Lesson Project on Vocabulary Teaching. Can the Performance of Students in Vocabulary Tests be Improved through Different Vocabulary Introduction? Apr 17 2021 Seminar paper from the year 2015 in the subject English - Pedagogy, Didactics, Literature Studies, , language: English, abstract: Around 30 years ago, vocabulary was considered “a neglected feature of second language research” (Nation 2012: 93). Recent research, however, indicates an “enormous growth in research on vocabulary” (ebd.). Vocabulary is essential to communicate effectively. Nowadays, teachers often test their students' language skills in vocabulary tests, in which the students have to fill in the correct English translation for the German word. Therefore, many students learn vocabulary through direct translation and without any comprehensible context, but is this kind of learning appropriate? From my point of view “vocabulary learning is a continual process of encountering new words in meaningful and comprehensible context” (Harmon et al. 2009, cit. in: Bintz 2011: 45). Even if students are performing well in vocabulary tests, it does not mean that they can apply the words in context. Therefore, my lesson project will deal with the following question: Can the performance of students in vocabulary tests be improved through different vocabulary introduction? While focusing on different vocabulary introduction, I will also consider a meaningful and comprehensible context, so that students will be able to apply the words, which they have learned, in new context. First of all, some theoretical positions and beliefs of vocabulary teaching will be depicted, especially the “main jobs of the vocabulary teacher” (Nation 2012: 93) will be discussed. Various methods of the vocabulary introduction, e.g. creating a board game, word cards, etc. will be described. Students' performance on vocabulary will be tested by various vocabulary tests with meaningful context. Additionally, the aims as well as the survey instruments and methods of the lesson project will be given. Furthermore, anticipated challenges and possible solutions will be described at the end of Part A (Research and Theories). After having presented the theoretical background of the lesson project, this paper will have a specific look at the Action Research (Part B of the lesson project) in order to establish a connection between the theoretical context and the practical application. Therefore, based on the lesson project at the Geschwister-Scholl-Gesamtschule in Moers (8th grade), a survey will be conducted at the end of the lesson project, which is also described in chapter 4. The implementation of the lesson project, its results and a discussion will be given in Part B.

Teaching and Learning English at Primary Level. Songs and Rhymes as Support for Vocabulary Acquisition Mar 05 2020 Seminar paper from the year 2015 in the subject English - Pedagogy, Didactics, Literature Studies, grade: 1,7, University of Koblenz-Landau, language: English, abstract: Looking back, many adults remember school not only as a place and time of friendships and personal development but also as a time of boredom, restrictions and even fear. It does not take today's neurobiological knowledge of the brain to guess that a boring and fearful atmosphere is not the best learning environment. Instead, children should be taught in a way that is inspiring, fun and caring. A good opportunity for providing this type of teaching is through language classes in primary school. Some years ago, the governments of the German federal states decided to establish English as a first foreign language to be taught from as early as first grade. This enables English teachers to introduce children to the English language in a playful and natural way. Games, art activities, outdoor action and other activities can be combined with learning English. In addition, songs and rhymes can be used as age-appropriate teaching modules. This paper examines how songs and rhymes in primary school English classes support learning and focuses on vocabulary learning: Why and how is vocabulary taught? What is the role of songs and rhymes in teaching English? These two aspects will then lead to the main research question: How do songs and rhymes support vocabulary learning? The approach is to examine relevant literature on primary school education and English lessons with a focus on vocabulary learning and on songs and rhymes. According to the research concern, the paper first gives insight into vocabulary teaching (chapter 2). Next, it explores why and how songs and rhymes can be part of teaching English. Chapter 4 then examines songs and rhymes as a means of teaching vocabulary. The conclusion summarizes the findings concerning the research question. Should the paper arrive at the result that songs and rhymes are a motivating and inspiring way of learning vocabulary, it could be an encouraging message for teachers to apply that method.
