Leanness in Domestic Birds Jul 01 2022 Leanness in Domestic Birds: Genetic, Metabolic, and Hormonal Aspects is a proceeding of a symposium held in Tours, France, from 4 to 6 August 1987. Said symposium was concerned with genetic and metabolic factors associated with leanness of poultry and accounts of research in these areas. The book is divided into six parts. Part I covers studies that involve genetics in the selection of meat leanness. Part II deals with the relationship of feed intake and metabolism to the leanness of poultry. Part III discusses the lipid metabolism in birds and its related factors and effects. Part IV talks about the use of hormones such as insulin, thyroid hormones, and corticosteroids in the control of fatness in birds. Part V covers studies involving amino acid metabolism and its relation to leanness in poultry, and Part VI talks about the applications of the studies in commercial use. The text is recommended for zoologists, agriculturists, and poultry farmers who would like to know more about the different factors that affect the leanness of domestic birds and its implications.

Type 2 Diabetes: New Insights for the Healthcare Professional: 2011 Edition Nov 12 2020 Type 2 Diabetes: New Insights for the Healthcare Professional: 2011 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Type 2 Diabetes. The editors have built Type 2 Diabetes: New Insights for the Healthcare Professional: 2011 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Type 2 Diabetes in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Type 2 Diabetes: New Insights for the Healthcare Professional: 2011 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

Neuroanatomy of Neuroendocrine Systems Jan 15 2021 In this book, experts in the field provide comprehensive descriptions of the neuroanatomy of the hypothalamic neuroendocrine systems. The book begins with an extensive discussion on the structural components of the neuroendocrine systems. The reader will be introduced to the anatomy and biology of the hypothalamus and the pituitary. The human hypothalamus is presented in particular detail using state-of-the-art imaging techniques. In the next section, the neuroanatomy of traditional hypothalamo-hypophyseal systems is highlighted, with chapters describing magnocellular neuroendocrine cells and discussing the respective types of hypothalamic neurons that regulate various pituitary hormones. Following this detailed structural and anatomical description of the neuroendocrine system, the book's final section focuses on the hypothalamic control of neuroendocrine functions. This includes the control of circadian rhythm, metabolism and appetite via specific peptidergic circuits. This book provides essential information on the neuroanatomy and control of neuroendocrine systems, addresses cutting-edge research questions posed by recent advances in the development of potent neuroanatomical tools, and highlights the latest technologies used in neuroendocrinology research, making it a valuable reference guide for students, trainees and established researchers alike. This is the twelfth volume in the International Neuroendocrine Federation (INF) Masterclass in Neuroendocrinology series, which aims to illustrate the highest standards and to encourage the use of the latest technologies in basic and clinical research and hopes to provide inspiration for further exploration into the exciting field of neuroendocrinology.

Intermittent fasting in chickens Sep 03 2022 Broiler breeder chickens are the parent stock used to produce broiler chickens raised for human consumption and have long been caught in a welfare dilemma. The immensely successful selection of fast-growing meat-type chickens over the last 80 years has created a remarkably efficient meat-producer and given us access to cheap chicken meat but has also created health problems for the animals. These problems especially affect the breeder generation, which must be raised with strict feed restriction to limit weight gain and thus maintain physical health and normal fertility. At the same time, however, feed restriction causes chronic hunger and feeding frustration with reduced animal welfare as a result. In the EU alone 60 million breeders are affected annually and although the

problem is well-known within the industry, there is financial incentive to keep selecting for even higher growth potential in broilers, further increasing the problems for broiler breeders. Many strategies for reducing the impact of growth restriction on breeder welfare have been suggested and are usually aimed at somehow increasing the amount of feed given at feeding times. This can be done either through adding bulky fibers to the diet or by reducing feeding frequency. In this thesis, focus is on the latter as we explore the effects of intermittent fasting (IF) on the welfare of young broiler breeders as well as wild-type Red Junglefowl. Intermittent fasting, or "skip-a-day" feeding, is supposedly the most common feeding strategy for broiler breeders worldwide but is perceived as welfare-reducing and thus illegal in Sweden and several other European countries. In spite of this, the scientific knowledge of how this type of feeding affects chicken welfare is scarce. Assessing the overall effect of IF on breeder welfare is complicated by large variations in both physiological and behavioral parameters between feeding and fasting days, but it does appear that chicken welfare is improved at least on the feeding days of IF regimens. It also seems that some of the health benefits reported from mammalian studies of IF may apply to chickens as well, although behavioral indicators still point to welfare issues unless the level of feed restriction can be relaxed. In comparison with daily feed restriction, IF appears to increase the motivation for feed consumption but to reduce the motivation for appetitive behaviors such as foraging, which may explain why birds fed on this type of schedule are often reported as calmer.

