Index to Reviews, Symposia Volumes and Monographs in Organic Chemistry Aug 05 2020 Index to Reviews, Symposia Volumes and Monographs in Organic Chemistry For the Period 1961-1962 aims to help research workers, teachers, and students to locate quickly those current reviews in which they may be interested. The format used in the 1940-1960 Index has been retained. While the 1961-1962 issue stands on its own, it will be most useful in conjunction with the 1940-1960 volume. Complete author and subject indexes are included, with adequate cross-indexing in the latter. While the majority of articles listed is directly on organic chemistry, there are many which border on biochemistry, pharmaceutical chemistry, bacteriology, technological developments, etc. The volume is organized into three parts. Part I contains reviews in journals and periodic publications. Part II presents reviews in symposia, collective volumes, and non-periodical publications. Part III lists monographs on organic chemistry, 1961-1962. Included this volume are a number of articles which deal specifically with hazards in the use of various chemicals, such as perchlorates, peroxides, solvents, insecticides, etc. A selection of articles from the Journal of Chemical Education is provided as well as articles in the International Edition of Angewandte Chemie, published in English.

Community-Acquired Pneumonia Jul 16 2021 Community-acquired pneumonia remains the leading cause of hospitalisation for infectious disease in Europe, and a major cause of morbidity and mortality. This issue of the European Respiratory Monograph brings together leading experts in pulmonology, infectious diseases and critical care from around the world to present the most recent advances in the management of community-acquired pneumonia. It provides a comprehensive overview of the disease, including chapters on microbiology, pathophysiology, antibiotic therapy and prevention, along with hot topics such as viral pneumonias and pneumonia associated with inhaled corticosteroids.

Mandell, Douglas, and Bennett's Principles and Practice of Infectious Diseases E-Book Oct 31 2022 After thirty five years, Mandell, Douglas, and Bennett's Principles and Practice of Infectious Diseases, 8th Edition is still the reference of choice for comprehensive, global guidance on diagnosing and treating the most challenging infectious diseases. Drs. John E. Bennett and Raphael Dolin along with new editorial team member Dr. Martin Blaser have meticulously updated this latest edition to save you time and to ensure you have the latest clinical and scientific knowledge at your fingertips. With new chapters, expanded and updated coverage, increased worldwide perspectives, and many new contributors, Mandell, Douglas, and Bennett's Principles and Practice of Infectious Diseases, 8th Edition helps you identify and treat whatever infectious disease you see. Get the answers to any questions you have with more in-depth coverage of epidemiology, etiology, pathology, microbiology, immunology, and treatment of infectious agents than you'll find in any other ID resource. Apply the latest knowledge with updated diagnoses and treatments for currently recognized and newly emerging infectious diseases, such as those caused by avian and swine influenza viruses. Put the latest knowledge to work in your practice with new or completely revised chapters on Influenza (new pandemic strains); New Middle East Respiratory Syndrome (MERS) Virus; Probiotics; Antibiotics for resistant bacteria; Antifungal drugs; New Antivirals for hepatitis B and C; Clostridium difficile treatment; Sepsis; Advances in HIV prevention and treatment; Viral gastroenteritis; Lyme Disease; Helicobacter pylori; Malaria; Infections in immunocompromised hosts; Immunization (new vaccines and new recommendations); and Microbiome. Benefit from fresh perspectives and expanded global insights from an expanded team of American and International contributors. Martin Blaser, MD, a leading expert and Muriel G. and George W. Singer Professional of Translational Medicine at New York University School of Medicine, joins veteran PPD editors John E. Bennett, MD, and Raphael Dolin, MD to continue a legacy of excellence. Find and grasp the information you need easily and rapidly with newly added chapter summaries.

