Seminar paper from the year 2020 in the subject Theology - Miscellaneous, , language: English, abstract: This research work is a pragmatic analysis of selected utterances from the Christian scriptures using the speech act theory of Searle of 1969 and Politeness theory stipulated by Brown and Levinson. The motivation for this study is the fact that the Christian scriptures has received little attention when it comes to scholarly investigations. The work is divided into five chapters: Chapter one features the background to the study,

definitions of terms, statement of problem, aim and objective of the study, significance of the study and the scope of the study. Chapter two features the review of literatures relevant to this research in terms of theory, data and area of study. Chapter three contains the exploration of the methodology and theoretical framework adopted for the study. Chapter four features the analysis of the selected utterances into two subheadings: speech act analysis focusing on the illocutionary, and politeness analysis of the same set of utterances, which are taken from the New Testament part of the Bible, Matthew,

Luke and John to be precise. After the analysis, a table is attached which summarises the research question. Pragmatics as a level of linguistic analysis describes language from the point of view of the language users; most importantly, the choices these language users make, the constraints they encounter in using their language for social interaction and also the effect of their use of language on other participants in a speech event. This is the domain of pragmatics. Hence, social context is considered in any pragmatics study because in any social context, the sole aim of the language is to foster communication and when talking about communication, there is always the "more than" notion - a speech saying much more than what the ordinary message may project and pragmatics bothers itself with the ability to interpret the inner message of any speech

Object-oriented Analysis and Design Feb 02 2020 John Deacon's in-depth, highly pragmatic approach to object-oriented analysis and design, demonstrates how to lay the foundations for developing the best possible software. Students will learn how to ensure that analysis and design remain focused and productive. By working through the book, they will gain a solid working knowledge of best practices in software development. The focus of the text is on typical development projects and technologies, showing exactly what the different development activities are, and

emphasising what they should and should not be trying to accomplish. This fresh, comprehensive examination of object-oriented analysis and design in the context of today's systems and technologies will be a valuable addition to the bookshelves of undergraduates and graduates on systems analysis and design courses.

Discourse Analysis and Pragmatics Apr 05 2020 Previous works on Discourse Analysis and Pragmatics have either been dominantly focused on theory or on practice without much balance and attention to both theory and analysis. The present volume seeks to strike a balance between the two closely related disciplines on the one hand, and between the study of theory in the two disciplines and on issues of methodology and application in specific areas of enquiry on the other. The book seeks to provide a cross-sectional view of scholarship in these areas, specifically from the perspective of how the intersection of theory and practice enables Nigerian scholars of Discourse Analysis and Pragmatics to understand and analyse texts that have pan-Nigerian peculiarities.

The African National Anthem, "Nkosi Sikelel' Iafrika" Aug 10 2020 This book entails a pragmatic analysis of the African National Anthem, "'Nkosi Sikelel' iAfrika,'" within a

linguistic framework. By delineating the pragmatic features of the anthem, its philosophical symbolic meanings are teased out. This is important because symbols are critical in promoting social integration, fostering legitimacy, inducing loyalty, gaining compliance, and providing citizens with security and hope. Political symbols are also used as tools to address the contradictions of national consciousness and nation-building, nationhood, ideal governance, socioeconomic organization, and foreign policy preferences. The African National Anthem, "'Nkosi Sikelel' iAfrika'" is divided into seven chapters: Historical Background and Various Versions of "'Nkosi Sikelel' iAfrika'" On Meaning Deixis Presuppositions Implicatures Speech Acts Conclusions

A Pragmatic Analysis of Speech Acts as Produced by Arab ESL Learners May 31 2022 A Pragmatic Analysis of Speech Acts as Produced by Native Speakers of Arabic in English is a study that aims at exploring one important aspect of the communicative competence of the second language learners. This aspect is "the pragmatic ability to perform speech acts" and the subjects under investigation are the Arab users of English as a second language in the Indian context. The particular speech acts investigated are: requests, invitations, apologies and correction of a factual error. Three major features of the pragmatic competence of the second language learners of English are highlighted in each chapter: a)Speech act realization patterns including the different types of modifications that play a role in deciding the illocutionary force of a speech act. b)The ability to perform politeness functions and the cross-cultural variations implied. c) Pragmatic transfer and the influence of cultural and linguistic background on the production of pragmatic performance in L2.

