Reviews of National Policies for Education: South Africa 2008 Jun 07 2020 Gives a brief overview of regional issues and the history of education in South Africa and describes the development of education in the country over the past 15 years. It presents an analysis of the education system, identifying key directions for ...

Science Education and Curriculum in South Africa Jul 21 2021 This book explores the impact of the socio-historical, political, and economic environment in South Africa, both during and after Apartheid. During this time, the South African education system demonstrated an interest in a specific type of knowledge, which Koopman refers to as 'a science of government'. This 'science of government' leaves the learners with a blurred understanding of science that is disconnected from external nature and human nature, and is presented as a series of abstract concepts and definitions. The book also investigates the dialectical tensions between the science curriculum and the role of the teacher as an active implementer of the curriculum. The book draws on the work of various phenomenological scholars, namely Edmund Husserl, Martin Heidegger, Merleau-Ponty, and Max van Manen to discuss these tensions.

International Perspectives on Mathematics Curriculum Jun 19 2021 Curriculum can be defined in a variety of ways. It might be viewed as a body of knowledge, a product, or a process. Curricula can differ as they are conceptualized from various theoretical perspectives to address the needs of teachers, students, and the context of schooling. One reason to study curriculum is "to reveal the expectations, processes and outcomes of students' school learning experiences that are situated in different cultural and system contexts. ... further studies of curriculum practices and changes are much needed to help ensure the success of educational reforms in the different cultural and system contexts" (Kulm & Li, 2009, p. 709). This volume highlights international perspectives on

curriculum and aims to broaden the wider mathematics education community's understandings of mathematics curriculum through viewing a variety of ways that curricula are developed, understood, and implemented in different jurisdictions/countries. Within this volume, we define curriculum broadly as the set of mathematics standards or outcomes, the messages inherent in mathematics curriculum documents and resources, how these standards are understood by a variety of stakeholders, and how they are enacted in classrooms. The focus is on the written, implied, and enacted curriculum in various educational settings throughout the world.

Zeitschrift für anorganische und allgemeine Chemie Jan 03 2020

Evolution Education Around the Globe May 31 2022 This edited book provides a global view on evolution education. It describes the state of evolution education in different countries that are representative of geographical regions around the globe such as Eastern Europe, Western Europe, North Africa, South Africa, North America, South America, Middle East, Far East, South East Asia, Australia, and New Zealand. Studies in evolution education literature can be divided into three main categories: (a) understanding the interrelationships among cognitive, affective, epistemological, and religious factors that are related to peoples' views about evolution, (b) designing, implementing, evaluating evolution education curriculum that reflects contemporary evolution understanding, and (c) reducing antievolutionary attitudes. This volume systematically summarizes the evolution education literature across these three categories for each country or geographical region. The individual chapters thus include common elements that facilitate a cross-cultural meta-analysis. Written for a primarily academic audience, this book provides a much-needed common background for future evolution education research across the globe.

Quality education Mar 17 2021 This book investigates the intersections between education, social justice, gendered violence and human rights in South African schools and universities. The rich and multifarious tapestry of scholarship and literature emanating from South African classrooms provides a fascinating lens through which we can understand the complex consequences of the economies of education, social justice imperatives, gendered violence in the lives of women and children, and marginalised communities. The scholarship in the book challenges readers to imagine alternative futures predicated on the transformational capacity of a democratic South Africa. Contributors to this volume examine the many ways in which social justice and gendered violence mirror, express, project, and articulate the larger phenomenon of human rights violations in Africa and how, in turn, the discourse of human rights informs the ways in which we articulate, interrogate, conceptualise, enact and interpret quality education. The book also wrestles with the linguistic contradictions and ambiguities in the articulation of quality education in public and private spaces. This book is essential reading for scholars seeking a solid grounding in exploring quality education, the instances of epistemic disobedience, the political implications of place and power, and human rights in theory and practice.

