Self-Study in Physical Education Teacher Education Dec 26 2021 In this in-depth

examination of self-study as a research methodology, an international selection of physical education scholars share their ideas and experiences and consider the value of self-study as a vector for highlighting the emerging conflicts, dilemmas, and debates currently developing in teaching and teacher education pedagogies. A vital new addition to Springer's series *Self-Study of Teacher Education Practices*, the volume is divided into three sections assessing the significance of the approach itself, offering detailed subject-relevant case studies, and exploring the nuances and controversies attending the evolution of the methodology. The contributors show how self-study enables reflexivity in pedagogical practice, a notable lacuna in current critical research, and at the same time they make the technique accessible to scholars of physical education wanting a practicable introduction to the subject. The analysis also explores the implications of applying self-study to pedagogy itself, to the curriculum, and to human movement and educational practice more generally. By embracing more organic, emergent notions of research practice and learning, the book achieves a broader and more inclusive survey of pedagogical work in physical education teacher education that fully acknowledges the complexities of the field.

The Handbook of Practice and Research in Study Abroad May 31 2022 Co-published with the Association for American Colleges and Universities (AAC&U) If

we are all becoming global citizens, what then are our civic responsibilities? Colleges and universities across the United States have responded to this question by making the development of global citizens part of their core mission. A key strategy for realizing this goal is study abroad. After all, there may be no better way for students to acquire the knowledge, skills, and attitudes required to become effective change-agents in international contexts. The Handbook of Practice and Research in Study Abroad is a comprehensive survey of the field. Each chapter eloquently conveys an enthusiasm for study abroad alongside a critical assessment of the most up-to-date research, theory and practice. This contributed volume brings together expert academics, senior administrators, practitioners of study abroad, and policy makers from across the United States, Canada and other part of the world, who meticulously address the following questions: What do we mean by global citizenship and global competence? What are the philosophical, pedagogical and practical challenges facing institutions as they endeavor to create global citizens? How is study abroad and global citizenship compatible with the role of the academy? What are the institutional challenges to study abroad, including those related to ethics, infrastructure, finances, accessibility, and quality control? Which study abroad programs can be called successful? The Handbook of Practice and Research in Study Abroad is an indispensable reference volume for

scholars, higher education faculty, study abroad professionals, policy makers, and the academic libraries that serve these audiences. It is also appropriate for a wide range of courses in Higher Education Master's and Ph.D. Programs.

From the editors: "These autobiographies document the experiences of scholars from the early twentieth century to the present. The descriptions of early influences on their education, of their graduate school experiences, and of their academic career paths, provides a wealth of valuable material. Since four of these scholars have died and a number are in their eighties or older, these histories provide rich case studies on factors that influence the decision to go to college, get married, pursue an advanced degree, make specific occupational choices, and investigate certain topics. These autobiographies also detail the barriers that early women scholars in the social sciences faced." The scholars whose lives you will learn about in *Pioneering Paths in the Study of Families* include: Joan Aldous Katherine R.