Pragmatics of Discourse Dec 02 2019 Discourse is language as it occurs, in any form or context, beyond the speech act. It may be written or spoken, monological or dialogical, but there is

always a communicative aim or purpose. The present volume provides systematic orientation in the vast field of studying discourse from a pragmatic perspective. It first gives an overview of a range of approaches developed for the analysis of discourse, including, among others, conversation analysis, systemic-functional analysis, genre analysis, critical discourse analysis, corpus-driven approaches and multimodal analysis. The focus is furthermore on functional units in discourse, such as discourse markers, moves, speech act sequences, discourse phases and silence. The final section of the volume examines discourse types and domains, providing a taxonomy of discourse types and focusing on a range of discourse domains, e.g. classroom discourse, medical discourse, legal discourse, electronic discourse. Each article surveys the current state of the art of the respective topic area while also presenting new research findings. Talking with the President Nov 12 2020 This book provides a pragmatic analysis of presidential language. Pragmatics is concerned with meaning in context, or the relationship between what we say and what we mean. John Wilson explores the various ways in which U.S. Presidents have used language within specific social contexts to achieve specific objectives. This includes obfuscation, misdirection, the use of metaphor or ambiguity, or in some cases simply lying. He focuses on six presidents: John F. Kennedy, Richard M. Nixon, Ronald W. Reagan, William F. Clinton, George W. Bush,

and Barack H. Obama. These presidents cover most of the last half of the twentieth century, and the first decade of the twenty first century, and each has been associated with a specific linguistic quality. John F. Kennedy was famed for his quality of oratory, Nixon for his manipulative use of language, Reagan for his gift of telling stories, Clinton for his ability to engage the public and to linguistically turn arguments and descriptions in particular directions. Bush, on the other hand, was famed for his inability to use language appropriately, and Obama returns us to the rhetorical flourishes of early Kennedy. In the case of each president, a range of specific examples are explored in order to highlight the ways in which a pragmatic analysis may provide an insight into presidential language. In many cases, what the president says is not necessarily what the president means.

Making Semantics Pragmatic Feb 13 2021

"This collection of especially invited papers aims to explore the nature of the semantics/pragmatics interface by examining the extent to which the analysis of certain expressions or constructions can be pragmaticised. As the title of the collection implicates, it is anticipated that the theoretical and descriptive burden will move from semantics to pragmatics. However not all parts of a linguistic system will yield to a pragmatic treatment. The possibility remains that certain

expressions or constructions are more economically and elegantly treated in semantic terms. Thus, this collection also contains papers that address the topic of 'making pragmatics semantic'. This collection contributes to the current interest in examining the division of labour between semantics and pragmatics in the analysis of meaning. All of the papers are at the forefront of knowledge in these matters and each contains original empirical analyses and/or novel theoretical perspectives. This book is relevant to courses in university departments of linguistics, modern languages, philosophy and psychology and to a wide range of university teaching and research."--Publisher's web site.

