these pitfalls, the authors propose a civilizational approach to American political economy at the crossroads between cultural studies, history, sociology and political science. Drawing together contributions from a rich variety of fields (from geography to cultural studies, political science and sociology) this work sheds a new light on America's "cultural political economy" combining theoretical reflection with empirical data and offering innovative perspectives on the crisis and renewal of American capitalism.

2021 This innovative volume introduces readers to a variety of disciplinary and methodological approaches used to examine the intersections of religion and migration. A range of leading figures in this field consider the roles of religion throughout various types of migration, including forced, voluntary, and economic. They discuss examples of migrations at all levels, from local to global, and critically examine case studies from various regional contexts across the globe. The book grapples with the linkages and feedback between religion and migration, exploring immigrant congregations, activism among and between religious groups, and innovations in religious thought in light of migration experiences, among other themes. The contributors demonstrate that religion is an important factor in migration studies and that attention to the intersection between religion and migration augments and enriches our understandings of religion. Ultimately, this volume provides a crucial survey of a

Constitution-Making under UN Auspices Jun 14 2021 In 1949, United Nations Constitutional Assistance (UNCA) was conceived to promote the Western liberal constitution. This was colonial trusteeship. However, in 1960, as a step towards decolonization, the United Nations General Assembly rejected internationalized constitution-making, and, by extension, UNCA. All colonies acquired the right to draft their own constitutions without any international assistance. Nonetheless, in the same year, UNCA was revived and since then it has helped over 40 developing sovereign states to adopt the Western liberal constitution, for the aims of building peace, preventing conflict, and promoting good governance in these independent states. This book scrutinizes UNCA and its off-shoot, UN/International Territorial Administration (ITA), including their historical origins and revival from 1960 to 2019. Sripati

16/27

argues that although the United Nations (UN) uses UNCA to help developing sovereign states secure debt relief, it undertakes UNCA to 'modernize' them with a view to 'strengthen' their supposedly weakened sovereignty. By doing so, the UN is seeking these states' adoption of a Western liberal-style constitution, thus violating their right to self-determination. The book shows how UNCA sires and guides UN (legislative) assistance in all state-sectors: security, judicial, electoral, commercial, parliamentary, public administration, and criminal. Irrespective of UNCA's benevolent motivations, such intrusive interventions impose the old forms of domination and perpetuate global inequality.

Politics, Planning and Housing Supply in Australia, England and Hong Kong Oct 26 2019

In recent years many nations have asked why not enough housing is being built or, when it is built, why it isn't of the highest quality or in the best, most sustainable, locations. Politics,

Planning and Housing Supply in Australia, England and Hong Kong examines the politics and planning of new homes in three very different settings, but with shared political traditions: in Australia, in England and in Hong Kong. It investigates the power-relationships and politics that underpin the allocation of land for large-scale residential schemes and the processes and politics that lead to particular development outcomes. Using a comparative framework, it asks: how different systems of urban governance and planning mediate the supply of land for housing; whether and how these system differences influence the location, quantity and price of residential land and the implications for housing outcomes; what can be learned from these different systems for allocating land, building consensus between different stakeholders, and delivering a steady supply of high quality and well located homes accessible to, and appropriate for, diverse housing needs. This book frames each case study

in a comprehensive examination of national and territorial frameworks before dissecting key local cases. These local cases - urban renewal and greenfield growth centres in Australia, new towns and strategic sites in England, and major development schemes in Hong Kong - explore how broader urban planning and housing policy goals play out at the local level. While the book highlights a number of potential strategies for improving planning and housing delivery processes, the real challenge is to give voice to a broader array of interests, reconstituting the political process surrounding planning and housing development to prioritise homes in well-planned places for the many, rather than simply facilitating investment opportunities for the few.

Turkey's Relations with the Middle East May 02 2020 This volume examines contemporary political relations between Turkey and the Middle East. In the light of the Arab Uprisings of 2011, the Syria Crisis, the escalation of regional terrorism and the military coup attempt in

Turkey, it illustrates the dramatic fluctuations in Turkish foreign policy towards key Middle Eastern countries, such as Iran, Saudi Arabia, Egypt, Syria and Iraq. The contributors analyze Turkey's deepening involvement in Middle Eastern regional affairs, also addressing issues such as terrorism, social and political movements and minority rights struggles. While these problems have traditionally been regarded as domestic matters, this book highlights their increasingly regional dimension and the implications for the foreign affairs of Turkey and countries in the Middle East.

