**Geotechnical Engineering for the Preservation of Monuments and Historic Sites III** Mar 05 2020 The conservation of monuments and historic sites is one of the most challenging problems facing modern civilization. It involves, in inextricable patterns, factors belonging to different fields (cultural, humanistic, social, technical, economical, administrative) and the requirements of safety and use appear to be (or often are) in conflict with the respect of the integrity of the monuments. The complexity of the topic is such that a shared framework of reference is still lacking among art historians, architects, structural and geotechnical engineers. The complexity of the subject is such that a shared frame of reference is still lacking among art historians, architects, architectural and geotechnical engineers. And while there are exemplary cases of an integral approach to each building element with its static and architectural function, as a material witness to the culture and construction techniques of the original historical period, there are still examples of uncritical reliance on modern technology leading to the substitution from earlier structures to new ones, preserving only the iconic look of the original monument. **Geotechnical Engineering for the Preservation of Monuments and Historic Sites III** collects the contributions to the eponymous 3rd International ISSMGE TC301 Symposium (Naples, Italy, 22-24 June 2022). The papers cover a wide range of topics, which include: - Principles of conservation, maintenance strategies, case histories - The knowledge: investigations and monitoring - Seismic risk, site effects, soil structure interaction - Effects of urban development and tunnelling on built heritage - Preservation of diffuse heritage: soil instability, subsidence, environmental damages The present volume aims at geotechnical engineers and academics involved in the preservation of monuments and historic sites worldwide.

**Selective Estrogen Receptor Modulators** Feb 02 2020 The increasing awareness on the varied consequences of hypogonadism in distinct organs and systems has supported the notion of estrogens as systemic agents. This observation is congruent with the variety of tissues affected by - trogens when used in hormone therapy formulations on hypogonadic women. Apart from the genital tract and the breast, recognized as traditional targets for estrogens, the skeleton, the vascular tree, or the central nervous system, are good examples of territories that have demonstrated sensitivity to estrogens. This evidence has created great interest, as shown by the great amount of literature that has been produced on the benefits and risks associated with the use of estrogens. In parallel to the clinical interest, basic research has improved our knowledge on the complexities involved in estrogen action at the molecular level. Together with effects mediated through specific receptors, a concept that has been the mainstay of the interpretation of estrogen action for years, there is enough evidence to hold the notion of receptor-independent effects. The substantial advances in modern technology applied to research have helped in enlightening the particulars of this versatile action of estrogens. This more detailed knowledge on the sophisticated mechanism of action of estrogens has nourished the emergence of multiple hypotheses speculating with the possibility of manipulating estrogen action. The notion that a widely extended regulatory system of cell function, as it is the estrogen receptor machinery, might be modulated at will has arisen as an attractive, although still elusive postulate.

**The Night Cafe** Sep 22 2021 Between jobs and feeling financially strapped, gun-for-hire Hannah Nicks takes on an

assignment that promises easy money and an all-expenses-paid vacation on the Mexican Riviera. Hired by her sister's friend, a gallery owner, Hannah sets out to transport a minor artist's painting to its buyer in Puerto Vallarta. But when Hannah arrives at the delivery point, she finds the tail end of a massacre and is nearly killed herself. She hides the painting, fearing it is not a meal ticket but a death warrant, and flees back to the States. But it only gets worse for her in L.A. The gallery owner has been killed, and Hannah is named as the murder suspect. In order to prove her innocence, she must hunt down the person who framed her...and uncover the secret of a deadly work of art.