Justification. A Pragmatic Perspective Aug 29 2019 Doctoral Thesis / Dissertation from the year 2018 in the subject Speech Science / Linguistics, University of Babylon (College of Education), course: Linguistics, language: English, abstract: Justification may be a prerequisite for any claim that is made, whether the claim is about a weather forecast by a meteorologist, an accusation of negligence by an employee against his or her employers, or a doctor's diagnosis. Justification denotes a communicative act which is meant to compensate for the violation of a certain norm or to enable recipients to understand better something unpredicted or disputed. Although

justification is ubiquitous in everyday life, it has so far remained relatively unexplored in general and in the political domain in particular. Therefore, this study examines its pragmatic aspects in some selected British and American political speeches. It sets itself the task of fulfilling the following aims: (1) finding out the various criteria of justification resorted to by British and American decision-makers and discovering the most frequent criterion; (2) detecting the types of justification that are most recurrently used by British and American decision-makers in the data under study ; (3) identifying the pragmatic structure of justification employed by British and American decision-makers shedding some light on its most basic structural components; (4) finding out the different pragmatic strategies employed by British and American decision-makers to justify their decisions and detecting the most frequent ones; (5) identifying the similarities and differences between British and American decision-makers regarding the use of the criteria, types, strategies and basic structural components of justification ; (6) specifying the role played by strategic maneuvering in justification; (7) designing an eclectic model for data analysis; (8) shedding some light on the different approaches proposed to account for the complex nature of justification. To achieve the aims of the study and assess the validity of its hypotheses, a number of procedures are followed: (1) reviewing the literature relevant to justification and enhancing its pragmatic

nature; (2) developing an eclectic model to be used in analyzing the data under study through surveying the relevant pragmatic theories; (3) randomly selecting data as representative examples for both British and American political speeches and analyzing them by means of the model developed for this purpose; (4) conducting a statistical analysis to support the findings of the pragmatic analysis; and (5) Conducting comparison between the strategies used by the British and American decision-makers.

Humor in Comic Strips: A Pragmatic Analysis of "Nemi" Aug 22 2021 Scientific Essay from the year 2009 in the subject English Language and Literature Studies - Linguistics, grade: 8 - A, University of Minho (Arts and Humanities), course: MA English Studies, language: English, abstract: In this paper, I would like to bring this human characteristic in the realm of language and linguistic analysis, dissecting hidden discourses and meaning found in texts which creates humor. In this sense, to be more specific, I would like to attempt telescoping various explicit and implicit elements of linguistic structures found in the texts using a print medium, in particular, a comic strip Nemi. The following discussions will cover various concept indicators primarily used in language in order to give light to the whole of the project.

Humorous Texts Nov 24 2021 This book presents a theory of long humorous texts based on a revision and an upgrade of the General

Theory of Verbal Humour (GTVH), a decade after its first proposal. The theory is informed by current research in psycholinguistics and cognitive science. It is predicated on the fact that there are humorous mechanisms in long texts that have no counterpart in jokes. The book includes a number of case studies, among them Oscar Wilde's Lord Arthur Savile's Crime and Allais' story Han Rybeck. A groundbreaking discussion of the quantitative distribution of humor in select texts is presented.

Gender-specific Language in the Presentation of Political Talk Shows Jul 29 2019 Essay from the year 2011 in the subject Communications - Intercultural Communication, grade: Good, The University of Surrey, language: English, abstract: Men and women do not only look different, they literally are different from scratch (Gates: 2008). But does this difference also apply to language and talk? 'Women talk more than men!' - Everybody has already heard of the myth that women are more talkative and use 20,000 words a day, whereas men get by with just 7,000 (Talbot: 2003). However, this has been contradicted by the University of Texas - there is no gender that is more talkative. Moreover, according to the studies, women speak on average 16,215 words and men 15,669 words a day (Mehl et al.: 2007). Language starts in people's heads, but since the areas and sizes of the different brain parts in women's and men's heads are completely unequal it nevertheless is logical

that male and female language differs. A female brain has its own relatively big 'Gossip Lobe', whereas the male brain has only got a somewhat smaller 'Guy Talk' area (see Fig. 1). According to the amount of research that has been conducted in this field there are major differences between male and female language. Tabloid newspapers and talk shows tend to suggest that women swear less than men or that women are the more gossipy gender. These assumptions are internalised by the vast majority of the population, but are they really true (Coates: 2004)? Or is all that nonsense? The German publishing group Langenscheidt published a dictionary with the title 'German-Woman / Woman-German' which has especially been created for men so that they can interpret women's messages correctly. This again shows that male and female language varies.