The Patient Will See You Now Jun 02 2020 The essential guide by one of America's leading doctors to how digital technology enables all of us to take charge of our health A trip to the doctor is almost a guarantee of misery. You'll make an appointment months in advance. You'll probably wait for several hours until you hear "the doctor will see you now"-but only for fifteen minutes! Then you'll wait even longer for lab

tests, the results of which you'll likely never see, unless they indicate further (and more invasive) tests, most of which will probably prove unnecessary (much like physicals themselves). And your bill will be astronomical. In *The Patient Will See You Now*, Eric Topol, one of the nation's top physicians, shows why medicine does not have to be that way. Instead, you could use your smartphone to get rapid test results from one drop of blood, monitor your vital signs both day and night, and use an artificially intelligent algorithm to receive a diagnosis without having to see a doctor, all at a small fraction of the cost imposed by our modern healthcare system. The change is powered by what Topol calls medicine's "Gutenberg moment." Much as the printing press took learning out of the hands of a priestly class, the mobile internet is doing the same for medicine, giving us unprecedented control over our healthcare. With smartphones in hand, we are no longer beholden to an impersonal and paternalistic system in which

*Read Online Life Science Paper 2014
March Exam Memo Pdf For Free*

"doctor knows best." Medicine has been digitized, Topol argues; now it will be democratized. Computers will replace physicians for many diagnostic tasks, citizen science will give rise to citizen medicine, and enormous data sets will give us new means to attack conditions that have long been incurable. Massive, open, online medicine, where diagnostics are done by Facebook-like comparisons of medical profiles, will enable real-time, real-world research on massive populations. There's no doubt the path forward will be complicated: the medical establishment will resist these changes, and digitized medicine inevitably raises serious issues surrounding privacy. Nevertheless, the result—better, cheaper, and more human health care—will be worth it. Provocative and engrossing, *The Patient Will See You Now* is essential reading for anyone who thinks they deserve better health care. That is, for all of us.

Bilanzierung von sukzessiven Unternehmenserwerben im IFRS-Konzernabschluss wurde im Rahmen des mehrere Jahre andauernden Projekts „Business Combinations“ grundlegend überarbeitet. Der spezifischen Herausforderung derartiger Geschäftsvorfälle, nämlich der (Neu-)Konsolidierung der bereits vor der Beherrschungserlangung gehaltenen Anteile, begegnete der IASB im Zuge der Neuherausgabe von IFRS 3 mit einer strengen Fair Value-Orientierung. Eine tranchenweise, auf historischen Wertansätzen basierende Anwendung der Erwerbsmethode, wie sie noch in den Vorgängerstandards vorgesehen war, ist demnach nicht mehr zulässig. Wie aktuelle Geschäftsberichte zeigen, können die derzeitigen Bilanzierungsvorgaben erhebliche Auswirkungen auf die im Konzernabschluss dargestellte Vermögens-, Finanz- und Ertragslage extern wachsender Konzerne haben. Vor diesem Hintergrund macht es sich der

Verfasser zur Aufgabe, die derzeit geltenden Bilanzierungsvorschriften zu sukzessiven Unternehmenserwerben eingehend zu analysieren, hinsichtlich bestehender Auslegungsfragen zu konkretisieren sowie kritisch zu würdigen. Um eine möglichst ganzheitliche Analyse zu gewährleisten, wird die Untersuchung nicht auf die von IFRS 3 abgedeckten Sachverhalte beschränkt. Vielmehr werden sämtliche Fallkonstellationen sukzessiver Anteilsenerwerbe, in deren Rahmen es zu einem Statuswechsel einer Unternehmensbeteiligung kommt, in den Blick genommen. Den dabei z. T. bestehenden Regelungslücken begegnet der Verfasser mit der Ableitung einer möglichst entscheidungsnützlichen Bilanzierung. Aufbauend auf der Analyse und Würdigung des aktuellen IFRS-Regelungskanons, wird darüber hinaus ein de lege ferenda-Vorschlag herausgearbeitet, auf dessen Basis die Berichterstattung über sukzessive

Anteilsenerwerb im Vergleich zu den bisherigen Vorschriften verbessert sowie zugleich vereinheitlicht werden könnte.