Public Health Monograph Nov 19 2021

Concepts and Methods in Infectious Disease Surveillance Jul 04 2020 Infectious disease surveillance has evolved at an extraordinary pace during the past several decades, and continues to do so. It is increasingly used to inform public health practice in addition to its use as a tool for early detection of epidemics. It is therefore crucial that students of public health and epidemiology have a sound understanding of the concepts and principles that underpin modern surveillance of infectious disease. Written by leaders in the field, who have vast hands-on experience in conducting surveillance and teaching applied public health, Concepts and Methods in Infectious Disease Surveillance is comprised of four sections. The first section provides an overview, a description of systems used by public health jurisdictions in the United States and legal considerations for surveillance. The second section presents chapters on major program-area or disease-specific surveillance systems, including those that monitor bacterial infections, foodborne diseases, healthcare-associated infections, and HIV/AIDS. The following section is devoted to methods for conducting surveillance and also approaches for data analysis. A concluding section summarizes communication of surveillance findings, including the use of traditional and social media, in addition to showcasing lessons learned from the New York City Department of Health's experience in surveillance and epidemiology training. This comprehensive new book covers major topics at an introductory to intermediate level, and will be an excellent resource for instructors. Suitable for use in graduate level courses in public health, human and veterinary medicine, and in undergraduate programs in public-health-oriented disciplines, Concepts and Methods in Infectious Disease Surveillance is also a useful primer for frontline public health practitioners, hospital epidemiologists, infection control practitioners, laboratorians in public health settings, infectious disease researchers, and medical and public health informaticians interested in a concise overview of infectious disease surveillance.

Outcomes in Clinical Trials Aug 17 2021 The traditional end-points for clinical studies of lung diseases were based on functional parameters. Their value as surrogate markers for disease activity and progression has been increasingly questioned by scientists, carers, regulatory agencies and funding bodies. Novel tools and methods with regard to biomarkers and patient-reported outcomes have made these parameters emerge from their status as interesting secondary end-points and become potential primary outcomes for clinical trials. Nevertheless, their relevance and validity still needs to be proven. This issue of the European Respiratory Monograph describes the current status regarding end-points in all relevant areas of pulmonary medicine.

Tuberculosis Jan 22 2022 Completely revised and updated, this comprehensive resource covers the epidemiology, pathogenesis, varied clinical manifestations, treatment and prevention of tuberculosis. All of the extra-pulmonary as well as pulmonary manifestations of tuberculosis are covered. Atypical mycobacterial infection is detailed. A special feature of this second edition is the new material on AIDS, which is now known to be complicated by tuberculosis infection.

Homo Patiens - Approaches to the Patient in the Ancient World Jun 02 2020 Homo Patiens - Approaches to the Patient in the Ancient World is a collection of studies about the patients of the Graeco-Roman world, their role in the ancient medical encounters and their relationship to the health providers and medical practitioners of their time.

The Spectrum of Bronchial Infection Sep 17 2021 Lower respiratory tract infections are one of the most frequent causes of medical consultation in primary care. They are also one of the main causes of emergency visits and hospital admissions. The majority of these infections occur in the bronchial tree and include a large spectrum of aetiologies and clinical manifestations, from mild acute bronchitis to severe bronchiectasis and exacerbations of chronic obstructive pulmonary disease. In this Monograph, a series of prestigious researchers and clinicians provide an overview of the advances in the pathogenesis, manifestations and new approaches to treatment of bronchial infection in a wide variety of clinical scenarios. This book offers the reader the best existing scientific evidence that can be applied to the care of patients with any kind of bronchial infection.