Pragmatics at Work Sep 30 2019 This volume is a collection of eight articles on the general topic of translation. The common element running through them all is the analysis of samples of tourist literature and their translations, from a pragmatic point of view. The languages concerned are mainly English and Spanish, but examples of German and French texts are also included. The theoretical approaches are multifaceted. Relevance theory, systemic-functional linguistics and discourse analysis are some of the theoretical standpoints taken as a background. The book covers phenomena as varied as translation quality

assessment, audience design and perlocutionary effects, dealing also with more specific features like thematic structure, inference and propositional meaning, discourse markers and grammatical metaphor in order to provide a wide range of analyses for the specialised reader.

Pragmatic Analysis of Political Data Apr 29 2022 This book tackles various pragmatic issues which are manipulated by politicians in diverse contexts where the principle of being honest is less important than fulfilling their goals. These issues range from Irony to Impoliteness, Deception, Diplomacy, Fallacy, and Political Accusations. Besides, it reveals what pragmatic strategies are appealed to by those politicians to win over their opponents or convince their audience. Revealing those strategies is done by pragmatic analytical models which are applied to verbal and nonverbal data. Thus, the book can be useful to politicians, pragmatists, and applied linguists. Additionally, the book is indispensable to researchers interested in pragmatics as it suggests different approaches about how to build pragmatic analytical models and how to use them to analyze political data or any other kind of data.

Corpus Pragmatic Studies on the History of Medical Discourse Oct 31 2019 The original studies in this volume provide new insights into the history of medical discourse across

centuries in both professional and lay texts. The central themes deal with changes in medical writing in various societal and cultural contexts in search for best practices in corpus pragmatics for future work. Some studies apply quantitative methods of corpus linguistics and Digital Humanities, others adopt a qualitative, discourse-analytical perspective, focusing on particular texts, authors or medical topics, or specific functionally-defined discourse forms such as narratives. Quantitative and qualitative approaches are mutually complementary and shed light on different aspects of historical medical discourse. The methodologies aim at establishing validity and reliability for pragmatic analysis, taking into account relevant contextual factors and insights from other fields, such as medical and social history, history of ideas, and science studies.

Ventures in Pragmatics Jan 03 2020 The book is a kind of discourse analysis. The author has applied Pragmatic concepts like Cooperative Principle, Conversational Implicature and Presupposition to the plays of Harold Pinter, as well as other discourses. It has been found that these concepts can be fruitfully utilized to analyze the absurd plays. These notions have proved really useful techniques to bring out the implied meaning from the seemingly meaningless dialogues in Pinter's plays. His plays are marked with failure of communication, non-communication, meaningless utterances as well as silences and pauses. Common reader of literature finds it

difficult to comprehend this kind of discourse. At this juncture, the author has found that application of pragmatic concepts to these plays is helpful in proper comprehension of Pinteresque style. Moreover, the author has tried to analyze advertising discourse by applying the notion of Presupposition. The book contains articles focusing on the theatre of the absurd and pragmatic analysis. The book will be of immense use to the students and researchers in the field of Pragmatics and Pragmatic Analysis.

Tenets of relevance theory have been applied to explain the relevance of the concepts and the varied interpretations that the electorates have during elections.

