Post-Authorization Safety Studies of Medicinal Products

Aug 10 2020 Post-Authorization Safety Studies of Medicinal Products: The PASS Book bridges the gap in the literature by providing a complete look at post-authorization safety studies and important pharmacoepidemiology and pharmacovigilance aspects. It covers various types and limitations of active surveillance programs, including the use of large databases and disparate data sources for rapid signal detection, as well as novel and advanced design and analysis approaches for causal inference from observational data. This book serves as an important reference for pharmacovigilance scientists and pharmacoepidemiologists who are searching for the appropriate study design to answer safety research questions. Readers will be able to effectively and efficiently design and interpret findings from post-authorization safety studies with the goal of improving the benefit-risk balance of a drug in order to optimize patient safety. Discusses all types of observational studies in post-marketing drug safety assessment, from spontaneous reporting systems, to pragmatic trials, with examples from real-world settings Presents various types of post-authorization safety studies Offers solutions to the common challenges in the design and conduct of these studies Highlights active surveillance programs, including common data models for rapid signal detection of drug safety issues

[Handbook of Pharmaceutical Manufacturing Formulations, Third Edition](#) Dec 26 2021 The Handbook of Pharmaceutical Manufacturing Formulations, Third Edition: Volume Three, Liquid Products is an authoritative and practical guide to the art and science of formulating drugs for commercial manufacturing. With thoroughly revised and expanded content, this third volume of a six-volume set, compiles data from FDA and EMA new drug applications, patents and patent applications, and other sources of generic and proprietary formulations including author's own experience, to cover the broad spectrum of cGMP formulations and issues in using these formulations in a commercial setting. A must-have collection for pharmaceutical manufacturers, educational institutions, and

regulatory authorities, this is an excellent platform for drug companies to benchmark their products and for generic companies to formulate drugs coming off patent. Features: □ Largest source of authoritative and practical formulations, cGMP compliance guidance and self-audit suggestions □ Differs from other publications on formulation science in that it focuses on readily scalable commercial formulations that can be adopted for cGMP manufacturing □ Tackles common difficulties in formulating drugs and presents details on stability testing, bioequivalence testing, and full compliance with drug product safety elements □ Written by a well-recognized authority on drug and dosage form development including biological drugs and alternative medicines **The Veterinary Laboratory and Field Manual 3rd Edition** Jan 27 2022 Isolated regions of the world are often at the forefront of emerging diseases. To be effective in disease prevention and control, they require basic resources for field sample collection and testing. Technical support for field extension staff, and the availability of reliable diagnostic testing facilities, are also vital to ensure sustainable livelihoods for subsistence farmers. This technical handbook aims to provide an easy to follow overview of the basic laboratory techniques and sample collection guidelines. The third edition provides the reader with a summary of basic diagnostic procedures and sample submission guidelines.

with both depth and breadth • Is applicable as an introduction for library funding agencies and public library trustees or boards

[The New Economic Diplomacy](#) Aug 29 2019 The New Economic Diplomacy explains how states conduct their external economic relations in the 21st century: how they make decisions domestically, how they negotiate internationally and how these processes interact. Although the previous edition, published in 2011, was able to reflect the impact of the financial crisis and the immediate reaction to it, a lot has happened since then, and the atmosphere of economic diplomacy has darkened. To capture the emergence of new trends and the intensification of old ones, the salient features of this new edition are: The advance of China and other emerging powers at the expense of G7 governments, despite some setbacks; Much greater activity in negotiating regional and plurilateral trade agreements, while the multilateral system struggles; The persistence of problems exposed by the financial crisis, notably the long-running euro-zone crisis. The interaction between domestic and external forces: the balance has shifted towards the domestic axis, with international agreement more difficult to achieve. This edition goes further in comparing the practice of different players, to reflect the greater diversity of economic diplomacy. Based on the authors' work in the field of International Political Economy, it is suitable for students interested in the decision-making processes in foreign economic policy, including those studying international relations, government, politics and economics. It will also appeal to politicians, bureaucrats, business people, NGO activists, journalists and the informed public.