**Studio efficace per ragazzi con DSA** Sep 30 2019 Questo programma rappresenta la prosecuzione del bestseller *Imparare a studiare 2*, di cui riprende i concetti principali, adattandoli al caso specifico di studenti con DSA (Disturbi Specifici di Apprendimento). L'obiettivo è di andare oltre il semplice impiego personale di strumenti e strategie compensative, fornendo agli studenti competenze in grado di ridurre le difficoltà operative e funzionali che i DSA comportano. Il programma di intervento è articolato in 10 incontri, che mirano a sviluppare delle capacità specifiche: controllo del tempo; uso del diario; prendere appunti durante la lezione; studiare sui libri di testo; piani per ripassare; come affrontare diversi tipi di verifiche; come vincere la paura delle verifiche; strumenti compensativi e dispensativi. Per studenti con particolari difficoltà è possibile prevedere una personalizzazione del programma, con la progettazione di interventi più mirati o più lunghi. Per facilitare l'esecuzione e renderla più agevole è stato utilizzato un carattere grafico adatto alle caratteristiche dei ragazzi con DSA, e per rendere più accattivante e comprensibile la proposta alcuni dei contenuti proposti sono presentati come fumetti. Ogni unità si chiude con la riflessione «autovalutativa» del ragazzo sull'utilità delle attività svolte e sulla possibilità di potenziare i suoi processi di apprendimento. Per avere il monitoraggio della situazione, lo studente alla fine dell'unità indicherà su una scala di valutazione il grado di utilità percepito dell'attività svolta. **A New Language, A New World** Sep 03 2022 An examination of Italian immigrants and their children in the early twentieth century, *A New Language, A New World* is the first full-length historical case study of one immigrant group's experience with language in America. Incorporating the interdisciplinary literature on language within a historical framework, Nancy C. Carnevale illustrates the complexity of the topic of language in American immigrant life. By looking at language from the perspectives of both immigrants and the dominant culture as well as their interaction, this book reveals the role of language in the formation of ethnic identity and the often coercive context within which immigrants must negotiate this process.

**Donovan's Dilemma** Apr 05 2020 Donovan's Dilemma begins with the all-star quarterback of The New York Giants coping with a serious head injury which threatens to end his career. Pain and memory loss raise the questions "Will he ever play football again?" and "If not, what should he do with the rest of his life?" David Donovan moves from New York to Raleigh, North Carolina, to sort out his options. In Raleigh, he impulsively opens The Mozart Cafe, a temporary business he hopes will distract him. Instead, he is challenged by a desperate man demanding possession of The Cafe, a man willing to murder to get what he wants. At the same time, a mother and gifted girl hiding from the girl's jailed father learn he has escaped from prison. The frightened mother enlists Donovan's protection, a move which adds powerful emotional currents to the quarterback's impending decision.

**Die Mosaiken der Acheiropoietos-Basilika in Thessaloniki** Apr 29 2022 Obwohl der Bestand an frühbyzantinischen Wand- und Gewölbemosaiken im östlichen Mittelmeerraum sehr gering ist, waren die umfangreichen Reste des erhaltenen musivischen Dekors der Acheiropoietos-Basilika in Thessaloniki bisher noch nicht Gegenstand einer umfassenden Untersuchung. Die vorliegende Studie stellt diese überwiegend in den Arkaden und Fensterlaibungen erhaltenen Mosaiken in den Mittelpunkt. Aufbauend an die ausführliche Analyse dieses qualitätvollen Dekors werden weiterführende Fragen zu den frühbyzantinischen Mosaiken von Thessaloniki (v. a. Hagios Demetrios, Gerogios-Rotunde) bearbeitet und die bisher stark umstrittene relative Chronologie dieser Kunstgattung in dieser Metropole auf eine neue Grundlage gestellt. Ein umfangreicher Katalog vergleichbarer dekorativer Mosaiken des 5. und 6. Jhs. in Bogenlaibungen von Monumenten des gesamten Mittelmeerraums, die bisher noch nicht zusammenfassend bearbeitet worden sind, dient als Basis für die Bewertung und Einordnung. Als Corpus dekorativer Mosaiken in Bogenlaibungen des 5. und 6. Jhs. ist die Arbeit von grundlegender Bedeutung.

*Prosodic and Rhythmic Aspects of L2 Acquisition* Oct 04 2022 In recent years, prosodic competence has become increasingly important in second language acquisition studies, as it is a crucial element in the identification of non-native pronunciation and message understanding. This volume is the first attempt to provide a survey of interlanguage prosody research in L2 Italian. It begins with an overview of the possible approaches to the study of rhythmic-prosodic skills acquisition in an L2. The second part of the book emphasizes the relationship between the mother tongue and a second language, and investigates the presence of transfer in prosody interlanguage development. The third part illustrates prosody's role in the interpretation of pragmatic meaning in native-non-native interaction, and its influence on message persuasiveness. And in the fourth part, technology meets prosody in the areas of second language teaching and speech synthesis.

*Subsidence due to Fluid Withdrawal* Aug 22 2021 Subsidence of geologic surface structures due to withdrawal of fluids from aquifers and petroleum reservoirs is a phenomenon experienced throughout the world as the demand for water and hydrocarbons increases with increasing population growth. This book addresses the definition and theories of subsidence, and the influences of unique conditions on subsidence; it includes discussions of specific field cases and a basic mathematical model of reservoir compaction and accompanying loss of porosity and permeability. The book is designed as a reference for readers giving immediate access to the geological events that establish conditions for compaction, the mathematical theories of compaction and subsidence, and practical considerations of field case histories in various regions of the world.