[Pragmatics in Practice](#) May 07 2020 The ten volumes of Handbook of Pragmatics Highlights focus on the most salient topics in the field of pragmatics, thereby attempting to divide up its wide interdisciplinary spectrum in a transparent and manageable way. While the other volumes select specific philosophical, cognitive, grammatical, social, cultural, discursive, variational, or interactional angles,

this 9th volume focuses on what pragmatics is good for – beyond the very discipline of pragmatics as such. The chapters in the volume thus address the importance of taking a pragmatic perspective on traditional fields of applied linguistics (contrastive and error analysis, translation), and they address the core of pragmatics as the study of language use (with phenomena ranging from irony and emphasis to literacy and mass media, and with approaches to the function of language like rhetoric, stylistics, corpus analysis, and general semantics). The volume contains chapters not only on the spoken and written modes of communication, but also on signed language pragmatics and on computer-mediated communication. The impact and usefulness of taking a pragmatic perspective on language for a deeper understanding of clinical and rehabilitation practices has recently received ever more focus; in this volume, aspects of this direction of research are dealt with in the chapter on clinical pragmatics. In most of the chapters in the volume, ethics has a core role to play, not only in issues of authenticity in general in relation to research on language use, but also in issues that have a direct influence on the (linguistic) culture and society we live in, irrespective of whether we are part of a (linguistic) majority or a minority, or a minority within a minority: language policy and language planning, language ecology, and language in relation to legal matters. In all of these fields, we see the importance of research

within pragmatics as a discipline dealing with how language influences our everyday lives. All in all, the volume presents different perspectives on how research in pragmatics not only can be put to practice, but how pragmatics is used as a tool to gain a better understanding of the world we live in.

Communication in Drama May 19 2021
COMMUNICATION IN DRAMA: A PRAGMATIC APPROACH is a book based on the author's research work in theatrical communication. Theatre has its own language. The verbal and non-verbal communication operating in the theatrical context is a central concern of this book. The book offers an authentic view to explore numerous intricacies of communication in drama using Pragmatics as a perspective. Pragmatics is a branch of linguistics. It basically studies the use of language in various contexts pertaining to real-life communication. However, the communication in drama differs from the communication in real life. Drama is scripted and performed in the multivalent contexts of real life and theater at the same time. At the backdrop of such contextual dynamics, the existing analytical models of communication in Pragmatics are observed to have their own shortcomings, since they are basically evolved to analyze the communication in real life and not in drama. Hence, peculiarly to assess the speech situations in drama, the author has evolved a new pragmatic-analytical model in this book. The new model is authenticated by using it to analyse five

milestone Indian plays in English. Precisely, the book is a pragmatic analysis of communication in drama.

(In)Appropriate Online Behavior Aug 02 2022 This descriptive and comprehensive study on the discursive struggle over interpersonal relations in online message boards is located at the fascinating interface of pragmatics and computer-mediated discourse – a research area which has so far not attracted much scientific interest. It sets out to shed light on the question how interpersonal relations are established, managed and negotiated in online message boards by giving a valid overview of the entire panoply of interpersonal relations (and their interrelations), including both positively and negatively marked behavior. With the first part of the book providing an in-depth discussion and refinement of the pivotal theoretical positions of both fields of research, students as well as professionals are (re-)acquainted with the subject at hand. Thus supplying a framework for the ensuing case study, the empirical part displays the results of the analysis of 50 threads (ca. 300,000 words) of a popular British message board.

A Pragmatic Analysis of Legal Proofs of Criminal Intent Sep 22 2021 A Pragmatic Analysis of Legal Proofs of Criminal Intent is a detailed investigation of proofs of criminal intent in Israeli courtrooms. The book analyses linguistic, pragmatic, interpretative and argumentative strategies used by Israeli lawyers and judges in order to examine the defendant's intention. There can be no doubt that this subject is worthy of a thorough investigation. A person's intention is a psychological phenomenon and therefore, unless the defendant chooses to confess his intent, it cannot be proven directly either by evidence or by witnesses' testimonies. The defendant's intention must be inferred usually from the overall circumstances of the case; verbal and situational contexts, cultural and ideological assumptions and implicatures should be taken into account. The linguistic analysis of these inferences presented here is necessarily comprehensive: it requires consideration of a variety of theoretical frameworks including speech act theory, discourse analysis, argumentation theory,