Shaping EU Public Procurement Law Jun 07 2020 The first part of the book offers a unique

reflection on enduring themes in public procurement law such as the shaping of the scope of this regulatory regime, the development of tighter criteria for the exclusion of candidates and tenderers, the conduct of qualitative selection, the consolidation of the court's previous approach to technical specifications, new developments in tender evaluation, the inclusion of contract performance clauses with a social orientation, and, last but not least, the development of interpretive guidance concerning several aspects of the procurement remedies regime. The book shows that the period 2015–2017 has been an interesting and rather intense period for the development of EU public procurement law, where the CJEU has not only consolidated some parts of its long-standing procurement case law but also introduced significant innovations that can create future challenges for the consistency of this regulatory regime. The first part of the book concludes with some thoughts on some of the salient aspects of this recent episode of silent reform of EU public procurement law through CJEU case law. The second part of the book contains the essential excerpts of forty-one chronologically ordered judgments issued by the CJEU in the period 2015–2017, which have been selected because they either raise new issues or important matters of public procurement law. Each of the selected judgments is followed by an exhaustive and critical in-depth analysis, highlighting and providing insight into its legal and practical issues and consequences. An exhaustive subject-index offers the reader quick and easy access to the case law treated in this book. This unique book, a 'must-have' reference work for judges and courts of all EU Member States and candidate countries and academics and legal professionals who are active in the field of procurement law, will also be valuable for law libraries and law schools across the world and for law students who focus their research and studies on EU law.

The Oxford Handbook of Japanese Politics Jan 03 2020 "Book Abstract and Keywords: The study of Japanese politics has flourished over the past several decades. This Handbook provides a state-of-the-field overview for students and researchers of Japanese. The volume also serves to introduce Japanese politics to readers less familiar with Japan. In addition, the volume has a theme of "evaluating Japan's democracy." Taken as a whole, the volume provides a positive evaluation of the state of Japan's democracy. The volume is divided into two parts, roughly corresponding to domestic Japanese politics and Japan's international politics. Within the domestic politics part, there are four distinct sections: "Domestic Political Actors and Institutions," covering the Japanese Constitution, electoral systems, prime minister, Diet, bureaucracy, judiciary, and local government; "Political Parties and Coalitions," covering the Liberal Democratic Party, coalition government, Kōmeitō, and the political opposition; "Policymaking and the Public," covering the policymaking process, public opinion, civil society, and populism; and, "Political Economy and Social Policy," covering industrial, energy, social welfare, agricultural, monetary, and immigration policies, as well as social inequality. In the international relations part,

Shareholder Activism and the Law Sep 22 2021

This book provides a complete framework for contemporary shareholder activism and its implications for US corporate governance, which is based on director primacy theory. Under director primacy theory, shareholders do not wish to be involved in the management of the company; in the rare event that they wish to be involved, it is considered a transfer of power from the board of directors to shareholders, which in turn reduces the efficiency of centralised decision-making in public companies. However, this book demonstrates that shareholders do not use their power to transfer corporate control from the board to themselves, and that some form of shareholder activism is even collaborative, which is a new paradigm for US corporate governance. This book shows that while monitoring remains a key contribution of shareholders, they also bring new informational inputs to corporate decision-making that could not be obtained under the traditional board model. Accordingly, contemporary shareholder activism enhances the board's decision-making and monitoring capacity, without undermining the economic value of the board's authority. Therefore, this book argues that the complete approach of contemporary shareholder activism should be accommodated into US corporate governance. In doing so, this book considers not only legal and regulatory developments in the wake of the 2007–2008 financial crisis, but also the governance developments through by-law amendments. Furthermore, the author makes several recommendations to soften the current director primacy model: establishing a level playing field for private ordering, adopting the proxy access default regime, the majority voting rule, the universal proxy rules, and enhancing the disclosure requirements of shareholders. The book will be of interest to academics and students of corporate governance, both in the US and internationally.