Therapie-Handbuch - Pneumologie Aug 24 2019 Das Therapie-Handbuch Pneumologie informiert Sie übersichtlich und komprimiert über alle praxisrelevanten Therapieformen und Behandlungsstrategien, die Sie als Hausarzt/Hausärztin kennen sollten. Praktische, prägnante Handlungsanweisungen für den Arzt in der Praxis Evidenzbasierte Empfehlungsgrade Übersichtliche Algorithmen und Tabellen zur Therapie Die wichtigsten Fakten komprimiert aufbereitet Renommierete und kompetente Autorenteam garantieren interdisziplinäre, gesicherte und allgemein akzeptierte Therapieempfehlungen und -richtlinien Verständliche Darstellung organbezogener und fachübergreifender Therapieansätze Das Buch ist in acht Teile untergliedert: Entzündliche Lungenerkrankungen / 1Obstruktive Atemwegserkrankungen / Diffuse parenchymatöse Lungenerkrankungen / Tumöröse Erkrankungen / Respiratorische Insuffizienz / Zentralnervös und funktionell bedingte Atemstörungen / Schlafbezogene Atmungsstörungen / Sonstiges Das Buch eignet sich für: Internist\*innen und Allgemeinmediziner\*innen (Hausarztpraxen)

Tuberculosis Jun 26 2022 With over 10 million new TB cases and 1.6 million deaths, TB is a global health priority. Multidrug-resistant TB is of particular concern to both clinicians and national TB programmes: in 2017, there were 558 000 new rifampicin-resistant cases and 460 000 confirmed multidrug-resistant TB cases. Despite extensive investigation over the years, there is still a great deal to learn about the prevention, diagnosis and treatment of TB. This Monograph brings together chapters from global TB experts and begins with a patients' perspective that sets the tone. The following chapters cover: the history of TB; epidemiology; strategies for control and elimination; clinical and laboratory diagnosis; imaging; treatment and drugs; TB in children and different patient populations; comorbidities; clinical cases; and much more.

Public Health and the Risk Factor Dec 29 2019 A risk factor is anything that increases the risk of disease in an individual.

Clinical Focus Series: Tuberculosis Apr 24 2022 Part of the Clinical Focus series, this book is a comprehensive guide to the diagnosis and treatment of tuberculosis. The new volume is highly illustrated with tables and images and written by an internationally recognised editor and author team.

Complex Pleuropulmonary Infections May 14 2021 Pleuropulmonary infections are among the major causes of morbidity and mortality worldwide. This issue of the European Respiratory Monograph considers pleuropulmonary infections from both medical and surgical angles.

Respiratory Epidemiology Jun 14 2021 Over the last decade, the volume of research into the pathophysiology and genetics of pulmonary diseases has increased greatly. This has led to the development of new treatments and therapies for many diseases, including lung cancer, asthma and cystic fibrosis. This issue of the ERS Monograph comprehensively demonstrates the developments in respiratory medicine in recent years. It outlines the importance of epidemiology in respiratory medicine, and will prove a methodological tool that will help disease management. It should also be used as an advocacy tool for the sake of public health.

Pattern Recognition and Artificial Intelligence Aug 29 2022 This two-volume set constitutes the proceedings of the Third International Conference on Pattern Recognition and Artificial Intelligence, ICPRAI 2022, which took place in Paris, France, in June 2022. The 98 full papers presented were carefully reviewed and selected from 192 submissions. The papers present new advances in the field of pattern recognition and artificial intelligence. They are organized in topical sections as follows: pattern recognition; computer vision; artificial intelligence; big data.

**European Respiratory Monograph 59: COPD and Comorbidity** Oct 19 2021 COPD is responsible for considerable morbidity and mortality, and its course is complicated by co-existing comorbidities that worsen prognosis. Understanding the importance of comorbidity and multiple comorbidities in COPD is important in patient assessment and management planning. This Monograph is the first comprehensive collection of up-to-date articles on COPD comorbidity. It includes chapters on epidemiology, cardiovascular disease, diabetes, psychological disease and infection, and covers the importance of including comorbidity in COPD treatment guidelines, as well as the ways in which comorbidity influences clinical COPD management. This Monograph will be of interest to clinicians, healthcare professionals, and those researching this important area.