The Mathematics Education for the Future Project - Proceedings of the 14th International Conference Nov 24 2021 This volume contains the papers presented at the International Conference on Challenges in Mathematics Education for the Next Decade held from September 10-15, 2017 in Balatonfüred, Hungary. The Conference was organized by The Mathematics Education for the Future Project - an international educational project founded in 1986.

The NAEP ... Technical Report Nov 05 2022

Marking Matric Dec 14 2020 The past ten years in South Africa has seen many changes in education - the creation of a single department of education; common examinations for all learners in public schools in the country, a new outcomes based education curriculum which was introduced to learners in the general education and training phase since 1998 and will be introduced to the further education and training phase from 2006. To evaluate the success of these changes South African researchers still use the indicator of student achievement. The matriculation examination is the visible, high profile and public performance indicator. Every year parents, learners, teachers, researchers, government officials, policymakers, and the general public get involved in the debate around the matric examination with the most frequently asked questions being - Did the pass rate go up? Are standards dropping? Are the results real or have they been manipulated? How is our education system doing? Are we meeting the development goals? What should the matriculation examination of the future look like? participants from government (national and provincial),

Inclusive Teaching in South Africa Jan 15 2021 Inclusive education presupposes an all-inclusive approach where all learners are taught in regular classrooms, regardless of background, disability or social context. While there has been much debate, indications are that inclusive education has been gaining momentum. The book is divided into six coherent sections that address the how of inclusive education both inside and outside of the classroom.

Complexity and Simplicity in Science Education Mar 29 2022 This edited volume brings together a broad range of international science education studies, focusing on the interplay of teaching and learning science. It recognizes the complexity present in today's education, associated with major science related issues faced by society, such as climate change, diseases and pandemics, global conflicts over energy, food and water. The studies discussed in this volume are focused on presenting different opportunities to teach these convoluted matters in order to find simplicity within the complexity and make it accessible to learners. They bring together the challenges of preparing the students of today to become scientifically informed citizens of tomorrow.

Personality Assessment Sep 30 2019 This highly regarded book is a survey of concepts, methods, procedures, and materials concerning the assessment of personality. It emphasizes the means and methods of assessment, but theories, research, and issues concerning human personality that have influenced psychological assessment are also considered. The book is designed primarily for use in a one-semester course on personality assessment at the upper undergraduate or beginning graduate level. It is also appropriate to combine the book with lectures or readings on personality theories and research, or with material on cognitive assessment. Further-more, it can be used in courses on personality or in a comprehensive course on psychological testing and assessment.

Continuing Professional Teacher Development in Sub-Saharan Africa Aug 02 2022 Continuing Professional Teacher Development in Sub-Saharan Africa explores the prospects that the on-going continuous professional development (CPD) of teachers working in schools offers for meaningful change, particularly towards improving the quality of educational provision for the majority of the continent's children. By reflecting on teacher professional development efforts and their place in broader education reforms, the book highlights the challenges of teacher CPD in these education contexts - contexts strongly shaped by endemic poverty, under-development and social upheaval. The collection draws together examples of innovation and resilience, and the valuing of teachers as critical role players, enabled and empowered through their on-going development as education professionals. Drawing together a wealth of experience, the volume identifies the policy and research implications for the future of CPD across the continent, providing important lessons that can be integrated into a post-2015 development agenda for Africa.

Assessment in Geographical Education Apr 29 2022 In recent years there has been increased attention paid to the importance of assessment in Geographical Education, the chosen subject for this book. Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students, teachers, parents and policymakers. To be effective, assessment needs to be valid, reliable and fair. Validity is about ensuring that we assess what we claim we are assessing. Reliability is about measuring performance and understanding in a consistent way. Without validity and reliability, assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do. As geography educators it is therefore important that we identify the core concepts and skills in

geography that we want students to master. We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning. While there is a substantial literature on evidence-based assessment in secondary school contexts, research exploring best-practice assessment in geography is rare. This is a concern given the distinctive nature of geography and the important role of assessment in the learning process. This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography. The chapters are written by leading researchers in Geographical Education from across the globe. These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia, USA, South Korea, Germany, Switzerland and Singapore. What unifies the work in this book, is that each chapter focuses on a key feature of the discipline of geography, providing scholarly examples of evidence-based practices for assessing student's knowledge and skills.