preserve natural resources. It provides the necessary conditions to encourage economic and social actors to adopt strategies toward sustainability. However, the increasing complexity of sustainability aspects means that traditional engineering and management/economics alone cannot face the new challenges and reach the appropriate solutions. Thus, this book highlights the role of engineering and management in building a sustainable society by developing a circular economy that establishes and protects strong social and cultural structures based on cross-disciplinary knowledge and diverse skills. It includes theoretical justification, research studies, and case studies to provide researchers, practitioners, professionals, and policymakers the appropriate context to work together in promoting sustainability and circular economy thinking. Volume 1, *Circular Economy and Sustainability: Management and Policy*, discusses the content of circular economy principles and how they can be realized in the fields of economy, management, and policy. It gives an outline of the current status and perception of circular economy at the micro-, meso-, and macro-levels to provide a better understanding of its role in achieving sustainability. Volume 2, *Circular Economy and Sustainability: Environmental Engineering*, presents various technological and developmental tools that emphasize the implementation of these principles in practice (micro-level). It demonstrates the necessity to establish a fundamental connection between sustainable engineering and circular economy. Presents a novel approach, linking circular economy concepts to environmental engineering and management to promote sustainability goals in modern societies Approaches the topic on production and consumption at both the micro and macro levels, integrating principles with practice Offers a range of theoretical and foundational knowledge in addition to case studies that demonstrate the potential impact of circular economy principles on both economic and societal progress

2019 The Linux Programming Interface (TLPI) is the definitive guide to the Linux and UNIX programming interface—the interface employed by nearly every application that runs on a Linux or UNIX system. In this authoritative work, Linux programming expert Michael Kerrisk provides detailed descriptions of the system calls and library functions that you need in order to master the craft of system programming, and accompanies his explanations with clear, complete example programs. You'll find descriptions of over 500 system calls and library functions, and more than 200 example programs, 88 tables, and 115 diagrams. You'll learn how to: –Read and write files efficiently –Use signals, clocks, and timers –Create processes and execute programs –Write secure programs –Write multithreaded programs using POSIX threads –Build and use shared libraries –Perform interprocess communication using pipes, message queues, shared memory, and semaphores –Write network applications with the sockets API While The Linux Programming Interface covers a wealth of Linux-specific features, including epoll, inotify, and the /proc file system, its emphasis on UNIX standards (POSIX.1-2001/SUSv3 and POSIX.1-2008/SUSv4) makes it equally valuable to programmers working on other UNIX platforms. The Linux Programming Interface is the most comprehensive single-volume work on the Linux and UNIX programming interface, and a book that's destined to become a new classic.

Psychosocial Resilience and Risk in the Perinatal Period Mar 17 2021 Bringing together experts in the field, this important book considers the underlying risk factors that create situations of psychosocial vulnerability and marginalisation for mothers, from their baby's conception up to a year after birth. Adopting a strengths-based approach, the book looks not only at the incidence and impact of disadvantageous circumstances on women but also explores protective factors at an individual, family, community and service level. It identifies promising evidence-based interventions and sources of resilience. With a distinctive focus on social and cultural diversity, *Psychosocial Resilience and Risk in the Perinatal Period* considers a wide range of personal circumstances and social groups, including women's experiences of traumatic birth, domestic and family violence, drug and alcohol use and mothering by indigenous, same-sex and disabled women. Throughout, case studies and service user experiences are used to illuminate the issues and illustrate exemplary care practice. International in scope, this book is particularly strong on the implications for care practices and health service delivery within Western models of maternity care. Its applied focus and evidence base makes it eminently suitable for study purposes and professional reference. Of relevance to midwives, health visitors and other health and social care practitioners, *Psychosocial Resilience and Risk in the Perinatal Period's* final chapters focus on developing resilience amongst professionals and multiprofessional and interagency working.

