*So Vast and Various* Aug 06 2020 John Warkentin looks at the work of geographers from 1831 to 1977 through the regional descriptions of seven perceptive observers of Canada who provide very different but illuminating interpretations: Joseph Bouchette, a surveyor-general from Lower Canada; George Parkin, an educator and journalist from New Brunswick; J.D. Rogers, a British barrister and scholar; Harold Innis, the great economic historian; R.C. Wallace, a geologist with administrative experience in the North; Bruce Hutchison, a brilliant BC journalist with deep regional insights; and Thomas Berger, who presided over a Royal Commission on northern development in the 1970s. Warkentin's introduction reveals how their descriptions and interpretations of Canada's areas helped provide the perceptions that influence contemporary conceptions of the country - both its regions and as a whole.

**Believing In Place** Apr 01 2020 The austere landscape of the Great Basin has inspired diverse responses from the people who have moved through or settled in it. Author Richard V. Francaviglia is

interested in the connection between environment and spirituality in the Great Basin, for here, he says, "faith and landscape conspire to resurrect old myths and create new ones." As a geographer, Francaviglia knows that place means more than physical space. Human perceptions and interpretations are what give place its meaning. In *Believing in Place*, he examines the varying human perceptions of and relationships with the Great Basin landscape, from the region's Native American groups to contemporary tourists and politicians, to determine the spiritual issues that have shaped our connections with this place. In doing so, he considers the creation and flood myths of several cultures, the impact of the Judeo-Christian tradition and individualism, Native American animism and shamanist traditions, the Mormon landscape, the spiritual dimensions of gambling, the religious foundations of Cold War ideology, stories of UFOs and alien presence, and the convergence of science and spirituality. *Believing in Place* is a profound and totally engaging reflection on the ways that human needs and spiritual traditions can shape our perceptions of the land. That the Great Basin has inspired such a complex variety of responses is partly due to its enigmatic vastness and isolation, partly to the remarkable range of peoples who have found themselves in the region. Using not only the materials of traditional geography but folklore, anthropology, Native American and Euro-American religion, contemporary politics, and New Age philosophies, Francaviglia has produced a fascinating and timely investigation of the role of human conceptions of place in that space we call the Great Basin.

**Galápagos: An Encyclopedia of Geography, History, and Culture** Nov 08 2020 This encyclopedia provides readers with a comprehensive look at the Galápagos Islands, from the wildlife and scientists that made them famous to the challenges and issues the islands face today. In the mid-1800s, the Galápagos Islands served as Charles Darwin's playground, a volcanic archipelago where he famously worked on his theories of evolution and natural selection. But who actually discovered the islands? Why didn't any country claim them for over 200 years? And is ecotourism hurting or helping these mysterious islands? This volume explores the history, science, and culture of the Galápagos Islands. A Preface, Introduction, Chronology, and Galápagos at a Glance primer introduce readers to the islands that are so famously associated with Charles Darwin. Twelve thematic essays allow readers to explore topics such as evolution, the geology of the islands, invasive species, and tourism in depth. Topical entries follow, covering key individuals and organizations as well as other important concepts and ideas. Thirteen primary document excerpts allow readers to study firsthand accounts from explorers and visitors to the islands. Appendices, a glossary, a bibliography, and sidebars round out the text.

Students of history, geography, and science will find this volume informative, while general readers will be intrigued to learn about these unique islands. Thematic essays introduce readers to the Galápagos Islands, providing deep coverage on the geography and geology of the islands, as well as such topics as Charles Darwin, evolution, tourism, and other topics. Alphabetically arranged topical entries allow readers to search for a wide range of topics, complete with cross-references and Further Readings. Primary document excerpts from scientists and explorers provide readers with firsthand accounts of travelers' observations and experiences on the islands. Appendices provide context about the islands and Charles Darwin's expedition in 1835 that helped to make the islands famous. A Glossary helps to define key terms and concepts for readers. A Chronology outlines key events through history that helped to shape the Galápagos Islands as we know them today.

*Writing British Columbia History, 1784-1958* Dec 30 2019 Captain James Cook first made contact with the area now known as British Columbia in 1778. The colonists who followed soon realized they needed a written history, both to justify their dispossession of Aboriginal peoples and to formulate an identity for a new settler society. *Writing British Columbia History* traces how Euro-Canadian historians took up this task, and struggled with the newness of colonial society and overlapping ties to the British Empire, the United States, and Canada. This exploration of the role of history writing in colonialism and nation building will appeal to anyone interested in the history of British Columbia, the Pacific Northwest, and history writing in Canada.