Assessing Academic Literacy in a Multilingual Society Oct 12 2020 South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and, to a much lesser extent, Afrikaans, but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools, which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students, not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience.

The Warrior Feb 02 2020

Human rights in diverse education contexts Jul 01 2022 The focus of this publication is on answering the central research question: How can Human Rights be advanced with regard to different kinds of diversities, and in different educational settings? The publication pays special attention to the advancement of human rights in a variety of education-related contexts, in keeping with human rights as a declared national priority for both society at large and the education system. One strategic priority of the Faculty of Education is research based on market requirements and needs. This book strives towards meeting this expectation by directly aiming at building human rights and social justice in the South African society, public schools and higher education institutions. Adjudication in the education context of the constitutional values of dignity, equality and freedom focusses regularly on learners. The book highlights the value of education for full-fledged citizenship by delineating what schooling should entail to inspire learners towards both claiming equal freedoms and rights and taking accountability for the responsibilities attached to citizenship.

Technical Report of the NAEP 1996 State Assessment Program in Mathematics Dec 26 2021 The purpose of this report is to provide technical information about the 1996 State Assessment in Mathematics. It provides a description of the design for the State Assessment and gives an overview of the steps involved in the implementation of the program from the planning stages through to the analysis and reporting of the data. The report describes in detail the development of the cognitive and background questions, the field procedures, the creation of the database and data products for analysis, and the methods and procedures used for sampling, analysis, and reporting. It does not provide the results of the assessment--rather, it provides information on how those results were derived. Chapters include: (1) "Overview: The Design, Implementation, and Analysis of the 1996 State Assessment Program in Mathematics"; (2) "Developing the Mathematics Objectives, Cognitive Items, Background Questions, and Assessment Instruments"; (3) "Sample Design and Selection"; (4) "State and School Cooperation and Field Administration"; (5) "Processing and Scoring Assessment Materials"; (6) "Creation of the Database, Quality Control of Data Entry, and Creation of the Database Products"; (7) "Weighting Procedures and Variance Estimation"; (8) "Theoretical Background and Philosophy of National Assessment Educational Progress (NAEP) Scaling Procedures"; (9) "Data Analysis and Scaling for the 1996 State Assessment Program in Mathematics"; and (10) "Conventions Used in Reporting the Results of the

1996 State Assessment Program in Mathematics. Appendices include: "Participants in the Objectives and Item Development Process"; "Summary of Participation Rates"; "Conditioning Variables and Contrast Codings"; "IRT (Item Response Theory) Parameters for Mathematics Items"; "State Assessment Program Reporting Subgroups; Composite and Derived Common Background Variables; and Composite and Derived Reporting Variables"; "Setting the NAEP Achievement Levels for the 1996 State Assessment in Mathematics"; "Correction of the NAEP Program Documentation Error in the 1992 State Mathematics Results"; "The Information Weighting Error"; and "Sample Design and Selection Tables." (Contains 78 references.) (ASK)

Twenty-Twenty Hindsight Aug 10 2020 "Twenty-twenty hindsight" means perfect understanding of events only after they have happened. In his book, Mosiuoa Sekese looks back on his life in the old and new South Africa and gives his own perceptive interpretation of the past events. Sekese suffered discrimination and prejudice under the old apartheid government as well as the new, democratic regime. His story is highly personal, but provides the reader with unique insights into the social and educational challenges that South Africa continues to grapple with. "I had a quick read and I find the content heartbreaking but fascinating. Especially as a white South African you are drawing me into a world that I always knew existed, but which few people have the guts and conviction to paint into words." - Louise Heystek-Emerton: CEO Wordwise/Khuluma Awethu