Concussion Care Manual Jun 19 2021 This is a practical manual for clinicians who take care of patients with concussions. The long-term effects of concussions are an increasingly recognized problem in the medical community and by the general public. Most people recover well from concussions, but a substantial minority does not. However, most clinicians do not have specific training in how to evaluate and treat concussion patients who do not make a rapid and complete recovery. This manual, based on the experience of the director of the concussion clinic at Washington University in St Louis, provides specific step-by-step guidance for managing a variety of problems related to complex concussions: making an accurate diagnosis, general treatment strategies, headaches, sleep disruption, attention deficit, mood instability, anxiety and depression, post-traumatic stress, personality change, balance problems, dizziness, fatigue etc. Furthermore, there are specific sections on return to work, return to driving, return to school and return to contact sports. Finally, the manual includes information on special topics, such as concussion in adolescents, children, contact sport athletes, military personnel, and patients involved in medico-legal matters. The manual is written for clinicians with a broad

range of backgrounds: primary care physicians, nurse practitioners, physician's assistants, athletic trainers, emergency medicine doctors, neurologists, neurosurgeons, psychiatrists, and rehabilitation medicine physicians should all be able to use the manual effectively. There is information on how to set up a specialty concussion clinic, and an extensive list of internet-based resources related to concussion. A list of other publications is provided to point to additional detailed information beyond what a pocket-sized 'on-the-fly' manual can provide.

Municipal Fiscal Stress, Bankruptcies, and Other Financial Emergencies May 07 2020 It is difficult to find someone who has not heard about the Puerto Rico, Detroit, Michigan, or Orange County, California, bankruptcies. While guides for responsibly managing government finances exist, problems often originate not because of poor financial reporting or financial deficiencies but because issues external to financial wellbeing arise, such as economic, demographic, political, legal, or even environmental factors. Exacerbating the problem, there is not much advice in the existing literature on how to act when municipalities face financial struggles. Filling this important gap, this book explores fiscal health and fiscal hardships, municipal defaults

and bankruptcies, and many other aspects to help guide local governments during fiscal distress. Fiscal hardships negatively affect the quality and availability of public goods and services and, consequently, the wellbeing of residents and businesses living and working in distressed municipalities. Turned off streetlights, unmaintained public parks, potholes, inconsistent garbage pickup, longer response time from emergency services, and multiple other issues that residents of the struggling municipalities deal with, lead to higher crime rates, lower quality of K-12 education, dangerous road conditions, lower housing values, outmigration of wealthier population, and numerous other problems. The COVID-19 pandemic put additional unprecedented pressure on municipal finances nationwide. In this book authors Tatyana Guzman and Natalia Ermasova evaluate

distressed cities and municipalities and provide practical recommendations on improving their financial conditions. What are conditions and signs to look for to not to find yourself in similar situations? What can be done if your municipality is already experiencing fiscal hardships? What are the consequences of fiscal misfortunes? How does one exit a fiscal emergency? This book answers these and other questions and serves as a guide to fiscal health and prosperity for U.S. municipal governments, students and researchers in public finance, and general public management fields.

Nordic criteria for Green Public Procurement (GPP) for alternatives to high GWP HFCs in RAC products Aug 22 2021

Available online:

<http://norden.diva-portal.org/smash/record.jsf?pid=diva2:1452437> The project developed Green

Public Procurement (GPP) criteria for environmentally friendly alternatives in the Refrigeration & Air Conditioning (RAC) sector. The problem with sector in the Nordic countries is that it contains large installed amounts of very strong climate gases, the HFCs. The total Nordic installed amount in 2018 is estimated to be approx. 43.5 million tons CO2 eqv. A market study roughly estimates that appr. 10 % are publicly owned installations. The project has formulated green procurement criteria for 25 product categories, based on screening data of the current technology stage for low GWP refrigerants and energy efficiency in different RAC product categories. The criteria can be directly inserted into tender documents. The overall conclusion is that natural refrigerants are applicable for most RAC products at equal cost and can be used as a selection criteria in GPP.