Pragmatics Sep 10 2020 The first truly multidisciplinary text of its kind, this book offers an original analysis of the current state of linguistic pragmatics. Cummings argues that no study of pragmatics can reasonably neglect the historical and contemporary influences on this discipline of neighboring fields of inquiry, particularly philosophy, psychology, artificial intelligence, and language pathology. By the same token, these fields can begin to address their own questions more productively by examining the insights of pragmatics. The book's range of topics and depth of analysis will be of interest to advanced undergraduate and more specialized readers in linguistics, communication studies, speech and language therapy, and cognitive science. Topics discussed include: *coverage of pragmatic concepts and theories; *criticisms of Sperber and Wilson's relevance theory, Habermas's theory of communicative competence, and Kasher's views on the modularity of pragmatics; *pragmatic deficits in a range of child and adult language disorders; and *a pragmatic analysis of argumentation in topical issues such as AIDS

A Pragmatic Analysis of Desire in the Nigerian Home Video Dec 26 2021 Academic Paper from the year 2020 in the subject Film Science, course: Linguistics, language: English, abstract: The Nigerian home video industry, popularly referred to as, Nollywood, has become a household name both locally and internationally. Despite the setbacks it suffered, Nollywood has soared higher than most expected. It is on this premise that this study exposes the pragmatic undertone of the language use in Nollywood films to show its verisimilitude with normal day-to-day manner of communication. This study is based on the theory of Pragmatics as developed by J L Austin, John Searle and H. P. Grice. This theory is very relevant to this study as it exposes a lot that happens in normal communication - the unsaid but meant. Among the many tools of Pragmatics, Context, Presupposition, Implicature and the Cooperative Principle are employed in this research. It was found out that context plays a crucial role in deciphering meaning in Nollywood films; again, the language use of Nollywood films shows a lot of presuppositions and implicature and that the Cooperative Principle is well illustrated by the language use of Nollywood films.

A Pragmatic Analysis of Power in Arabic Doctor-Patient Interactions Mar 17 2021

Research Paper (postgraduate) from the year 2021 in the subject Medicine - Other, University of Mosul (University of Mosul/ Iraq), language: English, abstract: The study investigates the notion of power in Mosuli Arabic doctor-patient encounters from a pragmatic point of view. It does so by studying the interface of power and politeness in interaction. The theoretical framework adopted in the study is Brown and Levinson's (1987) politeness theory. Naturalistic observation method is the method used to collect data from 10 doctors and 38 patients in different public and private medical settings. The study hypothesizes that doctors aren't inclined to use politeness strategies due to their "expert", "referent" and "legitimate" power whilst patients are inclined to use politeness

strategies when they interact with their doctor to lessen the influence of FTAs. The study finds that doctors (both males and females) exercise power when they interact with their patients as they do FTAs baldly-on-record in most cases. It also finds that patients (both males and females) of different ages use politeness mitigation strategies when they interact with a doctor to lessen the influence of an FTA.

The Familiar Letter in Early Modern English Jun 07 2020 This research monograph examines familiar letters in seventeenth- and eighteenth-century English to provide a pragmatic reading of the meanings that writers make and readers infer. The first part of the book presents a method of analyzing historical texts. The second part seeks to validate this method through case studies that illuminate how modern pragmatic theory may be applied

to distant speech communities in both history and culture in order to reveal how speakers understand one another and how they exploit intended and unintended meanings for their own communicative ends. The analysis demonstrates the application of pragmatic theory (including speech act theory, deixis, politeness, implicature, and relevance theory) to the study of historical, literary and fictional letters from extended correspondences, producing an historically informed, richly situated account of the meanings and interpretations of those letters that a close reading affords. This book will be of interest to scholars of the history of the English language, historical pragmatics, discourse analysis, as well as to social and cultural historians, and literary critics.
