Worldwide Successful Pediatric Nurse-Led Models of Care Aug 29 2019 This book provides readers with international exemplars of nurse-led/nurse-directed pediatric models of care. It offers innovative and forward-thinking models of nursing care, incentives and opportunities for nurses to replicate similar nurse-led models of care in their own clinical and community-based settings. Readers will benefit from selected and proven nurse-led/nurse-directed pediatric models of care that have been developed, implemented and evaluated by advanced practice pediatric nurses, including successful exemplars from less developed countries and underserved populations. This book is a welcome addition to faculty in child health graduate programs and/or clinicians in hospitals to have this kind of “model” for practice. This book encompasses an extensive compilation of contributions of international authors, also from countries that have been rarely featured in books, and it facilitates worldwide linkages with colleagues internationally.

Introductory Maternity & Pediatric Nursing Mar 29 2022 "This third edition of Introductory Maternity and Pediatric Nursing reflects the

underlying philosophy of love, caring, and support for the childbearing woman, the child, and the families of these individuals. The content has been developed according to the most current information available. In this text, we recognize that cultural sensitivity and awareness are important aspects of caring for the childbearing and child-rearing families. We also recognize that many children and pregnant women live in families other than traditional two-parent family homes and therefore refer to teaching and supporting the childbearing clients and family caregivers of children in all situations and family structures"--Provided by publisher.

Wong's Nursing Care of Infants and Children - E-Book Jul 21 2021 The leading text in pediatric nursing, Wong's Nursing Care of Infants and Children takes a unique, easy-to-understand developmental approach to describe the care of children at each age and stage of development. Childhood diseases and disorders are organized by age groups and body systems, and described through the nursing process framework. This edition includes updates on topics such as the new CPR guidelines, immunizations, and pain assessment and management. Written by pediatric experts, Dr. Marilyn Hockenberry and David Wilson, each with nearly 30 years of hands-on experience, this bestseller provides an evidence-based, clinical perspective that shows how the quality of nursing care can impact quality patient outcomes. "A good neonatal and paediatric reference and textbook..." Reviewed by Jo Wilson on behalf of Nursing Times, March 2015 A developmental approach addresses the differences at each stage of the child's growth and enables you to individualize care at the appropriate level for each child. UNIQUE! Quality Patient Outcomes are discussed for major childhood diseases and disorders, showing how nursing care directly impacts patient outcomes. Nursing Care Plans provide models for planning patient care, with rationales explaining why specific nursing interventions have been chosen, and include nursing diagnoses, patient/family goals, nursing interventions/rationales, expected outcomes, and NIC and NOC guidelines. A focus on family-centered care emphasizes the role and influence of the family in health and illness with a separate chapter and Family-Centered Care boxes. Critical thinking exercises use case studies to help you test and develop your own analytical skills. Nursing Care Guidelines provide clear, step-by-step, detailed instructions on performing specific skills or procedures. Nursing Tips include helpful hints and practical, clinical information, and Nursing Alerts provide critical information that must be considered in providing care. An emphasis on wellness includes principles of health promotion and injury prevention for each age group. Drug Alerts highlight important drug-related information for safe, appropriate care. Pathophysiology Reviews explain complicated disease processes with illustrated summary boxes. Complementary & Alternative Therapy boxes include timely information on alternative medicine as a part of complete, comprehensive care. Atraumatic Care boxes contain techniques for care that minimize pain, discomfort, or stress, and provide guidance for performing procedures in a caring manner. Emergency Treatment boxes serve as a quick reference in critical situations.
