Developing Creative and Critical Thinking: An Integrated Approach Nov 24 2019 This book is a storehouse of interesting activities, whose point is to help you think better -- more clearly, more imaginatively, and more critically, than you do now. The author has based his book on three assumptions: 1- thinking is as much a matter of attitude as it is of skills; 2- thinking often proceeds in an indirect, roundabout way rather than a straight line; and 3- thinking is an activity embedded in everyday life, not one occasionally done in school. -- Back cover.

Critical Thinking in a Nutshell Jan 19 2022 Did you know that 93% of CEOs agree that THIS skill is MORE IMPORTANT than your college degree? Amazon's market cap is 1.7 TRILLION dollars. And it all started when Jeff Bezos used this skill to see a market inefficiency back in the day, before anyone else. During the 1980s "Coke Wars," Coca-Cola and Pepsi went back and forth competing to be America's top soda. But Coca-Cola didn't use this skill at the right time...And their mistake almost completely blew up one of America's oldest and most valuable companies. Having this skill in your back pocket is like shortcutting Malcom Gladwell's 10,000 hours rule to learning something (who's got time for that?). So, what is it? Nothing complex or fancy. But it's the skill Supreme Court justices have in spades (they're the highest legal authority in our country because they can do this thing). It's critical thinking. Critical thinking is one of those skills everyone "thinks" that they already have... But most people are anxious, unhappy, doubt their decisions, and aren't where they want to be in life. Sometimes, basic skills aren't so basic. But it's not your fault. Our educational system doesn't teach critical thinking. You can only learn it from the right kind of experiences - and most people never do. In 2011, a study called "It Takes More Than a Major: Employer Priorities for College Learning and Student Success" found that 93% of business leaders agreed "a demonstrated capacity to think critically, communicate clearly, and solve complex problems is more important than [a candidate's] undergraduate major." So, if you feel like you don't have the right diploma or the right skill set to succeed at what you do, don't worry. But if you thought your degree would get you everything you've wanted out of life, you're going to be disappointed. Remember when people thought the Earth was flat? It took a critical thinker to disprove that. The ancient Chinese general Sun Tzu said, "know your opponent and know yourself, in a hundred battles, you will never be in peril." You (probably) won't be leading an army into war, but the ability to think clearly will help you keep confident no matter what life throws at you. Here's just a fraction of what you'll discover inside: The critical thinking framework developed by two of the most experienced critical thinking scientists of all time - and how to make it your own The reason VHS became a household name and Betamax became a household joke (Ever heard of Betamax? No? There's a reason for that) How to shortcut the famous Malcom Gladwell "10,000 Hours Rule" to become an expert critical thinker, fast The 7 qualities of a critical thinker - how many do you have right now? What a WW2 pilot and the people of Romania can teach you about critical thinking - this is the KEY to not making huge mistakes How to identify fake news and misinformation - learn this, and you'll have a MASSIVE leg up on almost everyone around you right now Actionable, easy exercises to drill home every

point covered in the novel. You won't "read and forget" this book ...and much, much more! This isn't a dry, theoretical textbook - every inch of this book is dedicated to imparting to you the maxims of how to think critically, as fast and effectively as possible. Because our educational system doesn't teach critical thinking, it's unlikely this is information you've ever learned ANYWHERE else. This book is practical and easy to read and implement. If you don't improve your ability to think critically, how do you expect your life to change? It's time to stop second-guessing yourself - scroll up and click "Add to Cart" now!

Thinking for Yourself Oct 04 2020 Mayfield's THINKING FOR YOURSELF, 9E, International Edition fully integrates critical thinking with composition and reading. Ask Questions: If you want to be a critical thinker, it helps to be curious. It's normal to wonder about the world around us. Some questions are big, and some are small. Sometimes questions can spark debate and argument. All critical thinking starts with at least one question. Gather Evidence: First, find information—from making observations to interviewing experts to researching a topic online or in books. Then make connections and draw conclusions. Evaluating Evidence: Smart thinkers evaluate the importance, accuracy and relevancy of the information they gather. Getting Curious: Consider other points of view, examine your own point of view, understand the power of emotion, and practice empathy. Draw Conclusions: The final step in the critical thinking process, this is based on reason and evidence. Revisit your original question, review the evidence and what you've learned, and consider your values. And remember: critical thinking doesn't stop when you've reached a decision. Learn how to discuss and debate other points of view. Then keep growing. Sometimes you might change your mind—that's OK, too!