Ramadan Activities Jul 09 2020 Celebrate Ramadan with the entire class! With these engaging activities, students will learn how to write their names in Arabic and complete other themed projects.

MRCOG Part One Oct 31 2019 Fully updated to reflect changes to the curriculum and question format since publication of the original edition, this book is essential reading for all Part 1 MRCOG candidates. A chapter has been added to mirror the new curriculum domain of data interpretation. Edited by experienced RCOG examiners and written by contributors to the RCOG's revision course, this comprehensive textbook provides extensive coverage of all curriculum areas covered by the Part 1 examination (the basic sciences which are vital to the clinical practice of obstetrics and gynaecology). Fully illustrated in colour throughout to aid understanding, this is the one textbook that every Part 1 candidate should own. The content is complementary to RCOG's eLearning programme StratOG (<https://stratog.rcog.org.uk>) which offers a range of products to support training and professional development in obstetrics and gynaecology, including banks of Single Best Answer (SBA) questions that offer candidates invaluable practice at tackling this demanding examination.

Obesity, An Issue of Endocrinology and Metabolism Clinics of North America Aug 10 2020 This issue of Endocrinology and Metabolism Clinics will cover Obesity. Curated by Dr. Michael D. Jensen, this issue will explore topics in the field that are relevant for practicing clinicians. This issue is one of four selected each year by the series Consulting Editor, Adriana G. Ioachimescu. The volume will include articles on: The role of the environment in the "obesity epidemic, Endoscopic treatments for obesity, Visceral fat, Role of commercial weight loss programs in medical management of obesity, Racial differences in metabolic consequences of fat gain, Sex differences in adipose tissue function, Common and rare complications of bariatric surgery, Strategies for physical activity interventions in the treatment of obesity, Effects of pregnancy on childhood overweight and obesity, Iatrogenic Obesity, Growth hormone and obesity, and Barriers and solutions for prescribing obesity pharmacotherapy.

Neglected Factors in Pharmacology and Neuroscience Research Jun 19 2021 Techniques in the Behavioral and Neural Sciences, Volume 12: Neglected Factors in Pharmacology and Neuroscience Research: Biopharmaceutics, Animal Characteristics, Maintenance, Testing Conditions can be used as reference in the improvement of test designs for biochemists and physiologists in the control of test conditions. The book is divided into five sections. The introduction deals with the uncertainty of animal characteristics and test conditions as hindrances to the development of general insight into biological regulatory mechanism. The first section discusses biopharmaceutics – the interaction of drugs when interacting with molecules or enzymes in sufficient concentration at a specific site of action. The second section reviews animal characteristics in terms of strain differences, sex differences, and changes during development and aging of the subject. The third section discusses the maintenance of experimental animals such as housing conditions, food composition, and water intake as these kinds of environmental factors may shape the phenotype and responsiveness of the experimental animal. The fourth section explains the testing conditions such as metabolic effects and drug interactions, anesthesia, stress, and even the effects on circadian rhythms. The last section is a discussion on the importance of experimental results. This section covers internal and external validities and statistical inference. The author concludes that the design of any experiment should include a power analysis so that reliable and valuable conclusions can follow. Biochemists, physiologists, pharmacokineticists, toxicologists, chemical researchers, and others for whom drugs are their main focus of study will find this book valuable.

Intermittent Fasting for Women Over 50 Sep 22 2021 Are you worried that at 50+ and with your menopausal hormones raging, you can't try just any weight loss approaches like intermittent fasting like everyone else because your body is not the same as it was a few years or decades ago and are wondering which is the best approach to model your adoption of intermittent fasting to ensure you don't mess up your hormones even further? And are you looking for a guide that will show you exactly how to navigate the whole process of losing weight with intermittent fasting in your senior years without making costly mistakes? If you've answered YES, keep reading... You're About To Discover How You Can Safely Fast, Manage Menopause, Slow Down Aging, And Stay Fit While Maintaining Normal Hormonal Balance Through Intermittent Fasting As A Woman Over 50! At 50+, it makes sense that you are looking for a dietary approach to weight loss that is not too extreme and that you can stick to for the long haul like intermittent fasting. However, it is perfectly okay if you have all manner of questions going through your mind before you commit. Perhaps you're still wondering... Am I even fit to follow intermittent fasting at my age and or given my health status? How is fasting different whether you are young or in your senior years as a woman? How will fasting affect your body as a woman over 50? What benefits can you expect to get from fasting? What are the dos and don'ts you should observe while following intermittent fasting as a senior woman? How do you adopt intermittent fasting the right way? If you have these and other related questions, then lucky for you, this book answers them all using simple, straightforward language to ensure you have an easy time putting everything you learn into action. In it, you will discover: · The basics of intermittent fasting, including what it is, how it works and why it works · How IF is particularly helpful for women over 50 · When to use intermittent fasting and mistakes to avoid while following IF · The different ways to adopt intermittent fasting and how to determine the right approach · Superfoods you should take for a woman over 50 if you are to support your body right through the fasted state · Best exercises you can do to remain healthy, even with your fasts, including how to time workouts in between feeding and fasting windows · How to manage menopause, slow down aging and lose weight in a record time in your senior years · Comprehensive IF recipes, and a complete 21-day meal plan · Powerful tips on how you can use intermittent fasting to lose bodyweight while maintaining a normal hormonal balance · And much, much, more! Even though you've tried so many other approaches to lose weight but failed because they were too limiting and the cravings made you give in, this book