*Encyclopedia of Italian Literary Studies* Jun 07 2020 The *Encyclopedia of Italian Literary Studies* is a two-volume reference book containing some 600 entries on all aspects of Italian literary culture. It includes analytical essays on authors and works, from the most important figures of Italian literature to little known authors and works that are influential to the field. The *Encyclopedia* is distinguished by substantial articles on critics, themes, genres, schools, historical surveys, and other topics related to the overall subject of Italian literary studies. The *Encyclopedia* also includes writers and subjects of contemporary interest, such as those relating to journalism, film, media, children's literature, food and vernacular literatures. Entries consist of an essay on the topic and a bibliographic portion listing works for further reading, and, in the case of entries on individuals, a brief biographical paragraph and list of works by the person. It will be useful to people without specialized knowledge of Italian literature as well as to scholars.

**Ultrasonography in Ophthalmology XV** Jan 15 2021 When in the early 60s echography was introduced into the field of ophthalmology, very few ophthalmologists realized the enormous potential of this procedure, the fundamental impact it would have on our branch of medicine or the innovations it would spawn. From its hesitant beginnings, echography has led to revolution in the field of ophthalmology and to our way of examining, treating and monitoring patients affected by eye disorders. This technique has brought untold benefits to patients worldwide. A crucial element in fostering the advance of the application of ultrasound in ophthalmology has been and is the biannual conference of the *Societas Internationalis pro Diagnostica Ultrasonica in Ophthalmologia (SIDUO)*, and incidentally, the Latin name reflects the wish of the founding members that *SIDUO* be truly international, and even though the instruments and apparatus used in the discipline are highly innovative, the underlying philosophy is one that traces back to Hippocrates, i.e., the healing of man and the improvement of man's quality of life. The first *SIDUO* conference was held in 1964 in Berlin.

*Geotechnical Engineering for the Preservation of Monuments and Historic Sites* Nov 12 2020 All the traces of historic heritage are a fundamental part of our environment and reward us in the form of cultural enrichment, with the ability to have a positive effect both on our lifestyle and economy. Therefore, the preservation of ancient monuments, historic towns and sites has increasingly drawn the attention of public opinion, governmental agencies as well as consultants and contractors. This interest must be however carefully controlled and directed, since the conservation of monuments and historic sites is one of the most challenging problems of our age. Careless attempts at preservation can be detrimental not only to their iconic value (formal integrity), but even to their structural characteristics and the materials they are built with (material integrity). *Geotechnical Engineering for the Preservation of Monuments and Historic Sites* collects one opening address, four special lectures and 82 contributions from all over the world, giving a unique sample of the geotechnical problems to be tackled, the solutions currently being proposed, and the strategies being carried out to preserve the overall integrity of monuments and historic sites. It is clearly apparent that differences exist around the world not only in terms of the characteristics of the monuments or sites to be preserved, but also in the approaches adopted to achieve this aim. Hence, no unique solution is available to the geotechnical engineer dealing with the delicate structures and sites that represent our cultural heritage, and knowledge of previous experiences may be a unique guide in any technical decision-making process.

**A Death in the Life** Sep 10 2020 Grand Master of crime fiction Dorothy Salisbury Davis introduces one of her most winning heroines, Julie Hayes, a former actress turned fortune-teller who abruptly learns there is murder in her future. Twenty-five-year-old Julie Hayes is feeling overshadowed by her globe-trotting journalist husband and looking for some excitement and direction in life. On what amounts to a dare, she sets herself up as "Friend Julie," a storefront fortune-teller in Manhattan's seedy Theater District. Now Julie finds herself concerned with the lives of the neighborhood eccentrics, old friends from the Actors Forum, and street characters such as Goldie the pimp, a wealthy gangster, and a young prostitute who wants Julie to help her escape *The Life*. But a man is found murdered in the girl's room—a man Julie can identify for the police. Thrust into the investigation of the man's death, Julie discovers a new direction for her life, but her tarot cards reveal a future she might not live to see. *A Death in The Life* is the first novel in Dorothy Salisbury Davis's Julie Hayes mystery series, which also includes *Scarlet Night*, *Lullaby of Murder*, and *The Habit of Fear*, as well as the stories "The Puppet" and "Justina" in the collection *In the Still of the Night*.