**Geography, History, and the American Political Economy** Sep 18 2021 This collection takes on the call issued by reviewers of *The American Way* for a critical application of Carville Earle's framework to more geographical examples of political and economic shifts in America's past. The essays illustrate

changes in U.S. settlement, development, and political structure through the lens of the restructuring of the American economy and society over approximately fifty year cycles of crisis and recovery. They demonstrate the extension of American's sphere of influence outside of the United States as a larger scalar shift, and they underscore the utility of geography in answering very local questions concerning questions of poorly documented settlement histories. Focusing on the geographic responses to periodic cycles of crisis and recovery and the more general underlying intertwining of geography and history, *Geography, History, and the American Political Economy* is an incisive demonstration of how the constant restructuring of American politics and economy occurs within spatial and historical constructs.

**A History of the Pacific Islands** Jun 15 2021 "Deryck Scarr examines the Pacific Islands' indigenous social, economic and political systems and then places in context the post-sixteenth-century European 'discovery' of the Pacific. Cultural, political, trading, social and personal exchanges in Island worlds are described and analysed, from 1767 to the year 2000. Throughout the book, the Island world and its people on land and on the sea are held firmly in the foreground." -- from the dust jacket.

**Between Geography and History** Jun 23 2019 The late Hellenistic period witnessed the rise of an imperial power whose dominion extended across almost the whole known world. The Roman empire radically affected geographical conceptions, evoking new ways of describing the earth and of

constructing its history. In this book the writings of three literary figures of the age are explored: the History of Polybius, two fragmentary works of Posidonius, and the universal Geography of Strabo. Analysis in terms of the philosophical concepts of time and space reveals the generic fluidity of such 'geographical' and 'historical' works. Furthermore, these broadly conceived accounts are shown to be appropriate literary media for the response to Roman power. They use, but transform, pre-existing Greek traditions in order to describe the new world of Rome, making them fitting products of a transitional age. This book provides a new approach to Roman imperialism by considering its impact on historiography and geographical thought.

*Population History of Cities and Towns in Canada, Australia, and New Zealand* Aug 25 2019 In this volume the author examines historical population figures in Canada, Australia, and New Zealand. This book fills a gap in reference resources dealing with the long-term population history of communities within these countries. Census data was collected on the same timetable and with the same methods in these former British colonies, making cross-referencing and comparison easier and more precise. The author is extremely precise in defining urban areas and the boundaries of communities. Name changes

are noted making this a comprehensive volume.

**Geopolitics, Geography and Strategic History** Dec 22 2021 This volume examines geopolitics by looking at the interaction between geography, strategy and history. This book addresses three interrelated questions: why does the geographical scope of political objectives and subsequent strategy of states change? How do these changes occur? Over what period of time do these changes occur? The theories of Sir Halford Mackinder and Nicholas Spykman are examined in order to provide an analytical narrative for five case studies, four historical and one contemporary. Taken together they

offer the prospect of converting descriptions of historical change into analytic explanations, thereby highlighting the importance of a number of commonly overlooked variables. In addition, the case studies will illuminate the challenges that states face when attempting to change the scope of their foreign policy and geo-strategy in response to shifts in the geopolitical reality. This book breaks new ground in seeking to provide a way to understand why and how the geographical scope of political objectives and subsequent strategy both expands and contracts. This book will be of much interest to students of geopolitics, strategic studies, military history, and international relations.

**The Sash Canada Wore** Jul 17 2021 Here is the story of the rise, spread, and fall of the Orange Order in Canada. Beginning in 1800, the Order grew steadily in many parts of the country during the nineteenth century, reaching its peak in the early part of the twentieth century. Since then, with the changing Canadian identity, the Order has declined in popularity and since 1945 has almost disappeared as a major presence. *The Sash Canada Wore* explains how this immigrant, ethnic ideology widely known for its Protestant Irishness, opposition to Roman Catholics, and loyalty to the British royal family, managed to become dominant, especially in Ontario, New Brunswick, and Newfoundland. The study is based on historical documents of the national Order, the manuscript records of more than fifty lodges, and the results of extensive field studies in Orange communities in every province. This significant contribution to Canadian social history will appeal not only to historians and geographers, but to members of the Order, and to all those who remember 'King Billy' on his white horse at the head of the parade.