will show you everything there's to know about intermittent fasting to ensure you adapt it the right way! Scroll up and click Buy Now With 1-Click or Buy Now to get started today!

Hygienic Review Jan 03 2020

Perinatal Physiology Feb 13 2021 Living Nature, not dull Art Shall plan my ways and rule my heart -Cardinal Newman Nature and Art 1868 One of the ineluctable consequences of growth in any field of science is that subjects of inquiry once established tend to give birth to subsubjects and that the subsubjects once established will in time undergo further mitotic division. Not so many years ago, problems surrounding the fetus and newly born infant lay in a realm almost to be described as a "no-man's land." Obstetricians properly gave major consideration to understanding and learning about processes and disorders concerned with maternal health and safety. The welfare of the infant was regarded as of secondary importance. Pediatricians on their part hesitated to invade the nursery, a sanctum regarded as belonging to the domain of the accoucheur. And the pathologist, enveloped in the mysteries of life and death in the adult, found scant time for the neonate and the placenta.

Fast Diets For Dummies Mar 29 2022 Lose weight with the Fast Diets? Easy! Over the last few decades, food fads have come and gone, but the standard medical advice on what constitutes a healthy lifestyle has stayed much the same: eat low-fat foods, exercise more, and never, ever skip meals. Yet, over that same period, levels of obesity worldwide have soared. So is there a different, evidence-based approach? Yes! Fast Diets are the revolutionary part-time weight loss programs with lifelong health and anti-aging results. *Fast Diets For Dummies* is your hands-on, friendly guide to achieving weight loss, without having to endlessly deprive yourself. Inside, you'll get the lowdown on easily incorporating one or all of these unique dietary programs into your busy life. You will get the lowdown on tackling the most popular fasting diets such as: The Fast Diet (5-2 Diet), Intermittent Fasting, Micro-Fasting, and One Meal a Day (Warrior Diet). It offers you information and tips on how to incorporate these unique and popular dietary programs into your busy daily life. How and why the benefits of these fasting diets go well beyond weight loss Fast diets dos and don'ts How to get started and everything you need to know to help you along the way Over fifty 500- and 600- calorie meals that are quick and easy to make

Digital Personalized Health and Medicine Aug 29 2019 Digital health and medical informatics have grown in importance in recent years, and have now become central to the provision of effective healthcare around the world. This book presents the proceedings of the 30th Medical Informatics Europe conference (MIE). This edition of the conference, hosted by the European Federation for Medical Informatics (EFMI) since the 1970s, was due to be held in Geneva, Switzerland in April 2020, but as a result of measures to prevent the spread of the Covid19 pandemic, the conference itself had to be cancelled. Nevertheless, because this collection of papers offers a wealth of knowledge and experience across the full spectrum of digital health and medicine, it was decided to publish the submissions accepted in the review process and confirmed by the Scientific Program Committee for publication, and these are published here as planned. The 232 papers are themed under 6 section headings: biomedical data, tools and methods; supporting care delivery; health and prevention; precision medicine and public health; human factors and citizen centered digital health; and ethics, legal and societal aspects. A 7th section deals with the Swiss personalized health network, and section 8 includes the 125 posters accepted for the conference. Offering an overview of current trends and developments in digital health and medical informatics, the book provides a valuable information resource for researchers and health practitioners alike.

Examining God's Purposes for Fasting and Prayer Apr 29 2022 What is fasting? How often should I fast? Is there a right and wrong way to fast? Are there physical benefits to fasting? Will fasting and prayer really help me live a life more pleasing to God? Those, and other valid questions are addressed squarely right here. It is unfortunate that most assume that the subject of fasting and prayer is esoteric (obscure, cryptic, mysterious, and restricted to the few). This book is intended to open the door of understanding for all who desire to know what the Bible says about fasting and prayer. If this is your motive, you will not be disappointed because *Examining God's Purposes for Fasting and Prayer* draws its conclusions directly from the Word of God. Once the reader becomes acquainted with the principles outlined in this book, he/she will be better equipped to practice this vital (and oft neglected) spiritual and physical discipline.