South African Schooling: The Enigma of Inequality Sep 03 2022 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling: from financing and policy reform to in-depth discussions of literacy, numeracy, teacher development and curriculum change. The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with: Are there different and preferential equilibria we have not yet thought of or explored, and if so what are they? In practical terms, how does one get to a more equitable distribution of teachers, resources and learning outcomes? While decidedly local, these questions resonate throughout the developing world. South Africa today is the most unequal country in the world. The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth. This is the largest 90-10 gap in the world, and one that is reflected in the schooling system. Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard-work and determination, but instead by the colour of their skin, the province of their birth, and the wealth of their parents. Looking back on almost three decades of democracy in South Africa, it is this stubbornness of inequality and its patterns of persistence that demands explanation, justification and analysis. "This is a landmark book on basic education in South Africa, an essential volume for those interested in learning outcomes and their inequality in South Africa. The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race, class, and place. The book brings together the wealth of decades of research output from top quality researchers to explore what has improved, what has not, and why." Prof Lant Pritchett, Harvard University "There is much wisdom in this collection from many of the best education analysts in South Africa. No surprise that they conclude that without a large and sustained expansion in well-trained teachers, early childhood education, and adequate school resources, South Africa will continue to sacrifice its people's future to maintaining the privileges of the few." Prof Martin Carnoy, Stanford University "Altogether, one can derive from this very valuable volume, if not an exact blueprint for the future, then certainly at least a crucial and evidence-based itinerary for the next few steps." Dr Luis Crouch, RTI

Educational Leadership in Becoming Aug 22 2021 Educational Leadership in Becoming reconsiders educational leadership in its current forms, and presents a more plausible form of educational leadership to contend with the complexities currently found in universities and schools. Much of the literature in vogue concerning educational leadership ranges from transactional to transformative representations of the concept in relation to educational management and policy, curriculum inquiry and pedagogical action. The primary aim of this book is to revisit some of the dominant understandings of educational leadership and to offer an extended view of the practice along the lines of potentiality and becoming. Davids and Waghid argue that all current forms of educational leadership are insufficient to enact responsible human action, particularly when it comes to addressing the combined issues of globalisation and equitable redress and transformation, whether in relation to leading schools or universities. The primary

objective of the book is to draw on the Agambian notion of becoming in order to show that an educational leadership in becoming is better placed to not only address the myriad challenges besetting education, but to also enhance the potential of leadership in action. The book addresses an international audience by analysing conceptions of transformative leadership and should be read by anyone who is interested in education and educational leadership, as well as the impact of neoliberal agendas on education and society. It should also appeal to those interested in the philosophy of education.

Teacher Empowerment Through Curriculum Development Jan 27 2022 "Teacher Empowerment through Curriculum Development: Theory into Practice encourages the empowerment and involvement of teachers in the curriculum development process. This updated third edition is a must for every teacher who acknowledges the need for empowerment and wishes to contribute to the process of curriculum development in a changing South Africa." --Book Jacket.

Turning Points in History Jul 09 2020 Written to give you ideas for how the Turning Points in History series of books can be used in the teaching of South African History in the National Curriculum Statement Grades 10-12 (General)."

Educational Assessment in a Time of Reform Feb 25 2022 Educational Assessment in a Time of Reform provides background information on large-scale examination systems more generally and the South African examination specifically. It traces the reforms in the education system of South Africa since 1994 and provides a description of the advances in modern test theory that could be considered for future standard setting endeavours. At the heart of the book is the debate on whether the current standard of education in Africa is good enough . If not, then how can it be improved? The aim of this book is to provide a point of departure for discussions on standard-setting, quality assurance, equating of examinations and assessment approaches. From this point of departure recommendations for practices in general and the exit-level (Grade 12) examination results in particular can be made. This book is ideal reading for principals, teachers, academics and researchers in the fields of educational assessment, measurement, and evaluation.

