Mixed-Effects Models in S and S-PLUS Jul 20 2021 An overview of the theory and application of linear and nonlinear mixed-effects models in the analysis of grouped data, such as longitudinal data, repeated

measures, and multilevel data. The authors present a unified model-building strategy for both models and apply this to the analysis of over 20 real datasets from a wide variety of areas, including pharmacokinetics, agriculture, and manufacturing. Much emphasis is placed on the use of graphical displays at the various phases of the model-building process, starting with exploratory plots of the data and concluding with diagnostic plots to assess the adequacy of a fitted model. The NLME library for analyzing mixed-effects models in S and S-PLUS, developed by the authors, provides the underlying software for implementing the methods presented. This balanced mix of real data examples, modeling software, and theory makes the book a useful reference for practitioners who use, or intend to use, mixed-effects models in their data analyses. It can also be used as a text for a one-semester graduate-level applied course.

Appalachian Geomorphology May 18 2021 In 1889 William Morris Davis offered in his paper "The Rivers and Valleys of Pennsylvania" an elegant set of arguments for the origin of the ridges and gaps, and went on to propose a model for the drainage development and geomorphic evolution of the Appalachians. His work served to focus the geomorphic community into an intense, extended debate on the nature and fundamental controls of the long-term erosion of the Appalachians. The 100th anniversary of Davis' provocative paper prompted the convening of a symposium to address some of the fundamental questions about the Appalachians, the 1989 Geomorphology Symposium. The theme of this symposium was the geomorphic evolution of the Appalachians. This volume brings together a collection of papers from the symposium, to provide a summary of the current state of knowledge.

Constitution to prohibit the sale of alcoholic beverages, suspects every immigrant of being a Red, and places TWK (meaning Trade With the Klan) stickers in merchant-members' shop windows. Then Henry Ford mass-produces flivvers that cost as little as \$290, women get the vote, girls get a new concept of morality, and a freewheeling, flask-toting citizenry begins its surge to hedonism. They have plenty of examples to emulate: public officials get rich on purloined Navy oil while the President whom they betray dallies in the 'Little White House on H Street' or with his paramour in a little White House closet, the high jinks of high society and Hollywood are amply reported by a sensation-seeking press, the advertising fraternity urges everyone to keep up with the Joneses and endows [them] with everything. The great euphoria reaches its climax with the stock market crash ... Here you see what America was like when factories lay idle and old newspapers become 'Hoover blankets' for evicted families; when angry farmers gathered at foreclosure sales with pitchforks and shotguns to fight for their land; when the International Apple Shippers' Association offered apples on credit to the jobless to sell for five cents apiece on city streets; when Franklin Roosevelt said, 'This nation asks for action, and action now.' and started the kind of action that kept him in the White House for the rest of the Thirties and beyond. To be sure, there were many during those decades who did not drink bathtub gin and hanker for the sinful ways of the city, who were not wiped out by the economic downturn, did not hate 'that man in the White House.' These people are here too, some baffled, some belligerent, all caught in the crosscurrents of a nation in transition."--Jacket flaps.