Die Bilanzierung von

Lebensversicherungsgeschäften nach IFRS Aug 29 2022 Die von den deutschen

Lebensversicherern angebotenen

Lebensversicherungsgeschäfte spiegeln sich in ihrem IFRS-Konzernabschluss zum einen in aktivischen Finanzinstrumenten und zum anderen in passivisch abgebildeten

Lebensversicherungsverträgen. Im Rahmen des Asset-Liability-Managements (ALM) stimmen die Lebensversicherer die Zahlungsströme aus den Finanzinstrumenten mit den Zahlungsströmen aus den Lebensversicherungsverträgen ab.

Bisher bilanzieren die deutschen

Lebensversicherer Finanzinstrumente nach IAS 39 und Lebensversicherungsverträge nach IFRS 4 Phase I mit Rückgriff auf HGB oder US-GAAP.

Jedoch entstehen hieraus bilanzielle Ansatz- und Bewertungsinkonsistenzen (Accounting

Mismatches). Die Versicherer müssen ihre aktivischen Finanzinstrumente für ab dem 1.1.2021 beginnende Geschäftsjahre nach dem neu entwickelten IFRS 9 bilanzieren und ihre emittierten Lebensversicherungsverträge für ab dem 1.1.2021 beginnende Geschäftsjahre nach dem neu entwickelten IFRS 17. Diese Entwicklung nimmt der Autor zum Anlass, um zu konkretisieren, wie die deutschen Lebensversicherer ihre aktivischen Finanzinstrumente nach IFRS 9 und ihre passivischen Lebensversicherungsverträge nach IFRS 17 bilanzieren müssen. Hierauf aufbauend wird analysiert, ob den Abschlussadressaten nach IFRS 9 und IFRS 17 entscheidungsnützliche Informationen über das ALM der deutschen Lebensversicherer vermittelt werden. Dies ist der Fall, wenn das Periodenergebnis der Versicherer nach den beiden neuen Standards weniger durch Accounting Mismatches verzerrt wird als nach IAS 39 und IFRS 4 Phase I. Abschließend

werden drei Möglichkeiten dafür diskutiert, IFRS 9 und IFRS 17 zu ändern, um zu verbessern, wie das ALM der deutschen Lebensversicherer künftig bilanziell dargestellt wird.

Comparative Politics and Government of the Baltic States Jan 22 2022 This book traces the development of the political institutions, electoral systems, parties, civil society, economic and social policies and foreign affairs of the three Baltic states of Estonia, Latvia and Lithuania over the last quarter century.

Information Retrieval and Management: Concepts, Methodologies, Tools, and Applications May 26 2022 With the increased use of technology in modern society, high volumes of multimedia information exists. It is important for businesses, organizations, and individuals to understand how to optimize this data and new methods are emerging for more efficient information management and retrieval. Information Retrieval and Management:

the manifestations of Sino-African relations dating back many centuries. In this way, *The Rise and Decline and Rise of China: Searching for an Organising Philosophy* takes forward the work MISTRA conducted on the Mapungubwe society, one of the advanced states that existed in southern Africa some 800 years ago. What makes this research report unique, though, is that the treatment of these issues has been undertaken primarily from an African perspective.

Sociology Jun 22 2019 This new Brief Sixth Edition of David Newman's text is the streamlined version of *Sociology: Exploring the Architecture of Everyday Life* with the same goal: to be a textbook that, in the author's words, "reads like a real book." Newman shows to see the "unfamiliar in the familiar"—to step back and see organization and predictability in their take-for-granted personal experiences. Newman uses the metaphors of "architecture" and "construction," to help students understand

that society is not something that exists "out there," independently of themselves; it is a human creation that is planned, maintained, or altered by individuals. Instead of surveying every subfield in sociology, this text focuses on the structural features of society, the social construction of self and identity, and social inequality in the context of social institutions. The new edition includes examples and analysis of contemporary events and trends, including: The changes in our national politics brought about by the 2016 presidential election Increasing societal attention paid to fatal encounters between police and unarmed people of color or incidents of sexual harassment and assault School shootings and the debates over gun ownership The continued dramatic growth of communication technology, particularly social networking sites

Economics without Borders Sep 05 2020 This book uses surveys to bridge the gap between studies into European economics and

policymaking in Europe. It is also available as open access.

