Sick Not Sick Mar 05 2020 *Sick Not Sick* is designed to help EMS personnel develop rapid patient assessment skills. The program distills years of field experience into a workable formula that both inexperienced and experienced providers can use in the field. It teaches EMS personnel how to quickly collect information and discriminate the important from the unimportant to offer immediate initial care based upon his or her observations. After all, in EMS it comes down to whether the patient is sick or not sick. This book is part of the EMS Continuing Education Series. As an EMS provider, you know that your education does not stop when you finish your initial training. The things you learn in the field and in continuing education classes give you the extra skills and knowledge to make you the best provider you can be. The EMS

Pediatric Anesthesia: A Problem-Based Learning Approach

Jan 27 2022 Linking existing knowledge to new knowledge by presenting it in the form of a case or a problem is a popular and effective educational approach resulting in better retention of the knowledge and improved ability to apply that knowledge to solve real problems. This problem-based learning (PBL) method was introduced into medical education at McMaster University in Ontario, Canada, in 1969. Since then it has been widely incorporated into secondary, undergraduate, and graduate education in a variety of disciplines worldwide. This new volume for the Anesthesiology Problem-Based Learning series reviews pediatric anesthesia utilizing the PBL approach. Each chapter deals with conditions and problems in pediatric anesthesia practice presented as a case stem with questions to encourage critical thinking,

followed by an evidence-based discussion and multiple-choice questions for self-assessment. Cases were carefully selected to present a broad systems-based tour of commonly encountered clinical cases in pediatric anesthesia. The book can be used to review an upcoming clinical case or as a PBL tool. The 'Stem Case and Key Questions' and 'Discussion' sections can serve as the basis for interactive learning experiences for study groups or as a broad yet in-depth clinical review of the subspecialty for the individual learner. Self-assessment questions can be used as a measure of knowledge acquisition or simply as a question bank to prepare for examinations.