Independent School Guide for Washington, D.C. and Surrounding Area Mar 05 2020

Nagaland Dec 02 2019

Financial Education for Youth The Role of Schools Apr 05 2020 This publication addresses the challenges linked to the introduction of financial education in schools, provides practical guidance and case studies to assist policy makers, as well as a comparative analysis of existing learning frameworks.

University Pathway Programs: Local Responses within a Growing Global Trend May 07 2020 This volume is the first to compile the insights of experienced and informed education researchers and practitioners involved in the delivery of university pathway programs. These programs have emerged as effective responses to global, national and local students' needs when transitioning to Higher Education. The book opens with an overview of the main drivers for the development of university pathway programs, and a description of the main characteristics of such programs, as well as of the different types of programs available. It examines topics such as the way in which policy and governance issues at the institutional, state, and federal level affect university pathway programs' financial models, compliance and quality assurance mechanisms as well as program provision. It also looks at how to address issues related to 'non-traditional' background students such as those from lower socioeconomic background, students for whom English is an additional language (EAL), indigenous students, mature age students and humanitarian entrants. The volume showcases thirteen university pathway programs offered in Australia, Canada, New Zealand, South Africa, Qatar, and the United Kingdom. These examples provide valuable insights that will help guide future practice in the field as the programs described effectively foster and support the development of students' academic literacies, study skills and awareness of the socio-cultural norms that are necessary to participate successfully in higher education settings. In reporting the strategies to overcome challenges in the areas of curriculum development and implementation, of equity, inclusion and participation, of cross-sector collaboration and of student welfare, the volume promotes reflection on these issues and, therefore, better equips those education practitioners embarking on the university pathway program journey.

Technical Report of the NAEP 1996 State Assessment Program in Science Sep 22 2021 This technical report on the National Association of Educational Progress (NAEP) 1996 State

Assessment Program in Science provides an overview of the design, implementation and analysis of the educational assessment including details of sampling design, field administration, preliminary data analysis, and reporting of state results. This report also provides details on the background of the development of the 1996 instrument for science, sample design and selection, state and school cooperation, processing and scoring assessment materials, creation of the database and database products, weighting procedures and variance estimation, theoretical background and philosophy of NAEP scaling procedures, data analysis and scaling for the science assessment program, and conventions used in reporting the results. (DDR)

Researching Chinese Language Education Apr 17 2021 The culmination of more than a decade of research, this compelling volume offers a fresh approach for applying functional linguistics to assess student performance, to inform the teaching and learning of Chinese and to design curriculum and teaching materials. Documenting authentic systemic functional linguistics (SFL) studies in researching and teaching Chinese as a first or second language, this research is set in the multilingual settings of Hong Kong and Australia. The experiences of SFL and genre teaching in English have been well demonstrated as valid, viable and practical in different contexts; however this volume covers the relatively new domain of research into the applications of SFL to the teaching of Chinese. Using SFL as the research framework, the authors cover three major areas in Chinese language education: effective pedagogies, curriculum and material design, and text analysis. Covering major local curriculum reforms and the rapid growth of International Baccalaureate programmes worldwide, this book will be of interest to linguists, language teachers and teacher educators and those involved in the teaching and learning of Chinese around the world.

Teaching and Learning Difficult Histories in International Contexts Nov 12 2020 Grounded in a critical sociocultural approach, this volume examines issues associated with teaching and learning difficult histories in international contexts. Defined as representations of past violence and oppression, difficult histories are contested and can evoke emotional, often painful, responses in the present. Teaching and learning these histories is contentious yet necessary for increased dialogue within conflict-ridden societies, reconciliation in post-conflict societies, and greater social cohesion in long-standing democratic nations. Focusing on locations and populations across the globe, chapter authors investigate how key themes—including culture, identity, collective memory, emotion, and multi-perspectivity, historical consciousness, distance, and amnesia—inform the teaching and learning of difficult histories.