Guide to Security Assurance for Cloud Computing

Jul 04 2020 This practical and didactic text/reference discusses the leading edge of secure cloud computing, exploring the essential concepts and principles, tools, techniques and deployment models in this field. Enlightening perspectives are presented by an international collection of pre-eminent authorities in cloud security assurance from both academia and industry. Topics and features: · Describes the important general concepts and principles of security assurance in cloud-based environments · Presents applications and approaches to cloud security that illustrate the current state of the art · Reviews pertinent issues in relation to challenges that prevent organizations moving to cloud architectures · Provides relevant theoretical frameworks and the latest empirical research findings · Discusses real-world vulnerabilities of cloud-based

software in order to address the challenges of securing distributed software · Highlights the practicalities of cloud security, and how applications can assure and comply with legislation · Includes review questions at the end of each chapter This Guide to Security Assurance for Cloud Computing will be of great benefit to a broad audience covering enterprise architects, business analysts and leaders, IT infrastructure managers, cloud security engineers and consultants, and application developers involved in system design and implementation. The work is also suitable as a textbook for university instructors, with the outline for a possible course structure suggested in the preface. The editors are all members of the Computing and Mathematics Department at the University of Derby, UK, where Dr. Shao Ying Zhu serves as a Senior Lecturer in Computing, Dr. Richard Hill as a Professor and Head of the Computing and Mathematics Department, and Dr. Marcello Trovati as a

Senior Lecturer in Mathematics. The other publications of the editors include the Springer titles Big-Data Analytics and Cloud Computing, Guide to Cloud Computing and Cloud Computing for Enterprise Architectures.

Natural Resources Management: Concepts, Methodologies, Tools, and Applications Feb 08 2021 The perseveration of our natural environment has become a critical objective of environmental scientists, business owners, and citizens alike. Because we depend on natural resources to survive, uncovering methods for preserving and maintaining these resources has become a focal point to ensure a high quality of life for future generations. *Natural Resources Management: Concepts, Methodologies, Tools, and Applications* emphasizes the importance of land, soil, water, foliage, and wildlife conservation efforts and management. Focusing on sustainability solutions and methods for preserving the natural environment, this critical multi-volume research work is a comprehensive

resource for environmental conservationists, policymakers, researchers, and graduate-level students interested in identifying key research in the field of natural resource preservation and management.

Die Verlässlichkeit von Anhangangaben im IFRS-Abschluss Sep 29 2022 Stefan R. Grabs zeigt, dass die Verlässlichkeit insbesondere von subjektiven Anhangangaben im IFRS-Abschluss begrenzt ist und insbesondere die Abschlussprüfung in diesem Fall nur eingeschränkt zu einer Erhöhung beitragen kann. Der Autor betrachtet zunächst die theoretischen, normativen und empirischen Perspektiven des Anhangs sowie der Abschlussprüfung mit dem Schwerpunkt auf dem Konzept der hinreichenden Prüfungssicherheit. Im Rahmen einer eigenen empirischen Untersuchung werden die Determinanten der maximalen Prüfungssicherheit von Anhangangaben aufgezeigt und dabei auch die Wirkung des

Credit Risk Management for Derivatives Aug 24 2019 This Palgrave Pivot assesses the impact of the regulatory framework for derivatives built post-crisis and examines its ambition to centralize and minimize credit risk, enhance transparency, and regain control. Zelenko delves into the powerful destabilizing forces exerted by derivatives markets in the global financial meltdown of 2008. Recapping the evolution in markets and counterparty risk management, as well as key aspects of regulation and their impact, this book aims to give readers the big picture and foster a deep understanding of the role of derivatives markets in the financial crisis. This practical angle will give useful keys to end-users and their risk managers, as they are faced with a new, complex, and changing environment. Additionally, this book conducts a comprehensive analysis of the new metrics the market has created to model, price, and manage

credit risk, such as the Credit Value Adjustment (CVA), the Debt Value Adjustment (DVA), or the Funding Value Adjustment (FVA), and takes full stock of a domain that is still in rapid evolution. This volume covers the concepts, methods, and approaches taken by banks to manage counterparty credit risk in their derivatives activities in the new post-crisis market and regulatory environment, and it aims to highlight what is practical and effective today.

Materiality in Financial Reporting Dec 21 2021 This book offers an integrated perspective of materiality from the different angles of accounting, auditing, internal controls, management commentary, financial analysis, management control, forensic analysis, sustainability reporting, corporate responsibility, assurance standards, integrated reporting, and limited legal considerations.