Mandell, Douglas y Bennett. *Enfermedades infecciosas. Principios y práctica* May 02 2020 Obra de referencia para la comprensión integral del diagnóstico y el tratamiento de las patologías infecciosas tanto más habituales como aquellas tropicales y emergentes. Con un enfoque didáctico y conciso y que presenta una estructura que se asimila al razonamiento realizado por los clínicos en esta materia. El contenido se ha revisado y actualizado de manera meticulosa para incluir los últimos hallazgos clínicos procedentes de la investigación realizada sobre enfermedades infecciosas. Se incluye información sobre nuevos patógenos y tratamientos, así como de nuevos métodos diagnósticos como la genómica. Permite un acceso fácil y rápido a la información básica con la ayuda de cuadros esquemáticos que resumen lo esencial sobre el diagnóstico, el tratamiento y la prevención. La participación de un extenso equipo de especialistas internacionales asegura que esta tratado haga una cobertura íntegra de las patologías infecciosas presentes en prácticamente cualquier rincón del mundo. Durante cuatro décadas, Mandell, Douglas y Bennett. *Enfermedades infecciosas. Principios y práctica* ha sido la guía de referencia para el diagnóstico y el tratamiento de estas complejas enfermedades, en la cual han depositado su confianza tanto médicos como otros profesionales de la salud. La 9.a edición mantiene su compromiso por la excelencia con capítulos ampliados, un abordaje cada vez más global y numerosas actualizaciones para ayudar a los lectores a mantenerse a la vanguardia de esta especialidad de vital importancia. Meticulosamente actualizada por los Dres. John E. Bennett, Raphael Dolin y Martin J. Blaser, la presente obra ofrece la información más reciente acerca del difícil campo de las enfermedades infecciosas.

Current Therapy and Surgery for Urogenital Tuberculosis Feb 20 2022 This book is written by a high-skilled specialist with huge experience in diagnosis, therapy and surgery for urogenital tuberculosis UGTB is the second most common form of TB in countries with a severe epidemic situation and the third most common form in regions with low incidence of TB. With patients living in the region of a high TB incidence rate or patients who had contact with TB or suffer from recurrent course of the disease, all urogenital tract infections should be tested for UGTB. Patients with tuberculosis, including UGTB need long multi-drug chemotherapy, and compliance depends on the drug tolerance. Anti-TB therapy for kidney TB was complicated by adverse effects in 41.0%. This book discovers ways of minimizing side effects and presents optimal regimens and surgical techniques for UGTB patients.

**Pulmonary Complications of HIV** Oct 07 2020 The lung is the most common site of complications resulting from HIV infection. These respiratory conditions may be of infective or noninfective origin, and are associated with considerable morbidity and mortality. The editors of "Pulmonary Complications of HIV" have brought together experts from around the world to discuss this major area. A broad range of topics is covered, from the global epidemiology of HIV to transplantation, and recent advances in HIV infection, complications, treatment and prevention are discussed. The editors hope that books such as "Pulmonary Complications of HIV" will help us move towards achieving more successful therapies for HIV-related pulmonary infectious diseases.

**Bentley's Textbook of Pharmaceutics - E-Book** Jan 10 2021 This adaptation of Bentley's Textbook of Pharmaceutics follows the same goals as those of the previous edition, albeit in a new look. The content of the old edition has been updated and expanded and several new chapters, viz. Complexations, Stability Testing as per ICH Guidelines, Parenteral Formulations, New Drug Delivery Systems and Pilot Plant Manufacturing, have been included, with an intention to make the book more informative for the modern pharmacists. The book has six sections: Section I deals with the physicochemical principles. Two new chapters: Complexations and ICH Guidelines for Stability Testing, have been added to make it more informative. Section II conveys the information regarding pharmaceutical unit operations and processes. Section III describes the area of pharmaceutical practice. Extensive recent updates have been included in many chapters of this section. Two new chapters: Parenteral Formulations and New Drug Delivery Systems, have been added. Section IV contains radioactivity principles and applications. Section V deals with microbiology and animal products. Section VI contains the formulation and packaging aspects of pharmaceuticals. Pilot Plant Manufacturing concepts are added as a new chapter, which may be beneficial to readers to understand the art of designing of a plant from the pilot plant model.
